1987-89 Operating Budget

The 1987-89 biennial budget for the State of Washington adopted during the 1987 session of the Legislature totals \$17.568 billion. Of that total, \$10.176 billion is from the state's general fund, \$2.661 billion is from the federal government and \$4.730 billion is from other state sources.

The total budget represents a 12.4% increase over the 1985-87 state budget. The largest increase in expenditures is from the federal government which increased 22.6% while state general fund expenditures increased 9.7%. These percentage increases are low by historical standards. Not since the 1971-73 biennium has the state experienced a growth rate in state general fund expenditures below 10% for a two year period. In terms of expenditures from all funds, the 12.4% growth rate was exceeded in every biennium since the 1971-73 biennium (see historical information in subsequent charts).

The state general fund increase equates to a \$896 million increase over the prior state budget. About \$426 million of this increase was needed simply to continue the 1985-87 expenditures into the new biennium. The cost of continuing existing programs into the new biennium takes into account such costs as inflation and the annual cost of programs started during the last fiscal period of the prior biennial budget. The remainder of the budget increase, totalling about \$470 million, is for new or enhanced state programs. Improvements to the state's education system accounted for almost two-thirds of the increase in the state general fund budget. The largest share of education improvements

went to increase college faculty and school teacher salaries and to improve class size and other instruction support services. A 3% state employee salary increase each year of the new biennium, a new basic health care plan, expanded medical and dental care for needy people, improved water quality in the Puget Sound and other program changes account for the balance of the budget increase.

The overall growth from existing state tax sources enabled the Legislature to adopt the 1987-89 budget, including program enhancements, without increasing taxes.

Budget Highlights (General Fund-State)

Highlights at a glance. The 1987 Legislature provided the following major enhancements to government services. Greater detail on all these items and more are contained in the body of the publication.

K-12 Enhancements

Salary Equalization/\$17,600 Minimum Teacher Salary	\$24.0
K-3 Class Size Improvement (52/53:1000 with NERC)	28.0
Prenatal Care	13.8
Early Childhood Education	6.1
Voc-Tech	
Enrollment Expansion	4.0
Equipment	2.0
Drop-Out Programs	5.5
Schools for the 21st Century	2.0
Adult Literacy (Even Start)	1.6
Education Clinics Expansion	1.2
SOIC Operating	3.0
Block Grants	49.5
Total	\$140.7

Higher Education Enhancements

Salary Increases	\$ 74.5
Instructional Support & Equipment	45.0
Financial Aid	10.0
Plant Maintenance	4.4
Summer Term Funding	5.0
Distinguished Professors	5.0
Minority Recruitment	1.2
CC Faculty Salary Equalization	1.1
Other	6.7
(SWW Joint Center, Spokane Health Center, Adult Literacy, etc.)	
Total	\$152.9

Human Resource Enhancements

Low Wage Earner Salary Increases (Nurse Aides, Chore Service Workers, etc.)	\$16.3
Childrens Services (Child Protective Services and Mental Health)	17.4
Expanded Medical, Dental and Prenatal Care	35.5
Basic Health Plan	19.1
Total	\$ 88.3

Natural Resource Enhancements

Washington Technology Center	\$3.4
Timber, Fish, Wildlife Agreement	4.5
Department of Wildlife	8.0
Puget Sound Plan - Statewide Water Quality Efforts	12.3
Total	\$ 28.2

General Government Enhancements

Legal Services Augmentation	\$2.5
Dept. of Revenue - (Data Systems Improvements and Increased Audit & Appeals Staff)	4.9
Total	\$ 7.4

Transportation Enhancements

Automated Fingerprint Identification System	\$5.5
--	-------

Other Special Appropriations

Salary Increases for State Employees (State Personnel Board) Comparable Worth	\$30.8
Total	\$45.8

The Legislature convened on August 10, 1987 to address four issues. Three were fiscal issues, while the Boeing legislation was not.

Minimum Wages for Nursing Home Employees

The 1987-89 budget was amended by House Bill 1260 to provide an additional \$3.0 million, of which \$1.4 million is from the general fund-state to enhance wages of experienced nursing aides. These employees have several years experience and without the increases provided in HB 1260 would be paid the same as newly hired employees. Language was added to the original budget to ensure that all nursing home employees would be paid a minimum of \$4.76 per hour effective January 1, 1988 and \$5.15 per hour effective January 1, 1989. These additional funds will raise the wages of employees who were making around \$4.76 per hour prior to January 1, 1988 and will maintain a similar wage relationship between experienced and new employees effective January 1, 1989. This supplemental funding should eliminate the "wage compression" inequity in nursing homes.

Chore Services Funding

House Bill 1261 added \$3.0 million in general fund-state and \$1.5 million general fund-federal for a total of \$4.5 million to increase services in the Chore and Community Options Entry Program (COPES). The Department of Social and Health Services is required to divert as many eligible clients to the COPES program as possible to maximize the use of federal funding.

It is anticipated that a greater number of elderly clients can be served by maximizing all available resources.

National Can v. Department of Revenue, and SB 6078 B&O Tax Modified

In June 19, 1987, the U. S. Supreme Court in Tyler Pipe (a.k.a. National Can) ruled unconstitutional Washington's system of taxing manufacturing. The Court concluded that the multiple activities exemption results in unconstitutional discrimination against interstate commerce. The case was remanded to the Washington Supreme Court for determination of remedies and refunds. The Legislature in response enacted SB 6078. The Washington Supreme Court will hear the case in December, 1987 and will rule on the question of refunds and the constitutionality of SB 6078.

This lawsuit commenced in 1984. The 1985 Legislature enacted legislation contingent on the court ruling the multiple activities exemption invalid. This legislation allowed a credit against Washington's manufacturing tax for selling Business and Occupation (B&O) type taxes paid to other states. No credits were provided for out-of-state manufacturers selling in Washington. Part of the U.S. Supreme Court opinion suggests the credit may not be a sufficient remedy.

SB 6078 expands the 1985 credit to also provide a credit to out-of-state manufacturers selling in Washington for B&O type taxes paid to other states. This same credit is extended to Washington manufacturers selling in

Washington by allowing them to credit the manufacturing tax against the wholesaling or retailing tax. This eliminated the need for the multiple activities exemption and it was repealed. The estimated cost of the credits in the 1987-89 biennium is \$42 million.

The Legislature convened on October 10, 1987 to address two issues, K-12 teacher salaries and hazardous waste cleanup and regulation.

Teachers' Salaries (HB 1264)

The September 1987 salary increase raised salaries for certificated instructional staff to at least the level of the 1987-88 statewide salary allocation schedule contained in the appropriations bill. However, districts which were already close to or above this level received a minimum 2.1 percent increase in the district's average instructional salary. For approximately 66 school districts, employing 43 percent of the state's teachers, the 2.1 percent increase provided more salary dollars than what would have been received from the statewide salary allocation schedule.

However, unlike the districts funded by the statewide salary allocation schedule, these higher-paying districts received no funding adjustment for changes in the district's average salary due to increased staff education and experience. These adjustments had to be absorbed within the district's 2.1 percent overall increase. Also, because the districts had previously had full flexibility in designing their own salary schedules, they had to grant some teachers more than 2.1 percent increases in order to meet the new mandated minimum salaries. These larger increases also were included in determining the 2.1 percent average salary increase in the 66 districts.

In the Special Session, the 1987-88 salary increase language was changed to provide a funding adjustment for increases in staff education and experience (or "staff mix") in these districts, retroactive to September. The adjustment is

calculated using essentially the same "staff mix" or increments schedule used in funding the other 230 districts, and it may not precisely match the increment costs calculated using the district's own schedule. A similar adjustment was included for districts receiving the minimum 2.1 percent increase in 1988-89, in this case recognizing either positive or negative "staff mix" adjustments.

Appropriations were increased by \$9 million to cover the costs of the salary adjustments for staff education and experience. An additional \$1 million was also added to help districts pay for the mandated minimum salaries, so that the larger increases do not have to be absorbed within a district's average increase.

Hazardous Waste Cleanup and Regulation ("State Superfund" SB 6085)

In Washington, the Department of Ecology (Ecology) has identified 158 sites with known hazardous waste contamination. About 25 are listed as eligible for federal "Superfund" monies. The rest must be addressed by state government (Ecology). In the past, funds needed for state sites and for matching funds on federal Superfund sites have come from the general fund. Ecology estimates more than \$28 million will be needed in the next two years in order to address the state sites and match federal dollars. Local governments estimate several hundred million dollars are needed to meet state hazardous and solid waste requirements and to clean up contaminated landfills.

In addition to hazardous waste cleanup, Ecology is also responsible for regulating the day-to-

day production, transportation, storage, treatment and disposal of hazardous wastes. The hazardous waste fees, authorized in 1983, have been inadequate to run the hazardous waste regulatory program.

Ecology also administers state and federal water quality laws. Ecology has been unable to issue water quality permits on a timely basis. Further, the Puget Sound Water Quality plan calls for increased permit monitoring, especially regarding toxics, to provide better protection of Puget Sound and other areas around the state.

The Special Session provided Ecology the statutory authority and the funding to prevent as well as cleanup hazardous wastes sites. Specifically under SB 6085, Ecology will: 1) cleanup hazardous waste sites when a responsible party can not be found or is unable or unwilling to perform the clean up themselves; 2) seek triple damages to recover the cost of certain cleanups; 3) increase inspection and permit writing capabilities in the Solid and Hazardous Waste program; 4) offer more technical assistance to business and local government; 5) increase wastewater discharge inspections and permit writing ability; and 6) provide financial assistance to local government for hazardous waste site cleanup, hazardous and solid waste programs, and solid waste management facilities.

Funding for the state hazardous waste program will be provided by a tax of 0.8 percent on the first sale of hazardous substances in Washington. The 1983 hazardous waste fees are repealed. Ecology is authorized to charge fees to recover the cost of administering the wastewater discharge permit system.

The act (SB 6085), as passed by the Special Session, will be an alternative to Initiative 97, if the initiative is certified.

Note: SB 5717 re-appropriated \$24,000 to the Secretary of State (agency 085) in General Gov't in the 1987-89 biennium.

SB 5880 re-appropriated \$23,100 to the Office of the Governor (agency 075) in General Gov't in the 1987-89 biennium.

1985-87 total revised since 1987 Final Legislative Report due to reclassification of \$470,000 as capital for the Everett Community College.

1987-89 total differs from 1987 Final Legislative Report due to:

- Reclassification of fund 166 as capital in the Department of Natural Resources.
- Exclusion of fund 406-6 for compensation increases in Special Appropriations.

(1) Represents FTES for the Unified Business Identifier Program in the 1987-89 biennium.

Revenue forecasts are prepared by the Economic and Revenue Forecasting Council on a quarterly basis as required by law. The revenue forecast used by the Governor for his budget was prepared in November 1986. The Legislature had the benefit of two additional revenue forecasts, one adopted in March and one in May of 1987. The additional May forecast was not required by law. There were substantial revenue revisions from the November forecast to the May forecast both for the 1985-87 biennium and the 1987-89 biennium amounting to an additional \$213.5 million.

The Governor's budget, based on the November forecast, proposed additional funding for education which required a \$510 million tax increase and left an ending general fund-state balance of \$217.8 million.

The first budget passed by the House of Representatives was based on the March 1987 forecast and also proposed increased funds for education requiring a tax increase of \$322 million and would have left an ending general fund-state balance of \$27.4 million. Subsequently, the Senate considered a budget requiring a tax increase but it failed to get sufficient support. It would have required a tax increase of \$260 million and would have left an ending fund balance of \$137.5 million.

The Senate then passed a no tax increase budget leaving an ending fund balance of \$90.6 million. The House refused to concur with the Senate budget and the regular session of the Legislature ended in impasse.

In the extraordinary session the House passed a no tax increase budget which left an ending fund balance of \$2.8 million. The Senate amended the House budget leaving an ending fund balance of \$74.5 million. The House refused to concur in the Senate amendments and the matter was sent to conference committee. The conference committee report which was adopted by the Legislature did not require a tax increase and left an ending fund balance of \$71.1 million. After taking into account the Governor's vetoes of several tax exemption bills and certain sections of the budget bill and the Governor's promises of spending reductions, the ending fund balance was \$75.8 million.

The revenue forecast for each biennium is one element of revenues assumed to be available for expenditure. In addition, during each session legislation is enacted which affects revenues. Generally the Forecast Council accounts for legislation in the forecast following a legislative session. However, during its budget deliberations the Legislature keeps track of such legislation and creates a balance sheet which incorporates such changes. Below are the forecasts for both 1985-87 and 1987-89 followed by legislation or other items assumed to affect revenues which have not been incorporated in the revenue forecasts adopted by the Economic and Revenue Forecasting Council.

1985-87 Revenues and Expenditures (Dollars in Millions)

Revenue Accrual Account

State law requires that at the close of each biennium the State treasurer shall transfer the balance in the state general fund to the revenue accrual account. Moneys in this account may only be expended after appropriation for the purpose of decreasing the unfunded liability of a state retirement system.

In accordance with this law the legislature appropriated the \$165.1 million balance in the revenue accrual account for the Teacher's retirement system and the Law Enforcement Officer's and Fire Fighter's retirement system (LEOFF).

Summary Of Governor's Tax Plan

The Governor's tax plan as proposed would have increased revenues to the state by \$510 million. The main thrusts of the plan were tax base expansion, economic development and taxpayer relief provisions.

Elements of tax base expansion included extending the sales tax to most services, sales of newspapers, and extending the business and occupation (B&O) tax to business interest income. Taxpayer relief was provided by reducing the sales tax rate from 6.5% to 6.0%.

The economic development provisions included expanding the sales tax deferral program to in-state firms, eliminating the B&O tax surcharges and increasing the B&O tax deduction from \$1,000 per month to \$4,000 per month.

House Tax Plan Summary

The House tax plan (HB 404) would have increased revenues to the state by \$321 million. Unlike the Governor's tax plan of extending the sales tax to most services, the House would have extended the tax to a few selected services. These included the following services: computer/data processing; consulting and public relations; barbers and beauty shops; cable television; and miscellaneous personal services (e.g. massage parlors, escort services, etc.)

Other major elements of HB 404 were an additional B&O tax surcharge of 10% and extending the Distressed Area Sales Tax Deferral Program and B&O Tax Credit Program by three years.

1987 Major Revenue Issues

The following descriptions of major revenue issues are provided because they were significant revenue issues during the 1987 Legislative Session. The four issues are the \$9.15 property tax levy limitation, common school construction, school levies, and the National Can business and occupation tax case.

\$9.15 Property Tax Limitation

In recent years, local property tax levies in various places in the state have been approaching the \$9.15 per \$1,000 of assessed valuation property tax limit. Traditionally, more property tax capacity for junior taxing districts exists outside cities and towns than inside. City and town levies, when added to junior taxing district levies inside the city or town can create the potential or actual exceeding of the \$9.15 statutory limitation.

Two proposals were passed by the 50th Legislature that alter procedures for local administration of the \$9.15 per \$1,000 of assessed valuation statutory property tax limit.

First, Engrossed Substitute House Bill 298 (CH. 138, L 87) authorized the de-annexation or withdrawal of territory by library, hospital, fire, and metro park districts. The authority to de-annex or withdraw territory was granted to alleviate the potential for exceeding the \$9.15 per \$1,000 of assessed valuation limit and/or to avoid a reduction in levies.

A de-annexation or withdrawal would occur upon: (a) request by the junior taxing district; and (b) approval by the city or town, if the territory in question were inside a city or town, or by the county if the area were outside of a city or town.

In addition, Engrossed Substitute House Bill 298 provided an additional "up to" \$.35 per \$1,000 of assessed valuation above the current \$9.15 limit for junior taxing districts to use. The Legislature required that before the additional \$.35 could be used, it must be authorized by a majority vote of the people residing in the junior taxing district proposing the increased rate. Secondly, the Legislature increased the statutory limit of \$9.15 to \$9.50 to accommodate the \$.35 increase. Additionally, if two or more junior taxing districts occupied part of the same territory, they would share in the increased amount of taxing capacity provided the voters approved the increase. Finally, if the requested increased taxing rates exceeded the \$9.50, the levies would be adjusted in the same manner as if the rates were being reduced due to the \$9.15 limitation.

A second major proposal was enacted by the Legislature in the form of House Bill 1185 (CH 255, L 87). The measure creates a new statutory method of reducing junior taxing district levies in the event the levies exceed the \$9.15 or \$9.50 statutory limit (ESHB 298) as the case may be.

The measure sets up a priority sequence, based on the statutory levies, of the manner in which pro-rationing occurs. First, park and recreation service area levies, park and recreation district levies, and cultural arts, stadium and convention levies would be reduced or eliminated. Second, levies for flood control districts would be reduced or eliminated. Third, all other junior taxing district levies *except* fire protection, hospital, metro park, and library districts would be reduced or eliminated. Fourth, the fire district second and third 50 cents per \$1,000 of assessed valuation would be reduced or eliminated. Fifth, the fire district first 50 cents and the hospital, metro park, and library district levies would be reduced or eliminated.

The measure excluded the levies for port and public utility districts, voter approved excess levies, and the emergency medical services levies from the priority pro-rationing sequence.

House Joint Resolution 4220 (School Construction):

If approved by the voters in November, 1987, the state could levy a property tax for school construction which is not included under the one percent constitutional limitation on regular property taxes. This additional property tax for school construction cannot exceed thirty-five cents per thousand dollars assessed value, and cannot be levied for more than fifteen years. For additional details, see section on Public Schools.

ReESHB 455 (School Levies):

This legislation deals with school districts' maintenance and operations levies, along with issues of class size and school employee compensation. The bill grants all districts levy capacity equivalent to twenty percent of state and federal allocations, and "holds harmless" some districts at levies of thirty percent. For a fuller discussion of these issues, see section on Public Schools.

National Can, et al, v. Department of Revenue

In this case, taxpayers are seeking refunds of business and occupation taxes paid from 1980 on. The suit challenges the constitutionality of the B&O tax as applied to (a) Washington manufacturers selling their products in other states and (b) out-of-state manufacturers selling their products in Washington. The taxpayers base their challenge on the Commerce Clause of the United States Constitution, relying primarily on a United States Supreme Court decision, *Armco v. Hardesty*, ___ U.S. ___, 81 L.Ed.2d 540, 104 S.Ct.2620 (1984). In *Armco*, the Court held a similar West Virginia tax invalid because it discriminated against interstate commerce.

On March 6, 1986, the Washington Supreme Court upheld the application of the B&O tax to these plaintiffs. The court found that Washington's tax was different from West Virginia's and that the Armco decision did not apply to Washington's tax.

The case is on appeal to the U.S. Supreme Court and was heard in March 1987. Estimates of the potential fiscal impact in the 1987-89 biennium range from a loss to the state general fund of \$0 million to \$1.2 billion depending on the nature of the decision.

The decision was not announced before the Legislature adjourned on May 21, 1987.

The Legislative category represents the legislative branch of Washington state government including the two houses of the Legislature along with those agencies which provide support services directly to the Legislature.

The agencies providing support services to the Legislature, both during and between legislative sessions, are: the Legislative Budget Committee, the Legislative Transportation Committee, the Legislative Evaluation and Accountability Program, the Office of the State Actuary, the Joint Legislative Systems Committee and the Statute Law Committee.

The 1987-89 budget included two policy initiatives related to legislative agencies:

1) **Legislative Aides.** The budget includes an increase in funding in order to provide a Legislative aide for each member of the House of Representatives consistent with the current policy in the Senate.

2) **Office of the State Actuary.** Funding for the State Actuary is no longer provided by the state general fund. Since the Actuary's services are directly related to Retirement Systems, the Legislature determined the cost of such services should be borne by Retirement Systems expense fund.

	Total	0	18,953	18,953	5,524	0	5,524

Comments:

The Governor's budget mistakenly requested the Joint Legislative Systems Committee budget be funded from a dedicated account which did not have sufficient revenue to fund the operation of the committee.

The 1986 Legislature created the Joint Legislative Systems Committee. The increase in staff and dollars in 1987-89 is a result of funding the committee's functions for a full biennium instead of just one fiscal year.

The Joint Legislative Systems Committee originally requested \$18.9 million based upon the out right purchase of new computer hardware and systems development. Their request was revised based upon the decision to lease/purchase the new computer thus stretching the cost over several years and reducing the amount needed for the 1987-89 biennium.

Comments:

No longer funded by the general fund. Funding is now provided through the Department of Retirement Systems expense fund.

Provisoes:

See the proviso under the Deaprtment of Retirement Systems in Section 136 (2). The appropriation to the Department of Retirement Systems provides up to \$877,000 for the Office of State Actuary expenses.

Governor's Vetoes:

None.

Five state agencies form the judicial branch component of the General Government functional area. These judicial agencies are: the Supreme Court, the Court of Appeals, the Commission on Judicial Conduct, the State Law Library and the Office of the Administrator for the Courts.

The entire Judicial branch of Washington state is organized in four levels: district and municipal courts, Superior Court, the Court of Appeals and the Supreme Court. The district and municipal courts are financed at the local level, yet receive some support services through the Administrator for the Courts which serves all court levels.

The Superior Court receives state support for one-half the salary and all fringe benefits costs of the Superior Court judges in the state. Local governments pay the remaining costs.

A major budget issue relating to the judicial branch is funding for the Judicial Information System (JIS). The Office of the Administrator for the Courts requested an \$8.1 million increase above current policy for the Judicial Information system. Of the requested increase, \$3.2 million was from the Public Safety and Education Account (PSEA) and \$4.9 million from the state general fund. The Legislature maintained the current policy of funding JIS from the Public Safety and Education Account only and did not provide general fund state money for the JIS. Since an updated revenue forecast was made near the close of session, the Public Safety and Education Account appropriation was increased by \$2.2 million thus providing a total increase above current policy of \$5.4 million. The PSEA increase is sufficient to convert the district court sub-system to a mainframe computer compatible with the other sub-systems within the JIS.

Comments:

12. Additional funds are provided for the Treatment Alternatives to Street Crimes program to fund existing workload in existing counties.

14. A 10% increase in the Superior Court caseload is projected and the corresponding state costs have been provided for each fiscal year.

20. The highest priority request from the Office of the Administrator For the Courts was to convert the District Court/Municipal Court Information System (Discis) to new hardware which is compatible with the other subsystems within the Judicial Information System. While this was originally requested from the general fund, sufficient funds were available within the Public Safety and Educational Account to pay for the conversion. FTE's associated with this conversion are considered onetime costs and therefore should not be carried forward in current policy next biennium.

Provisoes:

Section 110 (1) Provides \$4,162,000 to be used solely for the Treatment Alternatives to Street Crimes program in Pierce, Snohomish, Clark, King, Spokane and Yakima counties (see item 12).

Section 110 (2). Provides \$296,000 for the Thurston County Superior Court to relieve the impact of litigation involving the State of Washington.

Section 110 (3). Requires the Administrator for the Courts to take appropriate action to prevent gender and minority bias in the courts.

Section 110 (4). Provides \$150,000 for dispute resolution center demonstration projects in King and Snohomish counties. Requires the Administrator for the Courts to submit a report on the result of the project by December 1, 1989.

Governor's Vetoes:

None.

Judicial Qualifications Commission/Commission on Judicial Conduct

Comments:

The Judicial Qualifications Commission, revised by the passage of SJR 136, is now called the Commission on Judicial Conduct. The Commission's jurisdiction is expanded to court commissioners and magistrates at all court levels. Previously only judges were under their jurisdiction. SJR 136 also requires certain hearings be conducted publicly and increased the members on the Commission by two. Additional funds were provided to accommodate these changes.

Governor's Vetoes:

None.

The General Government functional area of Washington State government includes a large collection of state agencies whose functions are primarily related to the administrative or regulatory activities. Also included in this functional area are the expenses of the executive branch state elected officials: Governor, Lieutenant Governor, Secretary of State, State Treasurer, State Auditor, Attorney General, and the Insurance Commissioner.

Several agencies in this category provide administrative services to other state agencies in which cost of the service is paid through the use of revolving funds rather than a general fund appropriation. This method of financing explains why general government represents 5.2% of the total state budget but only 1.3% of the state general fund budget. ^{5.4%}
_{1.4%}

The major policy and budget items in the general government area are: (1) the creation of the Department of Information Services, and (2) funding for legal services augmentation.

Department Of Information Services

With the passage of 2SSB 5555, statewide functions related to telecommunications and data processing within the Department of General Administration and the Department of Licensing were combined with the functions of the Data Processing Authority to form a new agency called the Department of Information Services. The purpose of the new agency is to provide for coordinated planning and management of the state's information and computer related services.

Legal Services Augmentation

Because of difficulties in maintaining well qualified attorney's within the Attorney General's Office and because of increased litigation against the state and various state agencies, the Legislature provided approximately \$10.2 million for legal services augmentation. On the basis of a recently completed compensation study by Price Waterhouse, approximately \$4.0 million is for salary increases to make assistant attorney's general salaries comparable to those in the private sector, \$5.0 million is for additional funding for tort actions and the remainder is for additional legal services for specific state agencies. The Attorney General receives an appropriation from the Legal Services Revolving Fund and all agencies receiving legal services from the Attorney General must pay into the revolving fund according to services received. Agency budgets contain funds to pay for legal services. In order to pay for the higher costs of legal services which will result from augmentation, a special appropriation is made to the Governor for distribution to agencies. The general fund-state portion of the legal services augmentation special appropriation is approximately \$2.5 million.

Comments:

- Additional staff for Budget, Agency Support Services, Executive Support, and Accounting and Fiscal Services.
- Personal service contract for work on the MIDAS computer system.
- Small agency reimbursement and shift from General Fund to Motor Vehicle Fund.
- Project to develop accountability indices comparing actual school district practices with common school funding allocations and formulas.
- Transfer of some Corrections Standards Board functions to OFM as specified in SHB 738.
- Provides funds for actuarial consultant to review Department of Labor and Industries data.
- Statewide school facility inventory to facilitate decisions on school construction projects.

Provisoes:

Section 121 (1). Provides funding for the services of an actuarial consultant (see item 7 above).

Section 121 (2). Requires that reports to be submitted to the Legislature be submitted by the dates specified. OFM may require agencies under the authority of the Governor to submit draft reports for OFM review prior to submission of the report to the Legislature.

Section 121 (3). Requires OFM to prepare a report describing a system to control acquisition and replacement of furniture and equipment by state agencies. Due date for the report is January 1, 1988.

Section 121 (4). Provides funds for a state-wide inventory of school facilities to be developed jointly and in cooperation with the State Board of Education and the Superintendent of Public Instruction (see item 8 above).

Section 121 (5). Provides funds for implementing OFM's responsibilities under SHB 738 concerning the Corrections Standards Board (see item 6 above).

Section 121 (6). Requires OFM, in cooperation with the State Board for Community College education, to study the cost of community college faculty increments and to identify the faculty salary increment policy at each college district. Findings and recommendations are to be reported to the 1989 regular session of the Legislature.

Total		0	246,030	246,030	0	246,007	246,007

Comments:

1 and 2. As Lottery game sales increase, prize payments will also rise, in accordance with the statutory requirement that 45% of Lottery revenue be awarded as prizes. The cost of producing tickets, paying retailers and other volume-dependent expenses will also rise. These enhancements are from the non-appropriated state Lottery account.

3, 4 and 5. The Lottery plans to add a new game, either a new on-line (computer) game or a second weekly Lotto drawing. This new game will go into operation around January 1988. A new game, like a sales increase, will increase prize and volume-dependent expenses. In addition, it will increase overhead operating expenses. Enhancement 3 is from the appropriated Lottery administration account, while 4 and 5 are from the non-appropriated state Lottery account.

6. Lottery headquarters will move to a new facility due to non-renewal of its current lease. This enhancement covers both the cost of the move and higher rent at the new location. Money for moving computers and increased data processing costs is deleted from Governor's recommendations because the new building is inadequate for computer operations.

7 and 8. The Lottery will add a staff person to coordinate design and operation of the telecommunications network used in the on-line game. The cost of this position will be covered by the savings it generates.

Governor's Vetoes:

None.

Provisoes:

Section 128. The Legislature appropriates only the administrative expenses of the Lottery. Prize payments to game winners, discounts given to sales outlets, advertising and ticket printing costs are non-appropriated expenses. ESHB 26, which reauthorized the Lottery through 1992, expanded the Legislature's appropriation authority to include sales discounts, advertising and ticket production costs. As a result of ESHB 26, the Lottery's appropriation was increased by \$27,300,000 to cover these previously non-appropriated expenses. However, the provision in ESHB 26 increasing the portion of Lottery expenses that must be appropriated was vetoed by the Governor. Consequently, the budget bill requires that \$27,300,000 of the \$43,697,000 appropriation lapse, leaving a \$16,397,000 appropriation for operating costs of the Lottery.

7. Senior Citizen Tax Deferral	450	0	450	450	0	450
8. Increase research staff	0	0	0	100	0	100
Total	64,567	4,338	68,905	63,667	4,338	68,005

Comments:

1. A. In the supplemental budget, \$350 thousand is provided for the senior citizens' tax deferral. As the availability of a property tax deferral for senior citizens became well known, use increased more than expected. \$400 thousand was originally budgeted for the 1985-1987 biennium for reimbursements to counties required under this program.

B. The Governor requested an additional \$14.8 million for utility tax refunds to businesses required under the court decision in *Washington Water Power Company vs State of Washington*. The Legislature instead reflected the decision by lowering the state's revenue estimate by this amount.

2. Funding is provided for a micrographic processor that will convert paper files to electronic ones and allow audit personnel on-line access to taxpayer records, making audits by headquarters staff easier. \$1.9 million of this increase is a one-time-only cost. The Department expects \$8 million in additional revenue during the 1987-89 biennium due to this enhancement.

3. The Legislature did not fund this increase in enforcement staff aimed at relieving field audit and collection personnel of

clerical duties. Greater ease in performing headquarters audits will free up staff for this area. The Department forecasts that this effort will increase revenue by \$5.16 million during the 1987-1989 biennium. The Department has the managerial discretion and responsibility to minimize the revenue impact of this reduced enhancement by accomplishing it through reprioritization of other agency activities, as the Director deems appropriate.

4. The Legislature funded 65% of the appeals staff increase in the Governor's request. More speedy appeals are forecast to bring in \$13.26 million during the 1987-1989 biennium that would otherwise not be collected until later. The Department may handle this reduced enhancement through reprioritization of other agency activities, as the Director deems appropriate.

5. One position to develop on-line computer access to information on unclaimed property is provided from non-appropriated funds.

6. One position is funded from the timber tax distribution account to fully automate the timber tax field inspection program. The Department forecasts a \$230,000 increase in

timber tax revenue during the 1987-1989 biennium due to this enhancement.

7. Funding for the senior citizen tax deferral is increased due to increased use of this program (see 1).

8. Funding is provided for one additional research staff person to do tax data compilation and analysis.

Provisoes:

Section 129 (1): If SHB 434 had been enacted, the hazardous waste control and elimination account appropriation would have lapsed, as the bill provided another source of funding for collecting hazardous waste fees. However, the bill was not enacted.

Section 129 (3): Beginning on the day SSB 5293 goes into effect, the Department shall not collect business and occupations tax from adult family homes.

Governor's Vetoes:

None.

Board of Tax Appeals (\$000)

Section 130

1985-87 Biennium		GF-State	Other	Total

3. Addtl ½ Admin Law Judge		0	0	0	52	0	52
	Total	1,142	0	1,142	1,214	0	1,214

Comments:

1. The Legislature added funds to maintain a computer installed in the Board's headquarters during the 1985-1987 biennium.
2. Travel funding was increased: Tax Appeals Board members and administrative law judges must travel to conduct hearings outside the Olympia area. Also, travel to conferences is required for Board members and administrative law judges to maintain expertise in property tax law.
3. An additional administrative law judge was added for FY 1988 to accommodate an anticipated increase in the number of appeals heard during that year.

Provisoes:

Section 130: The budget provides that the \$72 thousand enhancement in funding above the level requested by the Governor be used to handle increased appeals from audits and King county board of equalization assessments and to conduct appeals in eastern Washington and other parts of the state.

Trends:

The Board of Tax Appeals hears appeals of decisions related to property, excise, and boat taxes made by county boards of equalization, the Department of Revenue and the Department of Natural Resources. Caseloads vary due to changes in the number of cases heard by these bodies and in the portion that are appealed. During 1985-1987, caseloads were low due to an unusually low volume of hearings in King county. Appeals are forecast to rise by 33% in the 1987-1989 biennium. The 1987-1989 budget provides a 7.6% increase above the level needed to maintain current services.

Governor's Vetoes:

None.

16. Insurance policy and rate analyst		0	0	0	0	77	77
Total		0	9,364	9,364	0	10,205	10,205

Comments:

The Office of the Insurance Commissioner is now funded entirely from fees paid by insurance companies, health care contractors, and HMOs. Due to increasing premium volume, fee rates will go down even with these enhancements.

1. Funding is provided to increase from five to six accountants handling revenue projections and collections, audit of premium tax returns, regulatory fee billing and collections, budget preparation and monitoring, payroll and other functions.
2. The Legislature provides for auditing of surplus line brokers; insurance brokers who collect premium tax but are not now audited, as are authorized insurance companies.
3. Funding is provided for analysis to ensure that insurance companies are organized and operate in conformity with regulations.
4. An additional insurance examiner is provided to reduce the backlog of companies awaiting an audit of financial solvency.
5. An additional investigator is provided to look into complaints of illegal actions by insurance agents, brokers or adjusters. There are currently two investigators.
6. A regulation development specialist is provided to develop rules implementing newly enacted insurance statutes.
7. An additional insurance complaints advisor is provided to investigate conflicts that arise between people or organizations that are insured and insurance companies.
8. Funds are provided to increase the number of senior health care brochures printed. These brochures advise senior citizens about insurance needed to supplement Medicare, and help prevent fraudulent or excessive sales of Medicare supplement insurance.
9. An additional complaints advisor is provided to investigate conflicts that arise between people or organizations that are health care service contractor (HCSC) policyholders or subscribe to HMOs and the HCSCs or HMOs themselves.
10. Increased clerical staff are provided for both the commercial insurer and health care regulation programs.
11. Personal computers and terminals and communications equipment are provided to link three field offices with the Olympia headquarters.
12. Funding is provided for technical and management training for regulatory personnel.
13. A research analyst is provided to organize and interpret data regarding insurance company financial solvency and operations, and policy terms and rates.
14. Two staff are provided to implement and monitor policies on continuing and pre-licensing education requirements for insurance agents and brokers.
15. A regulation review specialist is provided to assess regulation and monitoring of newly emerging health care delivery systems.
16. An insurance policy and rate analyst is provided to study and work on the contracts for health care filed by HCSCs and HMOs.

Governor's Vetoes:

None.

Comments:

1. Funds additional service center costs resulting from operation of newly developed computer systems.
2. Consolidates DRS into a single building instead of the three locations currently in use.
3. Expenses for the Actuary's services to the state's retirement systems are to be billed to DRS.
4. Funds the administrative expenses associated with implementation of portability legislation (ESSB 5150).
5. Converts FY 87 project staff to permanent staff.
6. Auditing of employer's retirement practices and procedures to verify member data, accounts receivable, and retirement calculations.
7. Monthly balancing of PERS and LEOFF disbursement systems.
8. Funds staff for research and statistics work in FY 89.

Provisoes:

Section 136 (1). \$554,000 is for implementing portability legislation (ESSB 5150). (See item 4 above.)

Section 136 (2). \$877,000 may be spent for expenses of the Office of the State Actuary. This includes \$685,000 for the Actuary's services to the state's retirement systems and \$192,000 for services to DRS. (See item 3 above.)

Governor's Vetoes:

None.

4. Drug Testing		0	0	0	0	50	0
5. Ex-officio commissioners		0	0	0	0	10	10
Total		0	4,063	4,063	0	4,233	4,233

Comments:

1. Funding is given for investigations required prior to the opening of the Capital Downs track.
2. Expenses are reduced because of a lower estimate of the number of days of racing during the 1987-1989 biennium. This lower estimate is noted in the Governor's budget addendum.
3. Funding is provided for increased security staff at and around racing tracks.
4. Funding is provided for drug testing of jockeys and other race track personnel.
5. Funding is provided for three ex-officio, non-voting legislator Commissioners under the provisions of EHB 831.

Provisoes:

Section 142 (1): If there are more than 698 racing days during the 1987-1989 biennium, the Governor may allocate additional money from the Horse Racing Commission Account to the Horse Racing Commission as he deems necessary.

Section 142 (2): No Horse Racing Commission funds may be used for certification of Washington-bred horses under the provisions of RCW 67.16.075.

Section 142 (3 & 4): Money for increased security, drug testing and ex-officio Commissioners is provided contingent on passage of EHB 831. This bill increases the portion of the state's share of horse racing wagering revenue that goes to the Horse Racing Commission Account. The increase over the biennium to the Horse Racing Commission Account, and corresponding decrease to general fund deposits, is expected to be between \$360 and \$390 thousand.

Governor's Vetoes:

None.

Liquor Control Board
(\$000)

Total		0	87,716	87,716	0	87,776	87,776

Comments:

1. Funding is provided for complete reprinting and distribution of 12,000 liquor law and regulation books. Books are given to all businesses with liquor licenses as well as state and local law enforcement officials, liquor suppliers and others. Multiple updates make a reprint necessary.
2. A chemist is provided for chemical analysis of liquor products as required by statute. The University of Washington's resources have been used for this purpose in the past.
3. Funds are provided to repair the floor of the 243,200 square foot liquor distribution facility. Land shifts have caused the floor to sink.
4. Computer programming necessary to put the Board staff on the state payroll system is provided.

Provisoes:

Section 143 (1): When the lease expires on a state liquor store located anywhere except an incorporated city in which there is more than one liquor store, a calculation shall be made of each such stores' gross bottle sales during the preceding 12 months. If gross sales during the preceding 12 months are less than 80,000 bottles, that store must be closed and an agency may be established in its place.

The human services section of the appropriations act is separated into two sections to better explain the programs included in the budget. The two sections are the Department of Social and Health Services and Other Human Resources. The Department of Social and Health Services budget is displayed by program in order to give better visibility to the cost of services provided by the Department. The Other Human Resources section, in contrast, displays budgets by individual agency, and includes the Department of Corrections, Department of Labor and Industries, Employment Security Department and the other human services related agencies.

Policy Initiatives

The 1987 Legislature addressed the major social policy issues concerning welfare and health care. Significant attention was given to the policies governing the Aid to Families with Dependent Children program. Since 1980, income and medical assistance (AFDC, Title XIX) caseloads have risen dramatically, consistently requiring supplemental appropriations to cover the additional costs of these unexpected caseloads. The steady climb in caseloads is not unique to Washington and has generated much discussion in other states and the Federal government. The discussion has focused on the fact that the Aid to Families with Dependent Children program has not alleviated poverty and perhaps has actually increased welfare dependency. In our state, the Department of Social and Health Services (DSHS) has not been able to satisfactorily identify and articulate the factors that have caused the dramatic increases in our income and medical assistance caseloads. The Legislature's approach to the welfare dependency problem includes both long and short term solutions.

Family Independence Program (FIP)

The long term solution is the adoption of Second Substitute House Bill 448, the Governor's proposed Family Independence Program (FIP). 2SHB 448 contains four objectives: (1) to reduce the number of children in poverty; (2) to provide opportunities for parents to enter the economic mainstream; (3) to provide financial incentives for entering employment or participating in education, training and work programs; and (4) to provide basic financial and medical assistance for those unable to participate. The Family Independence Program will be implemented at the earliest, March 1, 1988. For more detail on ESHB 448, see the **Final Legislative Report** of the Fiftieth Washington State Legislature.

1987-89 Legislative Budget

The short term solution was established by the Legislature in the 1987-89 Appropriations Act. The guiding welfare policy in the appropriations act was to help people get off public assistance as soon as possible and keep the working poor from returning or becoming new public assistance recipients. Several budget initiatives were adopted that support this legislative policy.

Low Wage Earner Salary Increase

The first initiative is the Low Wage Earner salary increase. Currently, many social services providers contracting with the state pay their employees less than the amount given to welfare recipients. There is little or no financial incentive for welfare recipients to seek these jobs. The 1987 Legislature provided funding to bring salaries of nurse aides, chore service providers and others to the income assistance need standard of \$4.76 per hour in Fiscal Year 1988 and to the Family Independence Program standard of \$5.15 per hour in Fiscal Year 1989. This action will help individuals in those occupations stay off welfare, as well as providing financially attractive employment for those on welfare.

Opportunities Program

The second initiative is designed to enhance the employability of welfare recipients and reduce long term dependency on public assistance. Studies show that women who begin receiving welfare due to teenage pregnancy are most at risk to become long term welfare recipients and are likely to continue having children. These women, when their children are grown, face the greatest barriers to employment. This is attributed to their lack of job skills or experience and low self-esteem.

The Legislature provided funds to expand the Opportunities Program to focus services on recipients who become mothers as teenagers and on long term recipients with teenaged children. Services directed at teenaged parents

are intended to avert long term dependency. In addition, due to diminished federal support, these state funds will also continue employment and training services for welfare parents in general.

Medical And Dental Services

Three other initiatives relate to expanded Title XIX medical and dental programs and an innovative state funded medical program. Title XIX medical services will be made available to an expanded population of working poor. The Medically Needy Income Level will be expanded by the end of the 1987-89 biennium to 133 percent of the AFDC grant standard so that more people will have access to medical services through the Medical Assistance program. This initiative is designed to keep people working when subjected to a major medical problem. Currently, the only people eligible for medical assistance are those at or below 100 percent of the AFDC grant standard. The result is that many working poor are faced with a major medical problem and often cannot pay the cost of medical services. They then cease working and become welfare recipients. The expansion of the Medically Needy Income Level is a positive incentive to keep people working. The reinstatement of the Adult Dental Program is another incentive to keep people working and to help people who are currently on welfare, get off. Many people who work at low paying jobs cannot afford routine dental care, let alone acute care. Absenteeism and eventual loss of employment can result in people returning to welfare for cash assistance. Many current welfare recipients find it difficult to look their best in job seeking situations. Reliability can also be a

problem if chronic suffering is indicated when seeking employment.

To further assist the working poor, the 1987 Legislature adopted Second Substitute House Bill 477, "The Health Care Access Act of 1987". This program is funded entirely from a general fund state appropriation. It is a pilot project directed at persons under 65 years old who are at or below 200 percent of the federal poverty level. Enrollees may continue in the program when their income exceeds 200 percent of poverty, but only if they pay the full premium cost. This full premium payment arrangement is only for a limited time. This new program will assist another segment of the working poor with medical care costs and keep them from falling into or re-entering the welfare cycle.

The Legislature, in an attempt to enable the birth of healthy babies and to avoid future social service program costs, greatly enhanced the current state funded prenatal program and authorized state participation in the federally supported Title 19 SOBRA prenatal program. These initiatives will allow services to low income women and their children under two years old.

"The Alcohol And Drug Addiction Treatment And Support Act"

Another change in the state's welfare system will be instituted under Substitute House Bill 646. Under this legislation, the state will no longer provide cash grants to addicted persons who may use the money to support their addiction. Instead, services in the form of housing, treatment and assessment will be provided. Under the new program, treatment will be optional to the client and those not wishing treatment will receive housing, board and a small amount of cash for incidentals. These changes result from the combination of: (1) alarming caseload increases in this category of the General Assistance-Unemployable (GA-U) program; (2) evidence that the state may have become a magnet, with the allure of cash assistance drawing substance abusers from other areas; (3) criticisms of the policy of providing cash grants to addicted persons; and (4) the requirement that these persons attend treatment programs whether or not they are amenable to treatment. It is expected that the new program will cost less than the current system. At the same time, it will provide greater assurance that this population will have safe housing, adequate meals, and appropriate treatment.

Child Support Collections

A substantial staff increase was provided in the budget to increase child support collection efforts for both welfare families and single parent families not receiving assistance. These additional collections will help offset the costs of welfare grants, and can be key to getting off or staying off welfare for single parents in low paying jobs.

Child Protective Services

Several factors combined to bring legislative focus on child protective services issues in the budget, and statutory changes. Rising levels of reported child abuse and neglect, and the increasingly serious nature of those reports, caused the workloads of child protective service workers and other child welfare caseworkers to far exceed reasonable standards. Availability of suitable foster or group homes for children was diminishing, and resources were unavailable for providing necessary community services to maintain families without removing children from their homes. Finally, the tragic death of a child while under the supervision of Child Protective Services prompted both legislative and executive branch investigations.

The Governor's Child Protective Services Review Team Report dated March, 1987, made some 80 recommendations for improvements, which can be categorized as follows:

1. Changes to Chapters 26.44 and 13.34 RCW, designed to more clearly define child abuse, clarify the rights of the child and the role of the caseworkers, establish a risk assessment model allowing caseworkers to refer low risk cases to

community services, and otherwise facilitate responses to child abuse cases.

2. Service improvements, including sufficient additional caseworkers to reflect reasonable workload standards, additional resources such as therapeutic day care and public health nurses, and other improvements.

3. Proposals relating to internal program management, organization of childrens' services, training and salaries of caseworkers and supervisors and better management information systems.

Many of the recommendations relating to funding of services, service delivery methods, and statutory clarifications and revisions were considered by the Legislature. All sought to reduce the incidence of child abuse, and provide the tools necessary to improve the state's responses to such abuse. Reduced caseloads for child protective service caseworkers was perhaps the major childrens' funding issue of the 1987 session.

The appropriations act responds to these concerns in three ways:

1. **Expanding resources** - Funds were provided to lower the workloads of caseworkers, both by increasing the number of caseworkers, and by adding other staff such as clerical aides, attorneys and financial workers. Equipment was also provided to help caseworkers use their time more efficiently. In addition, expanded community resources such as public health nurses, family counseling, and therapeutic day care are provided. Funds are provided for training and

support services to families providing foster care, to help assure that foster care families will continue to be available in the numbers needed.

2. **New service delivery models** - Funds are provided to implement SHB 586 which requires pilot projects in three areas of the state. These projects will be located in Kent, Spokane and Chehalis. In each of these locations, a full continuum of services will be available to children, and a risk assessment model will be used to prioritize child abuse and neglect cases. Those cases determined to have a low risk of reoccurrence of abuse will be referred to community resources.

3. **Expanding prevention efforts** - Funds are provided to develop and establish a coordinated child abuse and neglect primary prevention education and training program as required by SSB 5252. Training will be provided to both school-age and preschool children through the schools, day care facilities, and Head Start as well as other preschool programs. In addition, training will be developed for teachers, parents, day care providers and others.

Other Children Services Legislation

A wide variety of legislation was adopted affecting child protective services, the crime of child abuse, minors and substance abuse, child support and parenting, and other issues relating to children. The **Final Legislative Report** for the 1987 Regular and Special Sessions provides detailed descriptions of all adopted legislation relating to children. Following is a listing of the major pieces:

Bill No.	Chap.	Short title
SHB 48	187	Parenting and child custody
HB 110	204	Alcohol sales to minors, penalties
SHB 413	430	Child support modifications
SHB 418	440	Child Support Schedule Commission
SHB 419	441	Expanding paternity establishment efforts
SHB 420	435	Establishing a child support registry
2SHB 480	170	Indian child welfare
SHB 506	351	Childrens Trust Fund, funding
E2SHB 586	503	Childrens protective services
2SHB 684	456	Criminal sentencing provisions
HB 734	396	Erotic material, access by minors
HB 753	224	Criminal mistreatment/penalties
2SHB 813	473	Governor's Commission on Children
HB 1204	131	Multiple sexual offenses, sentencing
HB 1228	458	Substance abuse, dealers, penalties
E2SSB 5063	486	Child abuse info., disclosure

SSB 5089	187	to employers Establishing crime of homicide by abuse
E2SSB 5252	489	Child abuse primary prevention training
SSB 5254	101	Liquor sales to minors, penalties
ESB 5546	324	Assault, children under 12, unborn
E2SSB 5659	524	Child prot. services statute revisions
ESSB 6013	329	Establishing child care resource coord.

Up to this point, the policy problems and solutions in the welfare and childrens' services areas have been described in summary form to show how the various initiatives support the guiding policy directions chosen by the Legislature. The subsequent paragraphs will take some of the initiatives previously mentioned and provide more detail specific to the social problem the initiative is intended to address.

Medically Needy Income Level

The eligibility threshold for participation in the Medicaid program is defined as the Medically Needy Income Level (MNIL). The MNIL is defined as a percentage of the Aid to Families with Dependent Children (AFDC) grant level. Under federal law, the MNIL can be set no lower than 100%, or higher than 133 1/3 percent of the AFDC grant level. During the 1985-87 biennium, the MNIL in Washington was set at varying amounts between 100% and 133 1/3% of the AFDC grant level. Funds were provided in the 1987-89 biennial budget to expand the MNIL level to the maximum of 133 1/3 percent for all family sizes.

Estimates provided by the Department of Social and Health Services (DSHS) indicate that 65,574 additional persons will be covered by this expansion. Of these, 57,232 are families and children.

Family Size	AFDC Monthly Grant Level	1985-87 MNIL as a % of AFDC Grant	1987-89 MNIL as a % of AFDC Grant
1	\$314	116.2%	133.3%
2	\$397	133.0%	133.3%
3	\$492	112.4%	133.3%
4	\$578	100.0%	133.3%
5	\$666	100.0%	133.3%
6	\$756	100.0%	133.3%
7	\$873	100.0%	133.3%
8	\$966	100.0%	133.3%
9	\$1,061	100.0%	133.3%
10 or more	\$1,153	100.0%	133.3%

The characteristics of these families with children are very consistent with the characteristics of the population to be served by the Washington Basic Health Plan:

- * Over 70% are uninsured
- * 90% have some income
- * Over 50% have a current or recent connection with the work force.

The 1987-89 biennial budget appropriates \$8,338,000 general fund-state and \$9,823,000 general fund-federal to raise the Medically Needy Income Level to the maximum allowed by the Federal Government. The expansion will be phased in over the 1987-89 biennium and will reach the maximum 133 1/3 percent for all family sizes by June 30, 1989.

Adult Dental Care

In 1981 dental care for adult Medicaid recipients was eliminated. The 1987-89 biennial budget restores dental care for adults who qualify for the Categorically Needy or Medically Needy medical programs or meet the federal definition of a refugee. The Department of Social and Health Services estimates that the average monthly number of persons eligible for adult dental care in Fiscal Year 88 is 346,979. In Fiscal Year 89, the number is expected to grow to 367,979. The budget provides \$13,864,000 general fund-state and \$16,927,000 general fund-federal to provide dental care to eligible adults. Dental services will be available beginning January 1, 1988.

Basic Health Plan

During the 1986 Legislative Session, ESHB 2021 was enacted, establishing the Washington Health Care Project Commission. The Commission's charge was to address the issue of persons without health insurance in Washington state. The recommendations of the Commission formed the basis for 2SHB 477, which was enacted during the 1987 Legislative Session.

The Commission found that 720,000 persons under the age of 65 in Washington do not have health insurance. The uninsured were found to be largely young, white, and employed.

To address the needs of this group, the Washington Basic Health Plan was established. The plan may, after July 1, 1988, enroll up to 30,000 individuals eligible for subsidies who: (1) are all under the age of 65; (2) are residents of an area served by the plan; (3) have gross family income not exceeding 200 percent of the federal poverty level; (4) choose to obtain basic health care coverage from a particular managed health care system participating in the plan; and (5) remain current in payment of premiums. The plan will be offered in sites in at least five congressional districts.

The 1987-89 biennial budget provides a \$19,100,000 general fund-state appropriation for the operation of the Basic Health Plan. This will allow the Plan to serve up to 30,000 persons in fiscal year 1989.

Prenatal Care

A number of vital statistics regarding perinatal care have shown disturbing trends in recent years. Statewide vital statistics indicate that the number of women appearing for delivery with

one or no prenatal visits has increased from 625 in 1979 to 1,022 in 1984. The infant mortality rate is five times higher for this population than the statewide total. In 1985, there were 3,700 low birthweight babies born (weighing less than 5.5 pounds). Low birthweight is the leading cause of infant mortality as well as the major contributing factor for health and development problems during childhood and adulthood. Women with one or no prenatal visits have three times the low birthweight rate of the total population.

To address these concerns, the Legislature provided funds to expand the existing prenatal care program and created a new prenatal care program eligible for federal financial participation. Hopefully, through expanded awareness and utilization of services, participating women will give birth to healthier children and avoid the need for future government supported social services.

State Funded Prenatal Care

Funds were provided in the 1987-89 biennial budget to expand the existing prenatal program. The base funding of \$4,000,000 was enhanced by an additional \$1,500,000. This will allow the program to provide care to more low income high risk pregnant women. Program eligibility is set at 200% of the poverty level.

SOBRA Prenatal Care

During Fall, 1986, Congress included prenatal care as a service eligible for Medicaid reimbursement if a state elects to include it in the state's Medicaid program. Dubbed the "SOBRA option" (sixth Omnibus Reconciliation Act), this program may serve pregnant women and their children under age 5 with income equal to or less than 90% of the poverty level. The 1987-89 biennial budget provides \$8,338,000 in state funds and \$9,823,000 in federal funds for this service. The program approved by the 1987 Legislature covers children under age two.

Comments:

3. Sufficient funds are provided to add approximately 45 child protective services and child welfare services staff, 24 clerical staff, and 6 attorneys, as well as productivity equipment for caseworkers, such as dictaphone machines.

4. Approximately 22 staff are provided to improve federal Title IV foster care recoveries. These staff will assure that federal foster care funds are utilized to the maximum extent possible for eligible children. An additional \$5 million in federal funds is assumed.

5. Includes \$2.16 million for approximately 45 public health nurses; \$1.0 million to expand therapeutic day care to 200 additional children; and \$.4 million for expanded community services such as family reconciliation, home-based, or other contracted community services.

6. Increases the number of Indian reservations with which DSHS will contract for child protection and child welfare services.

7. Provides for long term treatment of child victims of sexual abuse.

8. Training and support services for parents accepting foster children.

9. Approximates a 40% rate increase for private foster care agencies.

10. Vendor increases of 2% on September 1, 1987 and 4% on September 1, 1988, are provided for all vendors. In addition, low wage earner increases to \$4.76/hour on September 1, 1987 and \$5.15/hour on September 1, 1988 are provided for employees in seasonal and therapeutic day care programs, group homes, and domestic violence shelters.

11. Implements 2SSB 5252, establishing a primary prevention training program for preschool and school age children, teachers, parents and daycare providers.

12. Implements 2SSB 6013, establishing a child care coordinator.

13. Funding for pilot childrens' services projects in Kent, Spokane and Chehalis, to be established in accordance with SHB 586.

Provisoos:

Section 203(2). Requires a report to the Legislature by January 15, 1988, on the uses and effectiveness of the enhancements funded in Section 203.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next three pages for foster care, day care and child protective services.

**Operating Budgets
Children & Family Services
Foster Care**

122

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)	
						Total	GFS
84	20.4	17.0	5,076	4,021	3,353	4,021	3,353
85	21.7	19.3	5,194	4,184	3,723	4,039	3,594
86	24.0	22.5	5,072	4,732	4,436	4,439	4,162
87	29.0	24.7	5,183	5,595	4,766	5,118	4,359
88	28.8	23.4	5,262	5,473	4,447	4,784	3,887
89	29.9	24.2	5,286	5,656	4,578	4,715	3,816

*Units: Number of Children Served

Although the foster care caseload is relatively constant, alternative services such as therapeutic day care, in-home services, and intensive family counseling have grown steadily. The units reflected here do not include children served in these alternative programs.

Group home rates were also increased in FY86 and FY87.

Source: LEAP

Operating Budgets Children & Family Services Day Care

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)	
						Total	GFS
84	6.0	4.2	4,937	1,215	851	1,215	851
85	10.0	4.6	6,145	1,627	749	1,571	723
86	11.1	7.7	6,254	1,775	1,231	1,665	1,155
87	13.6	8.6	6,713	2,026	1,281	1,853	1,172
88	15.6	10.6	7,062	2,209	1,501	1,931	1,312
89	17.7	12.7	7,321	2,418	1,735	2,015	1,446

*Units: Children Served

Caseload increases reflect more low income, employed parents needing day care, and greater use of therapeutic day care as an alternative to foster care.

Higher unit costs reflect vendor rate increases, more hours of care per child, and an increasing use of therapeutic day care for abused and neglected children.

**Operating Budgets
Children & Family Services
Child Protective Services**

124

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)	
						Total	GFS
84	8.4	3.4	2,332	3,602	1,458	3,602	1,458
85	8.9	4.9	2,490	3,574	1,968	3,450	1,900
86	11.0	6.6	2,431	4,525	2,715	4,245	2,547
87	14.1	9.8	2,548	5,534	3,846	5,062	3,518
88	18.5	14.2	2,799	6,610	5,073	5,777	4,434
89	18.8	14.5	2,835	6,631	5,115	5,528	4,264

*Units: Case Openings

Continued growth is projected in the number of Child Protective Services case openings due to increased public awareness and reporting.

Higher costs per case reflect both an increasing ratio of workers to caseload and increases in contracted services such as public health nurses.

Comments:

2. Reduce Governor's recommended number of private group home beds by 20 to eliminate under-utilization.
4. Provides funds to support special programming for 16 mentally ill juveniles at Echo Glen School.
5. Vendor rate increases of 2% effective September 1, 1987 and 4% effective September 1, 1988.
6. Low wage earner salary increases of \$4.76/hr on September 1, 1987 and \$5.15 on September 1, 1988 are provided for private group home employees.
7. The juvenile offender population is forecast to decline. One cottage at Echo Glen School will be closed as will four private group home beds.

Provisoes

Section 204 (2)(b). Requires the Department to develop a ten year plan for the Green Hill School to house level 1 and 2 juvenile offenders.

The plan shall include both capital and operating outlays. Due date for the plan is January 15, 1988.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Comments:

2. Coordinated plant maintenance at Medical Lake complex shall be funded from within existing appropriations.

5. Assume an average daily population of 25 less than projected based on current biennium experience.

6. Two percent of participating counties administrative funds are set aside to help fund the ITA Case Management Pilot Project (2SSB 5074).

8. Enhance adult community mental health funding to help serve more clients.

9. Funds outpatient treatment for a minimum of 325 additional children through the community mental health system.

10. Vendor rate increases of 2% effective September 1, 1987 and 4% effective September 1, 1988.

11. Low wage earner salary increases of \$4.76/hr on September 1, 1987 and \$5.15 on September 1, 1988 are provided for community mental health centers and congregate care facility employees.

13. Provides additional funding to support full cost of ITA Case Management Pilot project (2SSB 5074).

14. Provides 9.5 annual FTEs and operating funds to utilize all 48 beds in new cottages at the Child Study and Treatment Center.

16. Provides FTEs and operating funds for two additional cottages at the Program offering Rehabilitation, Training and Adult Living (PORTAL) on the grounds of Northern State Hospital.

Provisoes:

Section 205 (1)(b). Identifies funds for Kitsap Mental Health Services Residential Treatment Alternatives Project. The daily reimbursement rate may not exceed \$200/day and no referrals of Kitsap County residents may be made to Western State Hospital. Reimbursement to Kitsap County hospitals is lidded at \$250/day per client. Funds are provided to start a case management program to provide a wider continuum of services and to reduce recidivism.

Section 205 (1)(c). Identifies funds for a state-wide pilot demonstration project as authorized in 2SSB 5074. The purpose of the project is to test alternative, less restrictive methods of handling involuntarily committed people. Reduced recidivism resulting in lessened pressure on state and local facilities or the ability to serve more people is desired. The Department is to develop a plan that implements and evaluates the project. The plan is due September 1, 1987. The project will run from January 1, 1988 to June 30, 1989.

Section 205 (1)(d). A \$1.0 million GFS enhancement is provided for county involuntary Treatment Act administration. This covers approximately 36% of an identified shortfall.

Section 205 (1)(e). Requires the Mental Health Division to work with counties and others to develop a fair and equitable formula for distributing Involuntary Treatment Act funding to counties. The proposed formula is to be presented to Senate and House Ways and Means Committees by November 15, 1987. Implementation may take effect no later than January 1, 1988. No county allocation may be less than the prior year and counties must continue to provide local funding at prior year levels.

Section 205 (2)(a). The Department is required to prepare a transition plan for moving clients served in the Program for Adaptive Living (PALS) at Western State Hospital into community residential placements beginning July 1, 1988. The intent of the Legislature is to provide community residential placements in local noninstitutional settings.

Section 205 (2)(b). \$.3 million GFS is provided for equipment and operating costs of two additional cottages on the grounds of Northern State Hospital. Of this amount, \$44,000 may be used to contract with local community mental health centers to provide services to clients who have exited the PORTAL program who reside locally.

Section 205 (2)(c). The Legislative Budget Committee is charged with evaluating the PORTAL program regarding its treatment outcomes and effectiveness.

Governor's Vetoes:

Section 205 (2)(a) PALS Transition Plan. The Governor agrees with the Legislature's concern and indicates no community residential programs should be established on the grounds of state mental hospitals without legislative consultation and Office of Financial Management approval.

Comments:

2. Funds are provided for an additional 4 annual FTEs to provide case management services to clients in the Community Alternative Program (CAP).

10. Provides funds to contract for 24 new group home beds.

11. Provides additional funds to raise sheltered workshop vendor rates/wage supplements.

Provisoes:

Section 206(1)(b) \$2,185,000 GF-S and \$385,000 GF-F are provided to increase rates for employment services for developmentally disabled adults to stabilize the financial situation faced by contractors providing direct services to eligible persons. None of the funds provided in this subsection may be deducted by counties for administrative services. (See item #11 above.)

Section 206(1)(e) \$1,169,000 is provided to contract with the Good Shepard Home for 24 group home beds in King County. One half of the clients served will come from community placements and one half will come from institutional placements. (See item #10 above.)

Section 206(1)(f) Funds are provided for vendor rate increases of 2% on 9/1/87 and 4% on 9/1/88 for vendors who provide direct services to eligible clients.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Operating Budgets Developmental Disabilities Residential Programs

89	31.9	17.6	1,722	18,526	10,221	15,442	8,520

***Units:** Clients Served

Legislation was passed in the 1986 session that increased the number of community group home placements by 58 clients. Forty-three of those clients were to come from Rainier School with the remainder coming from elsewhere.

The 1987 Legislature provided funds to operate 24 more group home beds in King County during the 1987-89 biennium.

89	97.8	49.7	1,815	53,884	27,383	44,918	22,826

*Units: Average Daily Population

The reduction in population results from legislation passed in the 1985 legislative session transferring the Schools for the Deaf and Blind from DSHS to themselves, as individual operating entities.

In addition, the 1986 Legislature required the closure of a 43 resident living unit at the Rainier School in Buckley.

Comments:

2. Eight additional staff will provide additional on-site nursing home inspections and respond to complaints.
4. Reimbursement to nursing homes for providing free laundry services for nursing home patients.
5. Grant increases of 2% effective September 1, 1987, and 4% effective September 1, 1988, are provided for adult residential care clients.
6. Vendor rate increases of 2% effective September 1, 1987 and 4% effective September 1, 1988, are provided for adult residential care, contracted chore services, adult day health and Senior Citizens Services Act programs.
7. In addition to vendor increases, low wage earner salary increases to \$4.76/hr on September 1, 1987 and \$5.15/hr on September 1, 1988, are provided for contracted chore service workers. Wages are increased to \$4.76/hr beginning January 1, 1988 and \$5.15/hr beginning January 1, 1989, for nursing home employees. Monthly rates for attendant care workers in the chore and Community Options (COPES) programs are increased to levels equivalent to \$4.76/hr for full time employment beginning September 1, 1987, and \$5.15/hr beginning September 1, 1988 (see veto explanation.)

Provisoes:

Section 207(1) Requires that an integrated system of long term care services be provided in the least restrictive and most cost-effective manner appropriate for individual clients.

Section 207(3) Identifies the Legislature's provision of salary increases of \$4.76/hour effective September 1, 1987 and \$5.15/hour on September 1, 1988 to chore service workers and nursing home workers.

Section 207(4) Requires nursing home rate inflation adjustments of 3.7% beginning July 1, 1987, and 3.6% beginning July 1, 1988.

Section 207(8) Requires an initial allotment for the Senior Citizens Services Act (SCSA) of \$14,766,000, and requires 7% of SCSA funds to be used for volunteer chore services.

Governor's Vetoes:

Section 207(3) Was vetoed due to revised estimates of costs related to providing salary increases to attendant care workers in the chore services program. The Governor indicated his intent to provide attendant care workers with a salary increase equivalent to the percentage increase to be given to contracted chore service employees. Under the Governor's plan, maximum monthly rates for attendant care workers will increase from \$555/month to \$690/month beginning September 1, 1987, and to about \$750/month beginning September 1, 1988. This subsection also included language requiring nursing homes to increase employee salaries as indicated in Comment 7. Although the legal mandate to nursing homes is removed by this veto, it is expected that the intended salary increases will be provided on schedule through good faith negotiations, contracting between DSHS and the various nursing homes, or by legislative action to address the Governor's veto.

Workload Assumptions/History:

See following pages.

**Operating Budgets
Long Term Care Program
Adult Residential (CCF & Adult Family Homes)**

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/Unit*	GF-S/Unit*	Constant \$/Unit* (FY 84 IPD=1)

89	53.4	33.2	13,803	3,869	2,405	3,225	2,005

*Units: Number of Cases

Copes (community options program) provides federally matched in-home or community-based care for nursing home eligible clients. Copes began in FY85.

Salary increases for chore workers cause higher FY88 and FY89 unit costs.

Special note: Not shown here is the action taken in the August 1987 Special Legislative Session which increased the appropriation by \$4.5 million (\$3.0 GF-S) to serve an additional 450 clients per month above the original 1987-89 budgeted workload levels.

Total		510,845	466,882	0	977,727	465,361	442,371	0	907,732

Comments:

2. Opportunities program is expanded to focus services toward very young parents and those with teenagers, as well as continuing current service levels.

5. \$24.6 million is transferred to the Community Social Services program to establish the Alcohol and Drug Addiction Treatment and Support Program under SHB 646. In addition, the general assistance grant program is reduced by \$5.3 million due to reduced service demand estimated to result from implementation of SHB 646.

7. Vendor rate increases of 2% effective September 1, 1987, and 4% effective September 1, 1988 are provided.

8. Caseload reduction is due to increased movement of general assistance clients to the Supplemental Security Income program which results from implementation of SHB 665 establishing a pilot Supplemental Security Income referral program.

Provisoes:

Section 208(2) Requires continuation of the Aid to Families with Dependent Children-Employable program.

Section 208(3) Continues existing requirements that DSHS use clear medical criteria in determining eligibility for the General Assistance-Unemployable program, that opinions of health care professionals be considered, and that terminations of eligibility based on clear showings of improvement.

Section 208(5) Identifies the amount of income assistance grants which are designated for energy costs.

Section 208(6) Requires that persons who are unemployable due to alcohol or substance abuse be referred to the program established by SHB 646.

Governor's Vetoes:

None.

Comments:

2. Federal Anti-Drug Abuse funds which will provide treatment to youth and young adults.
3. Provides vendor rate increases of 2% effective September 1, 1987, and 4% effective September 1, 1988.
4. SHB 646 eliminates general assistance eligibility (GA-U) for drug and alcohol clients & creates new program. Overall savings \$9.6 Million. (The Governor's request provides funding for this program in the Division of Income Assistance.)
5. Base funding for drug and alcohol treatment in small counties is raised from \$33,900 to \$40,000 per year.

Provisoes

- Section 209 (4)** Acquires shelter services under the Alcohol and Drug Treatment Act to be provided as an entitlement.
- Section 209 (5)** Requires a report to the Legislature by January 5, 1988, on implementation of the Alcohol and Drug Addiction Treatment and Shelter Act.

Governor's Vetoes:

Section 209 (4) Requires shelter services to be provided under SHB 646 as an entitlement. This subsection was vetoed on the basis that SHB 646 limits drug and alcohol treatment services on the basis of funds available, and that the demand for shelter services in relation could exceed funded levels.

Workload Assumptions/History:

Comments:

2. The reduction in hospital inflation assumes that a revised hospital reimbursement system which becomes effective 1/1/88 will hold inflation increases to 3% in FY88 and 3% in FY89.

5. The Governor submitted a revised estimate of the 1987-89 medical assistance caseload on 3/12/87. The Legislative Budget did not incorporate the Governors' revised estimate.

4. Additional funds to cover medical care for the increase in the Aid to Families with Dependent Children (AFDC) cases expected to result from a proposed 3% annual increase in the AFDC grant standard were not provided because the higher grant standard was not approved by the Legislature.

7. Restores adult dental services under Title XIX Medical Assistance program. Adult dental costs were based on DSHS estimates of 2/3/87.

Provisoes:

Section 210(1) Adult dental program costs are based on the DSHS estimate of 2/3/87. The program will be implemented January 1, 1988. Adult dental services will be available for persons who qualify for the Categorically Needy and Medically Needy medical programs administered by DSHS.

Section 210(2) The Medically Needy Income Level (MNIL) expansion is based on the DSHS estimate of 4/13/87. However, full state funding was not provided in the final budget. The Legislature assumes that DSHS will phase in the MNIL expansion and reach the maximum level allowed by the Federal Government by 6/30/89.

Section 210(3) Establishes a program for pregnant women and children up to age two whose household income does not exceed 90 percent of the federal poverty level. Any funds not used for this purpose may be applied to the Medically Needy

Governor's Vetoes:

None.

89	46.9	21.6	45,782	1,024	472	854	393

*Units: Number of Persons Eligible

Medically needy caseload includes persons who meet all the non-financial criteria of the categorically needy program except their income is too high. The medically needy income level (MNIL) was expanded to the maximum level authorized by the federal Government. This results in a large increase in the number of eligible recipients. It is anticipated that new recipients will receive smaller benefit amounts. This is attributed to eligibility restrictions pertaining to allowable monthly income levels.

*Units: Number of Persons Eligible

As of October, 1985, expenditures were reduced due to an increase in the rateable reductions applied to reimbursement levels for Inpatient Hospital Care. The rateable reduction was increased from 12.7% to 38.0% thus reducing state reimbursement to hospitals providing services to eligible clients.

Comments:

2. Opportunities program is expanded to focus services toward very young parents and those long-term recipients with teenagers, as well as continuing current service levels.

3. An additional 169 full time equivalent staff are added due to higher income assistance caseloads. The average number of individuals and families receiving assistance is projected to increase by over 10,000 during the 1987-89 biennium.

5. An additional 9 staff are provided to assist general assistance clients in applying for and receiving supplemental security income benefits.

7. Administrative costs for provision of medical assistance to categorically needy pregnant women and children up to age two. Nine staff are provided.

8. Two additional staff are provided to assist nursing home clients in discharge planning.

10. Matching funds are provided for regional health planning councils.

Provisoes:

Section 214(5) Authorizes transfer of funds and staff related to the social services payments system.

Section 214(7) Requires a plan by January 15, 1988, detailing the manner in which services will be provided to clients in downtown Seattle.

Governor's Vetoes:

None.

Comments:

4. Reduce county jail bed funding due to lessened demand for state prison beds.
5. Close protective custody unit at Washington State Reformatory as a result of renovation and redistribution of inmates.
6. Reduced population pressure and the construction of new co-located housing units enable the closing of Rainier unit.
7. Minimum security inmates will remain at Clallam Bay longer to achieve operating economies.
8. Permits hiring of medical staff and full operation of newly completed inpatient floor at the Monroe Reformatory hospital.
10. Reflects funds necessary to operate the Sex Offender Treatment programs for offenders transferred from Western and Eastern State Hospitals.
11. Increases community corrections staff to address workload resulting from Sentencing Reform Act.
13. Supports Department policy to expand work release placements as an alternative to incarceration.

Provisoes:

Section 201 (1)(a). Specifies \$23,884,000 GFS for the operating and/or contracting of work release facilities. This was done to establish a benchmark to assess potential growth in community programs. This amount may be spent for state operated or privately contracted facilities.

Section 201 (1)(b). Identifies \$2,071,000 GFS for the office of the community services director in order to clearly distinguish program funds from administration funds.

Section 201 (1)(d). Specifies \$854,000 GFS for the implementation of the community based portion of the sex offender program. This is part of the program transferred from the Dept. of Social and Health Services. 2SHB 1251 is also referenced requiring the Department to conduct presentence investigation reports on all sex offenders.

Section 201 (2)(a). Specifies \$1,725,000 GFS for the implementation of the institutional portion of the Sex Offender Treatment program. This is the other component of the program transferred from the Dept. of Social and Health Services.

Section 201 (2)(c). Specifies \$2,071,000 GFS for the office of the division of prisons director in order to clearly distinguish program funds from administration funds.

Section 201 (3)(b). Establishes a maximum amount of \$1,258,000 that may be transferred to the Tort Claims Revolving Fund from the General Fund State. The Department is required to report tort claim activity to the Senate and House Ways and Means Committees January 1, 1988 and quarterly thereafter.

Section 201 (3)(c). Specifies \$1,000,000 GFS to be spent on contracting for drug and alcohol treatment services for inmates.

Governor's Vetoes:

Section 201 (1)(a). The Governor indicates that this proviso is restrictive and precludes the Department from using its own cost-effective resources. In addition, the language was interpreted to require the Department to contract the entire amount with non-profit corporations.

Section 201 (1)(d). The Governor's position was that 2SHB 1251 failed to pass the Legislature and this budget language became inconsistent with current law.

Section 201 (3)(c). This language changes current practice by precluding the use of state employees and instead requiring contracting with private providers only. In addition, it was felt that the Department's ability to provide drug and alcohol treatment in the most efficient manner was unnecessarily restricted.

Workload Assumptions/History:

Average Daily Prison Population

	FY 1986	FY 1987	FY 1988	FY 1989
YEAR END	6,477	6,266	6,668	6,791
AVERAGE ANNUAL	6,438	6,295	6,480	6,734

- Year End is the population on June 30 of each year.
- Average Annual is the sum of the month end population divided by twelve.

Comments:

1. Funding was provided for a state 12.5% match for federal disaster funds needed for the breach in the Spokane Upriver Dam, and flooding in Cowlitz County and other western Washington areas.

2. Funding for grants to nonprofit organizations for food banks, food distribution centers and emergency shelters is increased from \$3 million to \$3.6 million. Funding for administration of these grants is increased from \$100 thousand to \$200 thousand if the Department receives at least \$1 million in additional federal funding under U.S. House of Representatives Resolution 558.

3. The Legislature did not provide funding for the local government circuit rider program, an expansion of technical and managerial assistance to cities and counties.

4. The Legislature did not increase funding for downtown revitalization, an extension of the Main Street concept to larger and smaller towns.

5. All funding for the Public Works Trust Fund program, including this enhancement to cover the program's share of Department overhead and \$34 million within the current policy level was transferred to the capital budget. Funding for the 1987 cycle of Public Works Trust Fund loans was appropriated in SB 5022 and reappropriated in the capital budget.

6. State and federal funds for the Developmental Disabilities Planning Council are increased. The additional funds will be used to prepare a master plan coordinating several state programs that help people with developmental disabilities obtain training and jobs.

7. The Legislature increased funding for the Early Childhood Education and Assistance Program from \$5.8 million to \$12.1 million to serve 2,000 children, double the number served in 1985-87. The reduction from the level of funding proposed by the Governor is to be accomplished through lower per-child spending on administration and training.

8. Funding for contracts with the U.S. Geological Survey to monitor Mt. St. Helens seismic and geologic activity is reduced because construction of a tunnel at Spirit Lake and increased stability in the area have reduced the danger of sudden water- or mud-flows.

9 and 15. Grants to towns along the Canadian border to offset the increased cost of police and other public services associated with this location are retained. The Governor originally requested elimination of these grants in his budget proposal, but called for their retention in his budget addendum.

10. Heritage Council funding is substantially reduced. Its functions, primarily planning and coordination for the state historical societies, will be handled through cooperation among the societies themselves.

11. A general reduction of \$40 thousand is achieved through reduced funding for administrative expenses such as services, travel and equipment. In addition, the Legislature did not fund \$75 thousand for administrative costs associated with the 1985-87 merge of the Fire Marshall's Office, the Department of Emergency Management and the Office of Archaeology and Historic Preservation into the Department of Community Development.

12. Funds are provided for grants to public broadcast radio and television stations under the provisions of ESSB 5285.

13. Funds are provided for development and pilot demonstration of programs for teaching vocational skills in Lewis County.

14. Funding for the Building Code Council is increased. This increase, funded from a building permit surcharge, will enable the council to repay \$40 thousand of \$96 thousand outstanding on a loan from the general-fund and cover operating expenses. The Council adopts and periodically modifies uniform building, mechanical and fire codes and reviews local modifications to these codes, as required by laws enacted during the 1985 legislative session.

16. Funding is provided for a study of the potential for a state-wide video telecommunications network. The department is required to submit a report recommending a plan for using video telecommunications in state government and assessing the potential for a state-wide television network broadcasting programs on state government. The study may include a pilot project funded in part by contributions from the cable industry.

17. The Legislature funded matching grants to three non-profit organizations or local government agencies for local reemployment centers. One reemployment center must be in King County; one in a southwest Washington county and one in an eastern Washington standard metropolitan statistical area. In both the latter two areas, the unemployment rate must have exceeded the state rate by 20% during the calendar year preceding the month in which the grant is made. The centers shall provide direct and referral services, supplementing those available at job centers run by the Employment Security Department. Services provided at centers may include job search assistance, medical services, substance abuse, marital, and financial and credit counseling and any other assistance deemed appropriate to aid the unemployed in obtaining work.

18. The Legislature provided funds to establish an employee ownership program under SHB 430. This program is to include technical assistance to cooperatives, education on employee-ownership and self-management and development and maintenance of a listing of firms and individuals with expertise in employee-ownership.

19. Funding is provided to implement child abuse and neglect prevention training for preschool age children participating in the federal head start program or the early childhood education and assistance program under E2SSB 5252. Parent, teacher and child education are all permitted.

20. Funding is provided for an independent study of the economic impacts of sport and commercial fishing.

21. Funding is provided for technical assistance to Okanogan County for preparation of plans and permits needed to develop winter sports facilities in the area.

22. Funding from oil overcharge money allocated to the state is provided to weatherize low-income homes and to encourage utilities, landlords and others to increase their commitment to low-income weatherization. This weatherization program is aimed at increasing energy efficiency of low-income homes in the state.

23. In ESHB 373, funding is given to study the potential for using rural telecommunications infrastructure for office jobs in rural areas.

The Department's current services level is nearly \$17 million above what was spent during the 1985-1987 biennium. Less than \$3 million of this increase is general fund state. The major components of this change are increases to account for full-biennium funding of the early childhood education and assistance and public works programs, both of which operated only during FY 1987, and substantial decreases in federal grants. The Legislature added \$306 thousand to current services level for audit costs increase erroneously deleted.

Provisoes

Section 217 (3) The Department is required to provide Early Childhood Education and Assistance Program services to at least 2000 children during the biennium.

Section 217 (4) The Department must assess the need for and availability of affordable housing around the state. A preliminary study, with recommendations for legislative action, must be submitted to the House Housing and the Senate Commerce and Labor committees by the end of calendar year 1987. A final report is required by the end of 1988.

Section 217 (7) The Department is required to review the needs of low-income migrant and seasonal workers. The Legislature encourages the Department to give special attention to the needs of this group.

Section 217 (14) An additional building code fee is imposed, bringing the total fee up from \$1.50 to \$3.50. This increase will increase the Building Code Council Account balance by \$160,000.

Governor's Vetoes:

None.

Total		4,042	0	0	4,042	4,042	0	0	4,042

Comments:

1. Increased workload attributable to changes in sentencing laws from indeterminate to determinate.
- 2., 3., 4., 6. Additional staffing and data processing resources to review all remaining indeterminate cases for sentencing consistency with new determinate sentencing laws.
5. Increases fees paid to attorneys representing indigent parolees from \$25 per hour to \$40 per hour. There is a six hour representation limit.
7. Reflects workload increases associated with litigation resulting from transition to new sentencing law.

Provisoes:

Section 224 (1). Specifies \$166,000 GFS for private attorney fee increases.

Section 224 (2). Specifies \$727,000 GFS for addressing inmate litigation resulting from the change in the sentencing laws.

Section 224 (3). Places one-half of the \$727,000 enhancement in reserve pending legislative release. Release of these funds is contingent upon the Board achieving completion of one-half of identified workload. The stringent workload requirement results from the Legislature's intent to have the Board terminate June 30, 1989. Any remaining functions will transfer at that time to the Department of Corrections or the Judiciary.

Governor's Vetoes:

None.

Comments:

- Provides funding to continue provision of occupational demand and supply data.
- Requires the development of current industry employment estimates.
- Claimant placement program is continued through funding contained in SHB 656, which appropriates \$6,350,000, for a total appropriation of \$296,501,000.
- Requires development of local labor market and economic information packages for distressed counties.
- Provides funding to develop data on employment in the agriculture, fishing and forestry industries.
- Evaluation funds for a reemployment bonus demonstration project, if federal or private funds become available for that project.

Provisoes:

Section 226(1) Requires the Department to develop a plan for continuation of full services at its office on Second Avenue in Seattle.

Section 226(3) Requires the Department to prepare a detailed annual state economic report, incorporating information on seasonality, cyclicity, etc.; plant closures, layoffs, etc.; dislocated workers.

Section 226(4) Establishes a pilot counter-cyclical employment program to provide employment for longer term unemployed forest products workers. Pilot program is to be conducted at two locations in the state; employees are to receive compensation of at least \$8/hour with benefits the same as state employees. No one is to be employed for more than 6 months; the program is triggered after 2 quarters of below-average employment in the forest production industry.

Governor's Vetoes:

None.

None.

Governor's Vetoes:

None.

The Natural Resources functional area of Washington State government primarily includes agencies whose functions are related to managing, enhancing or protecting the state's environmental resources. The major natural resources agencies are: the Departments of Agriculture, Ecology, Fisheries, Natural Resources, and Wildlife, the State Energy Office and the Parks and Recreation Commission.

This functional area historically has included economic development agencies as well. These agencies are: the Department of Trade and Economic Development, the Washington Centennial Commission, the Economic Development Board and the State Convention and Trade Center.

Many natural resource agencies rely on both general fund - state and dedicated fund revenues to support their operations. For instance, 25% of the Department of Natural Resources budget is supported from general fund- state revenues while the remaining 75% is provided by income from fees charged for agency services. In this case, these fees are actually a percentage of the proceeds from timber sales made on state owned trust lands.

The major policy and budget items in the natural resource area are described in the following section entitled "Policy Initiatives" which covers: the Timber, Fish, Wildlife agreement, hazardous waste regulation and cleanup, the Puget Sound Water Quality Plan and statewide water quality activities, the creation of the Department of Wildlife, Natural Resource Conservation, and a mix of economic development items.

Policy Initiatives

The Timber, Fish, Wildlife Agreement

In 1974, the Forest Practices Act was passed by the Legislature in order to prevent environmental degradation from timber activity in the state. Regulations developed to enforce the act have been in dispute ever since. The Department of Natural Resources drafted new regulations in 1986. Concern over the draft regulations prompted representatives from the forest industry, Indian tribes, environmental organizations and the Departments of Natural Resources, Fisheries, Game and Ecology, to begin a dialogue which resulted in a new approach to regulating forest practices now known as the Timber, Fish, Wildlife agreement or TFW. The TFW agreement proposes a case by case or "adaptive management" policy toward regulating forest practices, including rule changes that incorporate regional differences. In agreeing to these rules, industry will not log certain environmentally sensitive or significant areas, for the most part along streams and rivers known as riparian zones, and in turn the environmental organizations will not dispute logging in less environmentally sensitive areas. Interdisciplinary teams will work to recommend measures to mitigate potential problems. Basin planning will also take place to allow coordinated timber harvesting by landowners while at the same time protecting habitat and riparian areas.

The Legislature adopted the policies proposed by TFW in two ways: 1) the passage of SSB 5845 which amended current law regarding abandoned logging roads and other time lines in the permit process and 2) providing \$4.5 million above current policy for the following agencies.

Department	GF-State Appropriation
Ecology	\$ 553,000
Fisheries	587,000
Game/Wildlife	711,000
Natural Resources	2,649,000
Total	\$4,500,000

The additional funding provides staff needed to do the case by case analysis of forest practice permits and to do the follow up monitoring and evaluation called for in TFW.

Hazardous Wastes Regulation and Cleanup
E2SHB 434, the Toxics Control Act, was a major piece of legislation introduced during the 1987 session to address the issue of hazardous waste regulation and cleanup. The Toxics Control Act did not pass, thus leaving the financing of hazardous waste activities an unresolved issue. E2SHB 434 would have granted the Department of Ecology clear authority to require the cleanup of hazardous waste sites and the funding necessary to do so when a responsible party was unable or unwilling to clean up a site themselves. E2SHB 434 would have provided Ecology approximately \$21.0 million from imposing a tax on the first sale of hazardous substances in the state. Sufficient funds would have been available to help clean up approximately 158 state and federal hazardous waste sites. E2SHB 434 also provided a funding

mechanism for Ecology's hazardous waste regulatory program and for financial assistance to local governments in preventing and cleaning up hazardous waste sites.

The financing of the Governor's water quality initiatives and the Department of Ecology's budget was also an integral part of the hazardous waste debate since the Governors budget was predicated on the policy that general fund-state money should not be spent cleaning up industrial and municipal waste problems. Thus, a reduction of \$9.2 million to the Hazardous Waste Cleanup program within the Ecology's current policy budget was proposed to offset the cost of implementing the Puget Sound water quality plan and other enhancements. The passage of E2SHB 434 would have replaced the \$9.2 million reduction and provided additional funds from new dedicated revenues. Even though E2SHB 434 did not pass, the Legislature agreed with the policy not to spend state general fund money on cleaning up past industrial practices and therefore a reduction to the hazardous waste clean up program was also assumed in the final Legislative budget.

Puget Sound Water Quality Plan and Statewide Water Quality Activities

In 1985 the Legislature created the Puget Sound Water Quality Authority and directed the Authority to develop a management plan to maintain and improve the quality of Puget Sound waters. The plan was adopted by the Authority in December 1986 and presented to the Legislature during the 1987 session. The plan identifies problems, recommends specific actions to remedy the problems and specifies target dates for completion of each action. To carry out the action plan requires a substantial increase in staff and financial resources at the state and local levels. Fifteen state agencies are

required to do specific tasks related to the major elements of the plan:

- Nonpoint source pollution
- Shellfish protection
- Municipal and industrial dischargers
- Contaminated sediments and dredging
- Stormwater and combined sewer overflows
- Laboratory support
- Wetland protection
- Oil spill response planning
- Research
- Education and public involvement
- Household hazardous waste
- Legal and personnel support

Because of the timing of the final adoption of the plan, the Governor was unable to include specific budget recommendations regarding plan implementation in his budget document submitted in December. However, he did set aside \$10.0 million for water quality purposes. Later, through the Office of Financial Management, an informal recommendation was made on the \$10.0 million set aside. The following represents the outcome of the \$10.0 million in state general fund dollars.

	Governor's Proposal	Final Legislative Budget
Ecology		
PSWQ Plan	7,780	5,655
Water Quality Non-Plan	4,298	3,673
Other Enhancements	2,491	2,702
Hazardous Wastes Cleanup	(9,200)	(7,700)
Ecology Total	5,369	4,330
Other Water Quality Agencies	5,846	2,996
Total Water Quality Only	17,564	12,324
Net Impact to GF-S	10,855	7,326

As indicated, the final Legislative budget allocated \$12.3 million for water quality purposes providing for implementation of the plan and for enhancements to statewide water quality activities.

Agency	Amount
Ecology	\$ 9,328,000
Social & Health services	1,869,000
Parks & Recreation Commission	416,000
Dept of Natural Resources	268,000
Conservation Commission	182,000
Fisheries	106,000
Game	59,000
Agriculture	48,000
Attorney General	31,000
Environmental Hearings Board	17,000
Total	\$12,324,000

While the Legislature endorsed the plan and related statewide activities by providing funding, one major recommendation of the Authority regarding funding was not successful:

The Water Quality Discharge Permit Fee bill (HB 447) did not pass. HB 447 would have provided an additional \$5.0 million in new revenues dedicated to water quality permit and compliance activities within Ecology. Under the bill, industrial dischargers would pay fees based on the actual cost of the issuing a permit, monitoring and evaluating permit compliance, and of related laboratory and administrative support.

The Department Of Wildlife

The 1987 Legislature made major changes to the Department of Game in 2SHB 758. The name of the Department was changed to the Department of Wildlife, the Governor was given authority to appoint the director of the Department, and the Department received an \$8,000,000 general fund-state appropriation. The Wildlife Commission (formerly the Game Commission) continues to establish the time, place, manner and species of animals for which hunting and fishing is permitted.

The Legislature regards all residents of the state as beneficiaries of the state's wildlife resource. In appropriating general fund monies to the Department for the first time, it was the intent of the Legislature to recognize this widespread benefit and to provide a broader funding base than that previously provided by hunting and fishing license sales alone. In authorizing the Governor to appoint the director of the Department, it was the Legislature's intent that the Governor have direct managerial control over departments receiving general fund dollars.

The Department and Commission must prepare a series of reports. The first, due November 1, 1987, will contain comprehensive and detailed analyses and management plans pertaining to agency programs, license fees, organization, land management practices and landowner relations. The second, due October 1, 1988, will address the state's wildlife and wildlife recreation needs, innovative management methods and alternative methods of increasing agency revenues. In the third, due June 30, 1989, the Commission must prepare an annual report to the public and periodically review the Department's basic goals and objectives.

In addition to the above reports, the Governor must submit a comprehensive spending plan to the Legislature by December 31, 1987. If this plan is rejected by the 1988 Legislature, \$4.5 million of the \$8 million general fund appropriation will revert to the general fund. The Department is authorized to spend the remaining \$3.5 million without regard to the comprehensive plan.

Natural Resource Conservation

With the passage of SSB 5911, the Legislature continues a policy of preserving lands for present and future generations. Such preservation is desired so that unique natural or ecologic resources will remain available for public purposes and are not converted to incompatible or ecologically irreversible uses.

Specifically the Department of Natural Resources (DNR) is authorized to purchase and manage certain properties as natural resource conservation areas. \$7.9 million is appropriated to obtain property for and establish the following conservation areas: Mount Si in King County, Cypress Island in Skagit County, Woodard Bay in Thurston County and Dishman Hills in Spokane County.

\$4.0 million is appropriated for purchasing property or acquiring less than fee interest in property for natural areas preserves. Natural area preserves are areas identified by DNR and the Natural heritage advisory council as having critical habitat and special plant and animal species and are a part of the Natural Heritage plan. Of the \$4.0 million, approximately \$2.0 million will be used for wetland acquisition and the remaining \$2.0 million for upland sites. The ap-

propriation for natural area preserves must be matched by a 25% private contribution.

The acquisitions authorized in SSB 5911 are supported by a real estate excise tax surcharge of 0.06 percent. This surcharge is effective for two years expiring July 1, 1989. For other tax aspects contained in SSB 5911 see the summary of revenue legislation.

Economic Development

History

After three biennia of substantial growth in state funding for economic development effort, the 1987 legislative session saw fewer new efforts in this area and emphasis on consolidation and enhancement of existing programs.

Traditional economic development programs focus on assistance to businesses and to communities. Between the 1981-1983 and the 1985-1987 biennia, state spending on these sorts of economic development programs increased more than five fold, from \$13.8 million to \$74 million. In recent years, efforts to improve the quality of the state's workforce, such as spending on vocational education and skills have come to be counted among economic development efforts. State and local spending for vocational and skill training was over \$415 million in the 1981-1983 biennium and grew to over \$539 million by 1985-1987, a increase of \$124 million, or about 30%. Economic development spending increased at a slower rate between the 1985-87 and 1987-89 biennia.

Major Budget Enhancements

Washington Technology Center

Funding for the Washington Technology Center, a basic and applied research institute located at the University of Washington that has a special focus on transfer of technology from the University to business applications, is increased from \$3.6 million in 1985-87 to \$7 million 1987-89. As in the past, state funding must be matched dollar for dollar by money from other sources. In addition to this operating increase, \$14.9 million is provided in the capital budget for construction of a new building to house the Center.

Super-Colliding Superconductor

A total of \$400 thousand (including \$175 thousand in the 1985-1987 supplemental budget) is provided for geo-technical study, and review of layout, infrastructure and environmental requirements for locating the super-colliding superconductor in Washington state. If warranted, funds may also be used for work on a proposal to the U.S. Department of Energy that the super-collider be located in the state.

Business Assistance Center

Funding is provided for the Business Assistance Center created in SSB 5530. The Center is directed to serve as the state's lead agency for small business assistance and to provide a comprehensive business assistance referral service. The Center will house one staff person from each of the four state agencies with greatest involvement in business assistance, the Department of Trade and Economic Development's business ombudsman, hotline, and current business assistance programs, as well as new staff. The Center is directed to develop a system for

reporting the work and results of the state's business assistance programs and must submit reports to the Legislature each year outlining the accomplishments of these programs. \$600 thousand is provided for the Center in the Department of Trade and Economic Development budget.

Counter-cyclical Employment Program

An employment program for unemployed timber workers during downturns in the forest products industry is established in the Employment Security Department. The Department of Natural Resources is directed to create jobs that provide economic benefit to state trust lands and pay at least eight dollars an hour, for a total of 200 people, 50 each for a period of six months, under the provisions of this program.

Other Enhancements

Labor Market and Economic Information

The Employment Security Department is directed to produce labor market information packages for the state's economically distressed counties and an annual state economic report. \$470 thousand is provided to the Department for enhanced labor market and economic information.

Reemployment Centers

The Legislature funds grants of \$120 thousand each to three non-profit organizations or local government agencies for local Reemployment Centers to provide the unemployed with referral and assistance in overcoming obstacles to finding work.

Employee Cooperatives

A program of employee ownership is established in the Department of Community Development to provide education on employee ownership and technical assistance to worker cooperatives. \$100 thousand is provided for this purpose.

Master License System

Funding is provided in the Department of Licensing for expansion of the Master License System. This system will eventually incorporate nearly all state business licenses.

Uniform Business Identifier

\$3.5 million is provided for a joint effort among state agencies to develop a common business identification number. This project is aimed at improving state interaction with businesses regarding taxes, unemployment insurance, licensing and other forms of regulation and assistance.

Centennial Celebration

A total of \$9.9 million is provided for state and local centennial celebrations and the development of lasting memorials of the anniversary. These events and projects are expected to both draw out of state visitors and foster community spirit.

Economic Development Board

\$666 thousand is provided for the Economic Development Board to devise a long-term economic development plan for the state by 1989.

Development Loan Fund

In the capital budget, \$3 million is provided in additional capitalization for the Development Loan Fund. The Development Loan Fund, through transfer of federal funds, assists in business loans.

Gray's Harbor Dredging

\$10 million, only \$5 million of which may be spent this biennium, is provided in the capital budget for Gray's Harbor dredging, dike construction, bridge relocation and related expenses. This effort will facilitate the development of Gray's Harbor into a major west coast port. This funding is contingent on \$50 million being provided from non-state sources.

Public Works Trust Fund

In the capital budget, \$34 million is provided for loans for local public works projects. Specific projects will be approved during the 1988 and 1989 sessions of the Legislature.

Community Economic Revitalization Board

In the capital budget, \$10.8 million is provided in additional capitalization for the loan and grant fund administered by the Community Economic Revitalization Board (CERB). The CERB Public Facilities program is funded by bonds authorized by the Legislature. It is used for loans and grants to local governments for public works projects aimed at promoting economic development.

Agricultural Trade Center

\$6.5 million is provided for an agricultural trade complex at Yakima.

The Washington State Convention And Trade Center

The Legislature enacted SSB 5901, a measure that increases the appropriation and borrowing authority of the Washington State Convention and Trade Center, mandates a surcharge on the special hotel/motel tax to cover operating deficits, and calls for a study of future mechanisms for finance and governance of the Center.

Appropriation and Borrowing Authority

The bill increases the Convention Center's appropriation by \$64 million. Of this amount, approximately \$5 million is for actual cost increases. The remaining \$59 million represents the private portion of the project. The bill gives the Convention Center the right to borrow from the treasury pending receipt of these funds, with the approval of the Director of Financial Management in consultation with the chairs of the Ways and Means Committees. Of the \$59 million, \$30 million is being paid, in thirteen monthly installments begun in March 1987, by a company that insured the Convention Center against its original private partner's bankruptcy. The remaining \$29 million is to come from an anticipated agreement with a new private partner.

Hotel/Motel Taxes

Beginning October 1, 1993, SSB 5901 institutes a surcharge on the special hotel/motel tax. This additional tax is to be set at the rate needed to meet the Center's operating deficit, with a ceiling of 2% in Seattle and .8% in the rest of King County.

Two other special hotel/motel tax are available. One may be used only by big cities, other than Seattle, in populous counties, for convention and trade facilities. Another is available generally to counties for stadium, convention and art facilities. The bill forbids use of revenues from these taxes to buy land or buy, build or operate facilities used by a professional sports franchise.

Study of Convention Center Future

A Joint Committee on the Convention Center is created. It is to comprise two members of both caucuses of both houses, including the Ways and Means Committee chairs or their designees. This group is directed to study alternative methods for the future finance and governance of the Convention Center, and report to the Legislature by December 1987. The Committee is to work in consultation with the Convention Center board of directors and a representative of the hotel/motel industry,

Comments:

The Legislature provided a \$26,000 increase for current level expenses from "other" funds assuming Oregon will contribute an amount equal to the current policy general fund-state figure.

1. Congress created the Columbia River Gorge National Scenic Area in late 1986. To comply with the Congressional Act, the Legislature provided additional staff and financial resources to the Commission and ratified the Interstate compact contained in 2SHB 426.

3. Several tasks are required to implement the scenic area management plan including: an inventory of resources, an economic opportunity study, a recreation assessment and developing a means to apply land use designations.

4. The Legislature reduced the Governor's recommendation for staff increases assuming not all staff would be on board July 1, 1987.

Governor's Vetoes:

None.

Department of Ecology
(\$000)

Comments:

1. The 1987 supplemental budget allowed Ecology to begin implementing the Puget Sound Water Quality Management plan, and to continue the state's litigation concerning the U.S. Department of Energy high level nuclear waste site designation.

2. The Puget Sound Water Quality Authority's action plan for Puget Sound requires Ecology to take additional measures to protect and enhance the Sound's water quality, sediment quality, fish and shellfish, and wetlands. The plan calls for additional resources to do a better job of enforcing current water quality laws as well as requiring new activities. While additional resources are earmarked to be spent on these activities, the increase has been offset by a reduction in the hazardous waste cleanup and the Washington Conservation Corps programs. While approximately \$5.7 million is indicated above for this purpose, depending on the reduction to hazardous waste and other programs, an amount greater to the \$5.7 million may be spent to implement the plan.

3. In order for the Department to have a consistent and comprehensive statewide water quality program additional resources were required in areas not covered in the Puget Sound Water Quality Management plan.

4. Other enhancements were provided for: administrative services \$776,000, continuing the Padilla Bay Interpretive Center \$302,000, solid waste management \$715,000, shorelands enforcement \$62,000, water resources investigations \$268,000, the air monitoring network \$357,000, asbestos enforcement \$83,000, the geologic information system \$129,000, and agricultural hazardous waste \$95,000. These enhancements were offset by reductions in the Low Level Nuclear Waste program (\$300,000) the shorelands program (\$150,000) and the Washington Conservation Corps (\$700,000).

5. A substantial reduction was made to the current Hazardous Waste Cleanup program based on the policy that the state general fund should not bear the cost of cleaning up past industrial problems or practices. The Legislature in agreeing to this reduction did not specify an exact amount. However, as indicated in Section 303 (12), the Legislature requires that state sites be properly phased down and that sufficient funds be available for emergency purposes. While the final budget assumed a \$7.7 million reduction, the reduction could be more if the constraint regarding the phase down of state site is met. It is also understood that sufficient funds remain within the current policy level after the reduction to continue an appropriate level of hazardous waste cleanup staff to encourage responsible parties to cleanup sites and to match federal funds on approximately 28 sites which qualify for federal "superfund" cleanup money.

Reducing the general funds-state support to the Hazardous Waste Cleanup program partially offset the cost of implementing the water quality initiatives and the other budget enhancements. The Legislature intended to address these priority programs with the least impact to the state general fund. While this approach saved state general fund money for the 1987-89 biennium, the cost will bow wave into the 1989-91 biennium as the additional staff, hired in place of the hazardous waste cleanup contracts, is continued for a full biennium. Ecology will be hiring approximately 150 new people over the course of the 1987-89 biennium primarily associated with implementing the Puget Sound Water Quality plan. The cost of the maintaining the increased staff in 1989-91 is estimated to require \$3.8 million more than in 1987-89.

8. A substantial increase in federal funding is anticipated for Ecology in 1987-89. The federal "superfund" program, which funds the cleanup of hazardous waste sites that meet the national priority list criteria, will increase by approximately \$13.4 million providing a total of \$32.0 million. Approximately 28 sites qualify. As these sites get beyond the research, investigation, and planning stages and approach the actual cleanup stage, increased federal spending will occur. Again, sufficient state dollars are available to match this increase in federal money even with the reduction to the state hazardous waste cleanup program mentioned in item 5 above.

The High Level Nuclear Waste program will increase by \$18.5 million for a total of \$23.1 million. Since the federal Department of Energy selected Hanford as one of three possible sites in the nation for a high level nuclear waste repository, a substantial increase in funding is provided by the Department of Energy to expand the site evaluation process. Intensive study will take place over the next few years so, by 1992, a site selection can be made based upon the most accurate scientific data available.

Provisoes:

Section 303 (1). Requires Ecology to implement the Nisqually River Task force recommendations and provides that \$150,000 within current policy be used for that purpose.

Section 303 (2). Provides that \$75,000 within current policy be spent on a wetlands restoration project to be matched by a minimum of \$150,000 in federal, local or private money.

Section 303 (3). Requires \$985,000 be allocated to local air pollution control authorities.

Section 303 (4). Provides \$366,000 from the Woodstove Public Education Account contingent upon the passage of SHB 16 which did pass.

Section 303 (5). Requires that at least \$9,250,000 be spent solely on water quality enhancements both in the Puget Sound area, according to the Puget Sound Water Quality Management plan, and statewide. This corresponds to items 2. and 3. above.

Section 303 (6). Provides \$715,000 be used solely for solid waste management activities including the update of the state's solid waste management plan, increasing inspections and enforcement actions and providing technical assistance.

Section 303 (7). Provides \$553,000 to be used solely to implement the Timber, Fish, Wildlife agreement.

Section 303 (8). If HB 434 (the Toxics Control Act) was enacted, the hazardous waste control and elimination account appropriation would have lapsed since the account was repealed in the bill.

Section 303 (9). Requires Ecology to contract with the University of Washington college of ocean and fisheries sciences to develop a methodology for determining natural resource damages caused by hazardous spills. Requires Ecology to contract with the Department of Community Development to design a model spill contingency plan for future use by local entities. This subsection funds activities consistent with 2SSB5986. (See item 7 above.)

Section 303 (10). Requires Ecology to adopt regulations for waste disposal permit violations based upon the severity and frequency of violation.

Section 303 (11). Provides \$302,000 to be used solely for operating the Padilla Bay interpretive center.

Section 303 (12). To implement the reduction to the Hazardous Waste cleanup program, Ecology is required to phase down cleanup at state hazardous waste sites currently underway and to maintain sufficient funds for emergency purposes. (See item 5 above.)

Section 303 (13). Provides \$288,000 to be used solely to implement ESSB 5570 regarding the regulation of incinerator ash. (See item 9 above.)

Governor's Vetoes:

Comments:

2. The Department proposed approximately \$1.6 million in enhancements above current policy for a variety of items: \$355,000 for tribal shellfish management, \$200,000 for Queets river salmon hatchery operations, \$194,000 for Deschutes fish food, \$60,000 for subtidal shellfish enhancement, \$240,000 for marine habitat, \$300,000 for adding regional habitat managers, \$65,000 for accounting & budget system costs, \$76,000 for administrative support, \$50,000 for increased fisheries conference costs, \$48,000 to shift project staff to permanent positions, and \$45,000 to increase the Puget Sound resource survey.

3. At the same time the Department proposed an equal amount of reductions to current policy to fund the enhancements including the following decreases: (\$122,000) razor clam hatchery closure, (\$202,000) in the artificial reef program, (\$26,000) in the Columbia code tag program, (\$180,000) to salmon statistical analysis, (\$206,000) to salmon

4.-12. In addition, the Legislature provided funds for items 4-12 as listed above.

Provisoes:

Section 310 (1). Provides \$106,000 to implement the Puget Sound Water Quality Plan. (See item 5 above.)

Section 310 (2). Provides \$40,000 for reintroducing an early Coho salmon run to the Tilton River and Winston Creek. (See item 6 above.)

Section (3). Provides \$587,000 to implement the Timber, Fish, Wildlife agreement. (See item 4 above.)

Section (4). Provides \$150,000 to hire 2 additional field officers for Hoodcanal shellfish enforcement. (See item 7 above.)

Section (5). Provides \$150,000 of the Aquatic Lands Enhancement account to be used for an Environmental Impact Statement on the salmon net pen guidelines issued jointly by the Departments of Agriculture, Ecology, Fisheries Natural Resources. (See item 11 above.)

Section (6). Requires a report to the Legislature on the Departments' watershed plan identifying the benefits associated with the Queets hatchery and Indian Tribal agreements.

Section (7). Up to \$194,000 may be expended for additional feed for the Deschutes hatchery.

Section (8). Requires a study be conducted to determine what is affecting the survival of salmon in the Grays Harbor area. Provides \$400,000 for the study and specifies that the study be done in conjunction with the University of Washington and the Grays Harbor Community College. (See item 8 above.)

Section (9). Provides \$150,000 to be used solely to maintain and operate the Toutle river fish collection facility. (See item 10 above.)

Governor's Vetoes:

None.

Comments:

1. Additional revenue from the Federal Dingell-Johnson program.
2. Covers 4 areas: database management, urban biology, raptor research, and general non-game education.
3. Equipment purchase to meet the Department's obligations under Wells Wildlife Area mitigation plan.
4. Reduction of State Game Fund to match lower anticipated revenue from hunting and fishing licenses in 87-89.
5. Reduction of Aquatic Lands Enhancement Account to match anticipated revenue.
6. 2SHB 758 created the Department of Wildlife and provided an \$8,000,000 General Fund-State appropriation.

Provisoes:

Section 311 (1) (a and b). The Department in carrying out its responsibilities under the Timber, Fish, and Wildlife agreement is required to: 1) research and monitor differences between eastern and western Washington as they pertain to implementation of the TFW agreement, and 2) study the Department's cooperative road closure program and landowner education program in eastern Washington.

Section 311 (2). \$711,000 of the \$8,000,000 General Fund-State appropriation in 2SHB 758 is for implementation of the Timber, Fish, and Wildlife agreement. \$59,000 of the GF-S appropriation in 2SHB 758 is for carrying out the Puget Sound water quality plan.

Governor's Vetoes:

None.

rounding		0	0	0	1	7	8
Total		36,492	93,488	129,980	36,170	95,930	132,100

Comments:

The current policy level is below the 1985-87 biennium general fund - state expenditures because of the unusually high fire suppression costs during the 1985 fire season (FY86).

The supplemental budget request to control the spread of the spruce budworm will not be spent since the adjacent landowners decided not to participate in the control program thereby negating its effectiveness.

7. A significant enhancement of \$2,649,000 is provided for implementing the Timber Fish Wildlife agreement (TFW). TFW is described in more detail as policy initiative in the introductory portion of the Natural Resource section.

8. Funds are provided to carry out tasks mandated in the Puget Sound Water Quality plan primarily related to shellfish and wetland protection.

10. Additional funds are provided for dredge monitoring activities consistent with the passage of ESSB 5501. Funds are provided from the general fund until such time as sufficient revenue is available from fees authorized in the bill.

11. The fire protection program is receiving a general fund state increase over the 1985-87 biennium of \$1,157,000 or 13%. While the state general fund contribution has increased, federal funds have declined by 69% and dedicated funds from landowner assessments declined by 18%. The decline in dedicated funds is a result of DNR spending the previously available surplus and is now limited to income from the assessments. Therefore the total provided for the protection program in 1987-89 is \$1,140,000 less than the 1985-87 biennium. Because of the decline in these other funds DNR had requested an even greater increase in state general fund support as their top priority request. The Governor, however, did not recommend any additional state general funds above what is normally provided for salary increases and inflation. Concern was expressed by DNR that the Governor's recommendation was insufficient to continue the current level of protection because additional funds were needed to offset the loss of other funds. At the same time concern was expressed by landowners not to increase assessments and not to increase state general fund support until DNR had implemented the recommendations of the Forest Fire Advisory Board. The Board's recommendations, adopted in November of 1986, were designed to make the fire protection program more cost effective. Of the \$1,157,000 general fund increase \$557,000 was a part of current policy adjustments for salaries & inflation and \$600,000 was provided specifically by the Legislature as a one time measure to transition toward implementing the recommendations of the Forest Fire Advisory board.

Provisoes:

Section 312 (1). To assure sufficient funds are available for fire suppression, \$2.7 million is provided solely for suppression purposes.

Section 312 (2). Provides \$2,649,000 to implement the Timber, Fish, Wildlife agreement. Requires the Department to reorganize existing staff (approximately 50 FTE's) so that the staff positions are dedicated to regulating forest practices and are not responsible for timber sales or other state land management activities. (See item 7 above.)

Section 312 (3). Provides \$270,000 to be used solely to implement the Department's tasks outlined in the Puget Sound Water Quality plan. (See item 8 above.)

Section 312 (4). To benefit the trustlands while at the same time providing jobs to unemployed timber workers the Department is required to employ 200 people (50 people working six months at a time) doing work to enhance state lands such as thinning, slash removal, reforestation, trail maintenance, irrigation repair and building shellfish beds. The Employment Security Department, in another section of the budget, is directed to coordinate the employment of these workers and determine who meets the eligibility requirements. Workers are to be paid at least \$8.00 per hour. (See item 12 above.)

Section 312 (5). Provides \$193,000 in GF-S and \$106,000 in dedicated funds for dredge monitoring activities. (See item 10 above.)

Section 312 (6). Provides \$100,000 for relocation of DNR staff currently in the John A. Cherberg building. The Cherberg building is being remodeled to accommodate the Senate's needs. Further, the Department is required to vacate the building by February 29, 1988. (See item 9 above.)

Governor's Vetoes:

None.

Department of Agriculture **(\$000)**

Total		23,694	1,603	25,297	23,650	1,603	25,253

Comments:

1. Funding is provided in the supplemental budget for geo-technical study, and review of layout, infrastructure and environmental requirements for locating the super-colliding superconductor in Washington state. If warranted, funds may also be used for preliminary work on a proposal.
2. The Legislature did not fund additional staff for a program aimed at increasing domestic trade.
3. The Legislature did not fund a third staff person for the film and video program. This division works to increase use of Washington state as a location for movie and video production.
4. The Legislature did not provide special funding for tourism promotion tied to the centennial celebration. This deletion does not affect the tourism program's mission, part of which is to publicize events in the state, such as the centennial celebration, that will attract visitors.
5. The Legislature did not fund a proposed increase in activities to support Sister State relationships.
6. The level of grant to the Washington Technology Center is increased. The Center does basic and applied research, with a focus on transfer of technology from the university to business applications.
- 7 and 10. Funding is provided for a Business Assistance Center. The Center will house one staff person each from Department of Community Development, Employment Security Department, Small Business Development Center (SBDC) and the Department, in addition to the Department's business ombudsman, hotline, and current business assistance staff and new staff. The Center will aid businesses using a case tracking and follow-up method and also refer them to other agencies and organizations.
- 8 and 13. Funding for the Small Business Export Finance Center is increased. The Export Finance Center assists businesses that want to sell abroad but lack the technical expertise to do so.
9. The Economic Development Board is funded in a separate budget, so its 1985-1987 appropriation is deleted from the Department's budget base.
11. Funding from within current agency resources is provided for contracts with Washington State University SBDC programs. SBDCs give management assistance to businesses at several locations around the state.
12. Funding is provided for preparation, if warranted, of a proposal that the federal government's proposed supercolliding superconductor be located in Washington state.

Provisoes:

Section 314 (1). The Business Assistance Center shall develop a system for reporting the work and results of the state's business assistance programs. The Center must submit reports to the Legislature each year, detailing the number of jobs created, investment generated, assistance provided and other measures of the activity of state business assistance programs.

Section 314 (2) State funds for SBDC programs in Lewis county shall not be reduced from the level provided in the 1985-1987 biennium.

Section 314 (3) At least \$100 thousand of the \$625 thousand provided for the Small Business Export Finance Center shall be used by the Department and the Export Finance Center to develop, working with users and other suppliers of trade services, a coordinated outreach program for trade information and export finance services.

Section 314 (4) The Department shall analyze and publish reports on market trends and investment opportunities in at least eight key Washington industries.

Section 314 (5) State money provided for the Washington Technology Center and the Center for International Trade in Forest Products must be matched by equal amounts, including in-kind contributions, from non-state sources.

Governor's Vetoes:

None.

Economic Development Board

	Total	666	100	766	666	100	766

Comments:

The Board was not in operation until midway through the 1985-1987 biennium and received \$180 thousand in the Governor's emergency funds in order to operate through the end of FY 1987. The \$666 thousand budget reflects full biennial funding of the Board at a current services level. The increase in costs from the 1985-1987 level to the current services level includes additional staff, contracts for special economic development studies, travel to meetings and hearings for Board members and staff, supplies and equipment and accounting and attorney general services. These costs are not expected to continue beyond the 1987-1989 biennium, as the Board is scheduled to expire at the end of FY 1989.

Governor's Vetoes:

None.

Comments:

1. In the supplemental budget, funds available from the sale of centennial license plates, begun in January 1987, are provided for distribution to counties and for grants for projects of statewide significance.
2. Staff and goods and services are provided to support centennial celebrations around the state.
3. Funds, primarily revenue generated from centennial license plate sales, are provided for distribution to counties and for grants for projects of statewide significance.
4. Money for Magnificent Voyagers exhibit is included in the budget for the Washington State Historical Society, host to the exhibit.
5. Money for inserts in Washington State maps directing visitors to centennial celebrations is included in the Department of Transportation budget.
6. Funding is provided for two additional administrative staff for the Commission.

Provisoes:

Section 316 (1) State agencies may develop programs or activities related to the centennial at the request of the Centennial Commission. Agencies that do this cannot charge the Commisison for overhead or administrative expenses.

Section 316 (2) The Commission may contract with Pacific Celebration '89 for promotion of the state's future trade and economic ties with nations of the Pacific Rim. The contracts must require 1) that every state dollar be matched by \$1.60 from non-state sources and 2) that net revenues from Pacific Celebration be maximized and be used to reimburse the general fund (for money spent on these contracts) according to a financial plan approved by the Commission.

Section 316 (3) It is the intent of the Legislature that this appropriation be the final state contribution to the funding of Centennial Commission projects. Additional funding for administrative expenses may be required for the final months of calendar year 1989.

Governor's Vetoes:

None.

Washington State Convention and Trade Center (\$000)

4. Other		0	277	277	0	277	277
	Total	0	9,320	9,320	0	9,320	9,320

Comments:

*1, 2, 3 & 4. There are substantial funding and staffing increases within this current policy budget, because the Convention Center is scheduled to begin operations in June, 1988. Among these are \$589 thousand and 6.7 full time equivalent (FTE) staff for increased marketing and operations in the months before the Convention Center opens, \$457 thousand for increased rent and insurance payments beginning when the Center opens, and \$3,112 million and 23.7 FTE staff for marketing and building maintenance and operations costs beginning when the Center opens.

Governor's Vetoes:

ESSB 5901 repeals the Convention Center operating appropriation, from the State Convention and Trade Center Account, and appropriates the same amount from the State Convention and Trade Center Operating Account, created in the bill. This change is to separate construction and operating expenses and makes it easier to differentiate between borrowing for bond repayment or other construction related costs and borrowing for operating costs. The Governor vetoed the Convention Center operating appropriation in the budget and the section in SSB 5901 that repealed the appropriation. Together, these vetoes just reinforce what had been done in the legislation.

Winter Recreation Commission **(\$000)**

Section 318

1985-87 Biennium		GF-State	Other	Total

1. ESSB 5081 reestablished the Commission		0	0	0	27	0	27
	Total	0	0	0	27	0	27

Comments:

In addition to declaring the state's folk song to be "Roll On Columbia Roll On", ESSB 5081 reestablished the Winter Recreation Commission in order to study and identify potential sites for new winter recreation development and facilitate land exchanges between the state and federal government for recreational purposes.

Governor's Vetoes:

None.

Nine agencies are included in the transportation portion of the general government functional area. Transportation agencies are: the Board of Pilotage Commissioners, the County Road Administration Board, the Washington State Patrol, the Traffic Safety Commission, the Transportation Commission, the Department of Transportation, the Urban Arterial Board and the Department of Licensing.

The majority of the transportation agencies' operating and capital expenses are supported by the gas tax and dedicated highway related funds. The discussion in this section refers only to the operating budget, the state general fund amounts, and the non-highway dedicated funds appropriated to the Department of Licensing and the Washington State Patrol.

The Legislative Transportation Committee is the legislative authority for the remaining transportation elements.

A major policy initiative in the transportation area is the funding of an automated fingerprint identification system in the Washington State Patrol budget.

Washington State Patrol

Automated Fingerprint Identification System

Acquisition of an automated fingerprint identification system (AFIS) began with the passage of ESSB 4710 during the 1986 legislative session. The State Patrol was directed to develop a plan for and implement an AFIS, and to report to the Legislature on the proposed system by January 1, 1987. \$25,000 was appropriated to the Patrol for the purpose of this work.

Following the Patrol's report on its vendor bid evaluation, which recommended the system produced by NEC Corporation, the 1987 Legislature approved the lease/purchase of an AFIS in SHB 1065. The system is to consist of a main computer located in State Patrol facilities in Olympia, two remote tenprint and latent input systems, and at least twelve remote terminals. One of the remote systems is to be located in eastern Washington and one in western Washington, provided that the local jurisdiction in western Washington pays 30 percent of the system's purchase cost. The Patrol will pay the purchase costs of the twelve remote terminals but the recipients of the terminals must pay all personnel, operating, installation and maintenance costs associated with the terminals.

\$5,451,000 was appropriated from the state general fund to establish and operate the AFIS. This appropriation is to be reduced by the amount of any grants from the Federal Bureau of Justice Assistance which are expected to be about \$849,000.

The lease/purchase option chosen for system acquisition will require additional payments over the next two biennia. Payments for principal and interest are estimated to be \$3,075,000 for 1989-91 and \$1,537,000 for 1991-93. Operating expenses are in addition to these costs.

Comments:

3. Operation costs for phase I of the Patrol Information Collection System.

4. Provides funds for equipment upgrade and training of users of the teletypewriter communications network (access). The General Fund - State appropriation is matched by local funds.

5. Provides additional funds for travel and equipment for the Executive Protection Unit.

7. Automated fingerprint identification system (AFIS). (See item 12.)

9. Background information on job applicants as relates to records of child and adult abuse.

10. Creates a separate unit for investigation of major crimes and maintains capabilities developed by the Green River Task Force.

11. Enhancements funded in the Transportation Budget, not in the appropriations act.

12. Provides funds for lease purchase of an Automated Fingerprint Identification System, including remote tenprint and latent input systems and remote terminals.

Provisoes:

Section 401 (1). The Legislature intends that crime labs are a higher priority than are narcotics task forces and are to be funded first even in the instance of a shortfall in anticipated federal moneys. At least \$471,000 of the General Fund - State appropriation is to be spent on crime labs. Federal narcotics enforcement grants of \$2,836,000 are anticipated during the biennium. Of this amount, \$1,424,000 is for crime labs. If the state does not receive the federal grant moneys, the Patrol is required to spend an additional \$471,000 GF-S on crime labs. If this additional \$471,000 is spent on crime labs, the expenditure for the narcotics section is not to exceed the expenditures for the narcotics section during the 1985-87 biennium.

Section 401 (2). \$431,000 GF-S is provided for implementation of 2SSB 5063. Fees charged by the Patrol for discrimination of records concerning job applicants record regarding child and adult abuse are to be placed in the state general fund.

Section 401 (3). \$1,000,000 GF-S is for establishing a major crimes investigation unit and for providing assistance to law enforcement entities throughout the state. The Patrol is to develop a computer data to store crime scene information for major crime investigations. The Chief of the State Patrol is to contract with the Green River Task Force to develop the expertise. A maximum of \$100,000 may be spent for the contract.

Governor's Vetoes:

Section 401 (1). Vetoes major crime unit.

Comments:

* The entire Department of Licensing 1985-1987 and current policy level budget is listed. However, only those enhancements that come from funds appropriated by the Ways and Means Committees of the Legislature are shown (i.e., General Fund and various professional fund enhancements are given, but those from the Motor Vehicle Fund, Highway Safety Fund and various other transportation funds are not).

1. Funding is provided for the general fund portion of new data processing costs associated with laws passed in the 1986 Legislative session.

2. No general fund money is provided for additional clerical staff in the vehicle/vessel licensing division.

3. No additional funding is given to the uniform commercial code division.

4 and 5. Funds are appropriated for increased investigations, testing of applicants, inspection of professional schools, improvements in automated licensing systems and other enhancements to the Business and Professional Licensing program. These enhancements are requested by professional boards and will be covered entirely by increased business and professional fees, including the portions listed as coming from the general fund.

6. \$750 thousand is provided for expansion of the Master License System. This system will eventually consolidate nearly all state business licenses, making the licensing process easier for new and expanding businesses.

7. In accord with results of a study conducted by DOL, funding of overhead costs is reallocated. The General Fund portion is decreased as other funds are increased.

8. Funding is provided to increase the level of scrutiny given debenture companies.

9. In 2SSB 5515, funding is provided for implementing new vessel dealer registration requirements and penalties. After the 1987-89 biennium, fees shall be set at the level needed to cover the cost of this program.

10. In HB 435, funding is provided to initiate an analytical review of proposed new or expanded business professions regulation.

Provisoes:

Section 402(1) Up to \$426 thousand of the Health Professions Account appropriation may be used to contract with the Board of Pharmacy for drug-related investigations regarding licensed health care professionals. This \$426 thousand was in the Governor's budget request for the Board of Pharmacy. The Legislature transferred it to DOL to provide greater management control.

Expansion of the Master License System is contingent on receipt of \$547.5 thousand in inter-agency transfers from agencies that have licenses incorporated into the Master License System during the biennium. In addition, \$202.5 thousand is reduced from the Governor's budget request for this expansion to cover DOL licenses incorporated into the Master License System. DOL doesn't yet know what licenses will be incorporated during the 1987-1989 biennium. The Office of Financial Management is given authority to decide how much money or in-kind contribution comes from what agencies.

Governor's Vetoes:

Funding for the second year increase in business and professional licensing staff and investigations was to be placed in reserve pending reappropriation by the Legislature during the 1988 session. DOL was required to submit a report explaining and justifying its methods for setting professional fees. However, the Governor vetoed this section; noting in his veto message that DOL and the Office of Financial Management would work with the Legislative budget committees to resolve issues related to business and professions fees.

** The Revenue Accrual Account is derived from fund balances remaining in the State's General Fund at the close of each biennium, and is dedicated to pension funding.

Policy Initiatives

Governor Gardner introduced to the Legislature a package of education improvements addressing the three main areas of financial stability of schools, readiness to learn, and quality classrooms. The Legislature enacted the majority of these new initiatives in HB 455, HB 456, and SB 5479, and provided approximately \$48.5 million to fund the Governor's proposed program enhancements. In addition, the Legislature appropriated funds to expand vocational education opportunities, both by establishing a new vocational center in Seattle, and by enhancing offerings at the five existing Vocational-Technical Institutes. To provide additional funds for local discretionary purposes, the Legislature appropriated \$49.5 million for block grants distributed to school districts on a per capita basis.

Financial Stability (School Levies)

A major element of the Governor's school finance package was a proposal to address the school levy issue. In 1977, the Legislature enacted a plan to limit school districts' maintenance and operations levies to a maximum of ten percent of state allocations. Although this goal was retained for many years, the phase-down to ten percent was never completed in many school districts due to its effect on district purchasing power and educational programs. As a result of 1985 legislation, all school districts received levy authority of at least eighteen percent. The phase-down was scheduled to begin again in 1989, however, with all districts limited to a ten percent levy by calendar year 1993.

HB 455 amended this statute and established for the long term a levy lid equivalent to twenty percent of both state and federal allocations. Districts which currently have higher levy percentages are "held harmless" at levy capacities up to thirty percent. However, if the state enhances school funding formulas, these enhancements will apply to reduce "grandfather" levy percentages down to twenty percent. There is no specified time-line for completion of this phase-down to twenty percent.

HB 455 also addressed differences in taxing power among school districts. Currently, the same property tax rate may raise quite different numbers of dollars per pupil in different districts. To assist those districts with small property tax bases, HB 455 established a new program of state matching funds for levy equalization, effective in calendar year 1989. When fully implemented, this program will enable all districts to raise the equivalent of a ten percent levy at the statewide average ten percent levy rate. The Legislature appropriated \$5 million in HB 455 for levy equalization for the first half of calendar year 1989, funding the equalization formula at approximately 23 percent. Full implementation in the 1989-91 biennium is projected to cost over \$80 million.

Readiness to Learn (Programs for younger children and "students-at-risk")

HB 455 also includes an increase in the staffing formula for enrollment in grades K-3. While the Governor proposed an increase to 55 certificated staff per thousand students in K-3, the Legislature enacted an increase to 52:1000 in 1987-88 and 53:1000 in 1988-89.

The Governor also proposed a major expansion of programs for students "at risk" of failure. These proposals were combined into HB 456, and included expansion of the state-funded

Early Childhood Education program, establishment of an adult literacy program for early childhood program parents, grants for drop-out prevention and retrieval, and a federally-funded substance abuse prevention program. The state appropriation for Early Childhood Education (funded through the Department of Community Development) will support a doubling of the current workload in that program from 1,000 to 2,000 children served, in addition to those served through the federally-funded Head Start program.

The Legislature also enacted a major restructuring of state-funded remediation programs. SB 5632 repealed the former Remediation Assistance statute and replaced it with the Learning Assistance Program. Both programs serve students who are below grade level in basic skills achievement. The major policy changes are that the funds no longer must be used only for tutoring in groups of five students or fewer, and that the program is expanded to serve grades K through 9. Formerly, the statute established a program for grades 2 through 6 only, although the Legislature also funded grades 7 through 9 in the 1985-87 biennium. Under the new statute, Learning Assistance funds may be used to support services within the student's regular classroom, or for consultant teachers or in-service training in addressing learning problems, as well as for traditional "pull-out" programs.

Building Quality Classrooms (Innovation, Teacher preparation, and Staffing requirements)

SB 5479 establishes a six year pilot program known as "Schools for the 21st Century". Twenty-one schools will be chosen to receive grants for developing innovative educational programs, and may apply for waivers from statutory and regulatory requirements in order to implement

these programs. SB 5479 also requires a masters degree for a continuing teaching certificate (initial certificates may under certain conditions be valid for up to seven years after beginning teaching). This requirement is effective for certificates earned after August 31, 1992.

The Legislature also took action to mandate that certain state basic education funds be spent in the classroom. In HB 455, the basic education formula of 50 certificated staff per thousand students is split into 46 instructional staff and 4 administrators, with additional instructional staff for grades K-3. Previously, this formula had been for allocation purposes only, with districts receiving their full allocation regardless of their actual staffing levels. Now, however, HB 455 requires school districts to have at least 46 basic education instructional staff per thousand students, beginning in the 1988-89 school year. "Instructional staff" are defined as non-supervisory certificated employees and may include counselors and librarians, for example. This provision simply establishes a minimum standard, and districts often exceed these staffing levels if they have special levy funds.

School Employee Compensation

HB 455 also made major changes in state policy on school employee compensation. For the first time, average instructional staff salaries are computed separately from administrative salaries in state allocation formulas. The bill establishes a plan to base instructional salary allocations on a statewide salary allocation schedule, established in the appropriations bill. While districts are not required to pay individual employees according to this schedule, the state controls both the

district's average instructional salary, and the minimum salaries these staff receive. HB 455 prohibits districts from increasing their average instructional salary above the level funded by the state, unless the increase is provided by a one-year supplemental contract for additional time, responsibilities, or incentives. Also, districts may not pay any certificated instructional employee less than the first step on the statewide salary schedule (in 1987-89, this is \$17,050 for the 1987-88 school year, and \$17,600 for the 1988-89 school year); and instructional employees with masters degrees must receive at least the schedule amount for an employee with a MA and zero years of experience (\$20,000 in 1987-88 and \$20,645 in 1988-89).

For the 1987-89 biennium, the Legislature appropriated funds to phase-in the salary allocation schedule, thus equalizing instructional salaries in low-paying districts up to the schedule level. Those districts which continue to be above the schedule level in each year will be granted a 2.1% increase in their average instructional salary in September 1987, and again in September 1988. As the schedule is phased in, there will be approximately 66 districts above the schedule in the 1987-88 school year, and approximately 30 districts above the schedule in 1988-89. The highest-paying district, Everett, will still be approximately 6 percent above the schedule level in 1988-89.

Because of the additional increases granted to low-paying districts, the average instructional salary increase funded statewide is approximately 2.75 percent in each year.

While mandating that certain state basic education funding be spent for instructional staff, HB 455 removes state salary controls for administrators and classified school employees. Funding for administrative salaries for 1987-89 was not based on actual salary levels but on

amounts necessary to hold districts harmless at 1986-87 state allocation levels for certificated salaries. To fund administrative salary increases for 1987-89, these administrative salary allocations were increased by 2.1% of the statewide average in September 1987 and again in September 1988.

Classified school employees received the same average increase as certificated employees, or approximately 2.7 percent each September. These increases are to be distributed by increasing each district's average classified salary by 2.7 percent of the statewide average.

Increases To Maintain Current Policy Level

For the 1987-89 biennium, an increase of approximately \$252.8 million was needed to maintain common school funding at the program level achieved in the 1986-87 school year. Most of this increase is attributable to growth in K-12 enrollment, which is projected to continue at slightly over one percent per year. The overall enrollment increase drives increases in both basic education and categorical programs. The legislative budget appropriations were based on the assumption that handicapped enrollments and pupil transportation workloads will grow proportionally to total K-12 enrollment.

Other costs of maintaining 1986-87 program levels include costs of extending mid-biennium salary and formula improvements over a full twenty-four month period. In September 1986, staffing allocations were increased to fifty-one certificated staff per thousand students in grades K-3. Also, the vocational staffing ratio for high school programs was increased from

one certificated staff per 18.3 full-time-equivalent students, to one per 17.5. The final improvement needing to be "carried forward" was the September 1986 salary increase for school employees, including the additional increases to implement a \$16,500 minimum teacher's salary.

In the program detail contained in these budget notes, there are some differences between the Governor's and the legislative figures for Current Policy Level. This is because, between the development of the Governor's budget in the fall of 1986 and the legislative budget in the spring of 1987, additional information became available for updating cost projections. The legislative budget reflects revised assumptions on categorical program workloads. Also, because of lower actual inflation in Fiscal Year 1987, the Legislature applied lower inflation adjustments to allocations for non-employee related costs (NERC).

School Construction Referendum

For both years of the 1985-87 biennium, eligible school construction projects exceeded the funding capacity of the Common School Construction Fund. By the end of the biennium, a backlog had developed which totalled approximately \$300 million in unfunded projects which already had both State Board of Education approval and local matching funds. This backlog continues to grow, as additional school districts pass local bond levies and apply for the state match.

By comparison, timber sales from school trust land, the primary revenue source for the Common School Construction Fund, are projected

to yield less than \$50 million per year in upcoming years. Trust revenues have fallen to approximately half the peak level reached during 1979-81, first as a result of defaults on timber contracts and more recently as a result of lower bids on new timber sales. At the same time, anticipated enrollment growth and aging facilities may increase demand for school construction monies. There is some concern that timber revenues will continue to fall short of meeting the growth in demand for school construction monies, creating larger and larger backlogs of projects.

The 1987 Legislature took two steps to supplement trust revenues for school construction. First, the Legislature authorized \$30 million in state general obligation bonds, the first general fund support for school construction since 1969. Second, the Legislature passed House Joint Resolution 4220, which submits a constitutional amendment to the voters to authorize an additional state property tax dedicated to school construction. This state property tax is exempted from the one percent constitutional limitation on regular property taxes, but may not exceed a rate of 35 cents per \$1000 assessed valuation or be levied for more than fifteen years.

If approved by the voters in November 1987, the additional property tax would be implemented for taxes due in calendar year 1988. The following portions of the additional property tax would be dedicated to the Permanent School Fund, an investment fund generating interest earnings for school construction: 10% of proceeds from 1988 through 1992, 40% from 1993 through 1997, and 90% from 1998 through 2002. The Permanent School Fund is a constitutional endowment which cannot be appropriated by the Legislature for other purposes. Remaining proceeds of the fifteen-year property tax would be available for distribu-

tion as state matching funds for school construction projects. Altogether, HJR 4220 both provides cash to alleviate the immediate backlog of projects, and establishes an endowment generating funds to supplement school trust revenues in the long term.

Total		4,031,636	0	0	4,031,636	3,805,863	0	55,100	3,860,963

Comments:

1. The Governor's request provided 55 certificated staff per 1000 students in grades K-3, but did not include additional allocations for non-employee-related costs (NERC). The Legislative budget provided 52 certificated staff/1000 in 1987-88 and 53/1000 in 1988-89, with NERC allocations.
2. See proviso: Subsection 503 (12)
3. Corrects errors in current funding attributable to inaccurate reporting of staff experience levels.
4. See proviso: Subsection 503 (11)
5. The Governor's proposed compensation increases included five additional contract days for certificated staff and an increase in health benefits, as well as costs of implementing a statewide salary schedule for teachers. (See table on page-10)

Provisoes:

Subsection 503 (2) establishes the state allocation formula for certificated staff. The base formula is separated into 46 instructional staff and 4 administrative staff per thousand FTE students (for a total of 50 certificated units per thousand). Grades K through 3 receive an enhanced allocation

of 48 instructional staff per thousand in 1987-88 and 49 per thousand in 1988-89. There are also additional allocations of both instructional and administrative staff for small districts and remote schools. Vocational education programs are funded at one certificated staff per 17.5 FTE students, and one per 16.67 in skills center programs.

Subsections 503 (3) through (6) establish the funding formula for classified staff, fringe benefits, and nonemployee-related costs. There are increases in NERC allocations proportional to the increases in instructional staff for grades K through 3.

Subsection 503 (7) allocates funds for costs of substitute teachers at a rate of \$275 per basic education classroom teacher per year.

Subsection 503 (8) provides a total of \$684,000 for payments to fire protection districts, \$2,234,000 for summer skills center programs, and \$272,000 for school district emergencies.

Subsection 503 (9) states that, pursuant to HB 455, increases in K-3 staff and NERC allocations from 1987-89 formula levels shall apply to reduce "grandfather" levy capacity in school districts down to twenty percent.

Subsection 503 (10) notes that, to adjust school district levy capacity to a "current year" basis pursuant to HB 455, the factor to apply to a district's base for levies collected in calendar year 1988 is 2.75 percent, and for levies collected in 1989 the adjustment is 3.52 percent.

Subsection 503 (12) provides an additional \$372,000 to enhance funding for remote and necessary schools on islands without scheduled public transportation. The larger districts which operate the remote schools must show that the additional allocation and funds generated by the remote school formula are used solely for programs serving students enrolled in the remote schools. SPI shall conduct a study of remote school funding and report to the Legislature by December 1, 1988.

Governor's Vetoes:

None:

Workload Assumptions/History:

See next page.

Operating Budgets Public Schools, General Apportionment

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)

89	1,974.4	1,946.4	717,406	2,752	2,713	2,314	2,281

*Units: Basic Education FTE Enrollment

Expenditures for FY84 and FY85 do not include contributions to the Teachers Retirement System. In 1986-87, K-3 ratios were increased to 51 certs/1000, and vocational staffing ratios were increased from one certificated staff per 18.3 FTE students to one per 1.75. For 1987-89, K-3 ratios are increased to 52:1000 in 1987-88 and 53:1000 in 1988-89. Budgeted increases in salary and benefit levels are lower than 1987-89 projected inflation rates.

	Total	0	0	0	0	49,500	0	0	49,500

Comments:

1. Provides a new program of grants to address the locally determined educational needs of each school district. Grants shall be distributed on a school year basis, with districts receiving the equivalent of \$67.50 per full-time-equivalent student for the biennium. There are minimum grants provided for small districts.
(See provisos)

Provisoes:

Subsection 506 (4) requires each school board to assess its district's needs, assign priority to addressing these needs, and to develop an evaluation methodology for the use of the block grants.

Subsection 506 (8) itemizes the various activities which may be funded using the block grants, including:

- (a) Innovative programs to increase the adult -pupil ratio without increasing the number of certificated staff;
- (b) Drop-out prevention and retrieval programs;
- (c) Early childhood development;
- (d) In-service training programs for staff development; and
- (f) Programs that develop and promote logical reasoning and improved analytical skills.

Subsection 506 (10) authorizes the block grants to be used for cooperative programs among small or rural districts.

Subsection 506 (11) requires SPI to report to the Legislature on the use and benefits of the block grant program by January 31, 1989.

Governor's Vetoes:

Removed the subsection requiring school boards to prepare a comprehensive two-year plan for use of the grant funding (subsection 506 (4) (c)).

Deleted subsection 506 (6) which stated that use of the block grant funds shall not be subject to collective bargaining.

Removed subsections 506 (7) and (9), relating to salary increases and stipends provided from block grant funds. These subsections are linked to salary control statutes which were repealed by HB 455 and replaced with new controls on instructional salaries.

2. Increases staffing at Children's Orthopedic Hospital and Medical Center to 4.66 FTE teachers.

Provisoes:

Subsection 507 (2) requires that SPI distribute funds according to school districts' actual handicapped enrollments and the staffing allocation model established in LEAP Document 9 (draft dated April 27, 1987).

Subsection 507 (3) itemizes \$411,000 of state funds for education of children at Children's Orthopedic Hospital and Medical Center. These funds are in lieu of money provided through other home/hospital education funding or the handicapped allocation formulas.

Subsection 507 (4) requires SPI to grant \$130,000, from state or federal appropriations, for the Early Childhood Home Instruction program (ECHI) for families of deaf infants.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Operating Budgets Public Schools, Handicapped

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)	
						Total	GFS
84	145.2	131.4					
85	171.9	155.5					
86	193.3	178.2	21,367	9,046	8,341	8,487	7,825
87	208.4	192.6	21,911	9,511	8,788	8,715	8,053

Comments:

1. The Superintendent of Public Instruction may allocate these additional funds to address variations of actual enrollment levels from the budget assumptions, or for other program needs, including increases in summer school programs. May be used to supplement the maximum per pupil funding rates provided by category of institution.

Provisoes:

Subsection 503 (2) establishes the following maximum funding amounts for the 1987-88 school year by category of institution (state funds only):

Handicapped institutions — \$4,128,000, distributed at a maximum average rate of \$10,294 per FTE pupil

Delinquent institutions — \$2,978,000, distributed at a maximum average rate of \$5,405 per FTE pupil

Delinquent group homes — \$370,000, distributed at a maximum average rate of \$3,492 per FTE pupil

Juvenile Parole Learning Centers — \$564,000, distributed at a maximum average rate of \$1,395 per FTE pupil

County Detention Centers — \$2,054,000, distributed at a maximum average rate of \$4,012 per FTE pupil

Subsection 508 (3) establishes the following maximum funding amounts for the 1988-89 school year by category of institution (state funds only):

Handicapped institutions — \$3,735,000, distributed at a maximum average rate of \$10,296 per FTE pupil

Delinquent institutions — \$2,894,000, distributed at a maximum average rate of \$5,410 per FTE pupil

Delinquent group homes — \$371,000, distributed at a maximum average rate of \$3,502 per FTE pupil

Juvenile Parole Learning Centers — \$560,000, distributed at a maximum average rate of \$1,387 per FTE pupil

County Detention Centers — \$2,059,000, distributed at a maximum average rate of \$4,022 per FTE pupil

NOTE: These rates do not include the additional funds provided for salary increases under section 505.

Governor's Vetoes:

None.

Total		49,681	0	0	49,681	49,681	0	0	49,681	

Comments:

The large increase over 1985-87 expenditures is attributable to the recent re-norming of the statewide basic skills tests. The new test shows more students scoring in the lowest quartile when compared with an up-to-date sample of students nationwide.

Provisoes:

Subsection 510 (2) establishes the allocation formula for distribution of funds to school districts, based upon the district's enrollment in grades K through 9, and the percentage of students scoring in the lowest national quartile on the statewide basic skills tests. Students identified as learning disabled and served through the handicapped education program are not counted in distributing Learning Assistance funding. The 1987-89 formula is based upon SSB 5632; although it differs from the formula used in the 1986-87 school year for the Remediation Assistance Program, both formulas would generate approximately the same number of enrollment units statewide.

For allocation purposes, the Superintendent of Public Instruction shall use the average of the district's fourth grade statewide test scores from the prior five years, and the average of the district's eighth grade statewide test scores since that test was established in 1984-85.

The proviso also establishes a per pupil funding rate of \$356 per year. **NOTE:** This rate does not include the additional funds provided for salary increases under section 505.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Total		32,734	4,413	0	37,147	13,434	4,000	0	17,434

Comments:

1. Provides grants to the twenty-five percent of the state's school districts which have the highest drop-out rates.
2. May be used only for grants to assist parents of children in Headstart, Early Childhood Education and Assistance, and state and federal remediation programs, to enroll in adult literacy programs. May be used for child care or transportation costs as well as instruction. Priority is for the use of existing adult basic education and literacy programs, rather than the establishment of new ones.
4. Funds innovative projects in 21 schools, including at least one small district. Districts may receive waivers of certain state requirements, and must provide at least ten inservice days per year for staff. Projects begin in 1988-89.
6. Funds selected projects to provide for additional training and cooperation among supervisors of student teachers.
8. The Governor's request was for five days of inservice training per school district employee, or \$125 per employee per year. (NOTE: This item includes training costs only; additional contract days for employees are shown in compensation increases.)
9. Continues current program level of \$1,600 per mentor/beginning teacher team, for approximately 900 such teams.
14. Fourteen districts received grants for drop-out prevention pilot projects in 1985-87. These are replaced by the grants program established in HB 456 (see item #1).

Provisoes:

Subsection 514 (1) requires the Pacific Science Center to work towards an equitable distribution of program activities statewide, and directs the Center to study the distribution of need for science enrichment outreach programs, and the means of reaching underserved schools. These findings and recommendations are due to the Legislature by July 1, 1988.

Subsection 515 (2) itemizes \$84,000 for continuation of a contract with the Cispus learning center for environmental education programs.

Governor's Vetoes:

None.

**Superintendent of Public Instruction
Educational Clinics
(\$ 000)**

The 1987-89 legislative budget addressed several major policy issues for higher education in Washington. The reason being that faculty salary levels were considerably below the levels of similar institutions in other states, and that the overall state support for higher education, as measured by the percent of the state budget, had decreased during the past ten years.

In attempt to reverse this situation, the 1987 Legislature provided over \$152 million worth of enhancements, up to approximately 12% over the previous biennium, to the six four year institutions of higher education and the twenty seven Community College campuses.

Among the 1987-89 legislative initiatives, faculty salaries were viewed as top priority. The largest share of the legislative improvement funds went to increase faculty salaries, with the primary goal of enabling the state's universities and colleges to compete on equal terms with other states in attracting and retaining quality faculty. Among community colleges, the Legislature moved to equalize disparate salaries among college districts, bringing the bottom salaries to within 2% of the statewide community college average.

A second legislative priority was instructional support—money for the upkeep of facilities, the addition of support staff, and the replacement of outdated and worn out equipment. Extra instructional support monies also provided the means to add state-of-the-art technology and instructional tools.

Closely related to improved instructional quality was the distinguished professorship program. The 1987-89 budget added approximately \$5 million to create twenty new distinguished professorships, a program which builds on academia's partnership with private industry to provide a long-term commitment to nationally distinguished faculty.

As well as qualitative issues, the 1987 Legislature focused on quantitative remedies, to broaden a student's educational opportunity.

With increased potential programming brought about by new technologies, the Legislature invested in the higher educational telecommunications network. The program expands higher educational services to meet the growing demand within the Vancouver, Spokane, and Tri-cities areas.

In recognizing the heavily increased demand of the Puget Sound area, the 1987 Legislature reaffirmed its commitment to the Evergreen State College (TESC), permitting enrollment increases of 300 students to 2900 full-time equivalent students. This growth allows TESC to continue to fulfill its original enrollment projections and to maximize use of existing facilities.

The 1987-89 budget also improved educational opportunity through a major policy initiative to increase the number of minority students attending post-secondary schools. The initiative also provided retention monies, to be used for improving minorities' chances of graduation.

Another legislative decision focused on improved student financial aid packages. Funding for financial aid programs was increased 25% over current budget levels, providing some \$10 million to assist students in paying for the increased cost of higher education.

Rounding out its initiatives in higher education, the 1987 Legislature funded a variety of other projects designed to focus on major state issues and to improve classroom quality. The 1987-89 budget provided over \$1 million for a center at The Evergreen State College to study both undergraduate education

and labor issues statewide, for a health science research center in Spokane, and for a pilot undergraduate assessment program at Western Washington University.

The table on the following page itemizes the various budget increases (state funds only) approved by the 1987 Legislature:

The operating budgets for institutions of higher education are financed by a variety of sources other than the state general fund. These sources include general local funds, dedicated local funds, federal funds, and grant and contract funds. All these fund sources are non-appropriated and are lumped together in the other funds column in the budget detail sheets. In addition to these other fund sources, the institutions have agency funds, budgeted by the Legislature and therefore do not appear in the budget notes.

Policy Initiatives

Student Quality Standard

Two biennia ago, in the 1983-85 budget, the Legislature used bench marks to establish minimum expenditure levels per student at each institution of higher education. The intent of the new practice was to provide budget information which focused more on indicators which make up "educational quality" rather than on numbers of competitive enrollment growth which dominated the earlier "formula" budgeting approach.

The 1987-89 budget expands on the minimum student expenditure concept in two significant ways:

(1) The "student quality standard" was expanded to include all program expenses — excepting plant maintenance — required for the operation of an institution rather than just the instructional program. The block of program funds is divided by enrollment to get the cost-per-student, or the minimum expenditure level to attain a "quality" education. (Note: In the case of Washington State University, agricultural research and extension are also excluded from the pool of money required to determine the student quality standard; the salary increase funds for agricultural research and extension are included in the student quality standard).

The more aggregated approach for the student quality standard is intended to improve the higher education budgeting process in the following ways:

- It will allow the Legislature to focus more on the outputs, or the university system's "quality of product" rather than on the inputs, or appropriating funds by program and listing line item activities of the institution;
- It will provide the institutions more management flexibility in allocating resources among the various programs in order to produce a quality educational experience for the student;

- It will provide a dollar amount per student which can easily be used to compare one year's budget to another or to compare Washington's expenditures in higher education with that of other states, similar to the "peer group" comparisons done on faculty salaries.

(2) The student quality standard was "equalized" for all the regional universities to bring each regional's student quality standard to the same level. For the first time, Central Washington University, Eastern Washington University, Western Washington University and The Evergreen State College are all given the same dollar amount per student. In order to develop an equal dollar amount per student at the regional universities, the Legislature adopted a marginal cost concept. The theory of marginal cost assumes that once the basic administrative and educational structures are in place, it will cost less to educate an additional student. The 1987-89 budget appropriates \$5,974 per student for the first 3000 students and \$3,895 for each additional student over 3000.

Outcome/Performance Measures

The appropriations act requires each four-year institution and the community college system to report back to the Legislature on how the institutions were able to improve the following areas:

- a. Minority student enrollments
- b. Women in managerial and senior-level positions
- c. Quality of undergraduate and graduate educational programs
- d. Off-campus educational programs
- e. Student admission standards
- f. Evaluation of student performance
- g. Programs operated jointly with another public or private institution
- h. Faculty and staff recruitment and retention
- i. Faculty turnover rates
- j. Instructional equipment

The reporting of performance measures, when combined with the student quality standard, is intended to develop a new budgeting process and establish a new accountability between the institutions of higher education and the Legislature. For its part, the Legislature identifies policy direction for the institutions, which can either be explicitly stated in the budget language or implicitly incorporated in the budget amounts. Once policy is determined, the Legislature appropriates funds to higher education institutions to carry out the policy directions. For their part in the new relationship, the institutions are responsible for administering the resources to meet school needs, for managing the resources to attain a determined level of quality, and for reporting to the Legislature how the policy directives were accomplished.

The new budget process will have the following advantages over the past budget practices:

- The Legislature controls the policy agenda for the state's higher education system.
- The Legislature will set the standard of educational quality as expressed in dollars per student.
- The institutions are accountable for the Legislature's policy agenda.
- The Legislature will have a standard for assessing the relative cost between higher education and other state services.
- The Legislature will have a mechanism for comparing the performance between institutions both within the state and among "peer institutions".

Faculty Salary Increase

In the early 1960's, the Legislature adopted a policy of comparing Washington's faculty salaries with the average faculty salary found in other states which have similar institutions to those in Washington. For many years this comparison was known as the "seven state survey". However, the scope of the comparison has been broadened and today is referred to as the "peer institution survey".

Peer institutions provide data to the state in a variety of items, including faculty salaries. The difference between Washington's average salary and the peer institutions is the "salary gap". The salary gap appears as a percentage amount which usually represents the salary increase requested by Washington's institutions. The most recent peer faculty salary survey was based on the 1986-87 school year and was adjusted for two years of inflation to estimate a salary gap at the end of the 1988-89 school year. An inflationary adjustment was made in order to have the salary data correspond with the state's biennial budget cycle. The Governor, in his budget recommendation, also averaged the salary gap for the regional universities into one percentage amount for all four regional universities.

Table one below lists the salary gap for each institution, the adjusted salary gap which averaged the four regional universities together and included 3.6% and 3.7% for inflation during the upcoming biennium, and the legislatively approved faculty salary increase levels for higher education:

The 1987 Legislature funded the approved faculty salary increase in four steps: Step 1) The 1987 supplemental budget was the first installment for the salary increase. The

supplemental budget salary increase took effect on March 1, 1987 and elapsed on July 1, 1987 with the start of the biennial budget; Step 2) The 1987-89 biennial budget carried forward the supplemental budget's faculty salary increase to February 29, 1988, at which point the supplemental "bridge" money ended; Step 3) The biennial budget provided an additional salary increase effective March 1, 1988. The percentage increase totaled 8.5% for the University of Washington, 8.2% for Washington State University, 7.6% for the regional universities and 6.3% for the community colleges. The total faculty salary increase for March 1, 1988, in effect contained two parts: continuation of the supplemental increase plus the additional salary increase. In order to provide an actual salary increase, the supplemental increase ending on February 29,

1988, had to continue without interruption. The reason for allowing the supplemental salary increase to lapse and re-combining the percentages in the new March 1, 1988 salary increase was based on a change in the definition of persons eligible to receive the increase. For example, four-year institution's part time faculty were ineligible to receive the 1987 supplemental salary increase, but under the biennial appropriations act, they became eligible for the full increase given to exempt employees' effective March 1, 1988; Step 4) The biennial budget provided an additional salary increase effective January 1, 1989.

Table two below shows the percentage amounts and the effective dates of the faculty salary increases provided by the 1987 Legislature for each institution:

Table One.

	1986-87 Peer Gap	1987-89 Gap Adjusted for Inflation	Percent of Gap Funded	Legislative Authorized Salary Increase
UW	15.9%	24.5%	72%	17.6%
WSU	15.2%	23.7%	72%	17.0%

WWU	4.5%	3.1%	7.6%	15.8%
CC's	4.0%	2.3%	6.0%	12.7%

Exempt Staff Salary Increase

The 1987 Legislature funded exempt staff salary increases in four steps: Step 1) The 1987 supplemental budget was the first installment for most exempt staff salary increases. The supplemental budget salary increase took effect for certain defined exempt employees on March 1, 1987 and elapsed on July 1, 1987 with the start of the biennial budget; Step 2) The 1987-89 biennial budget carried forward the supplemental budget's exempt salary increase through February 29, 1988, at which point the supplemental "bridge" money ended; Step 3) The biennial budget approved a new salary increase equal to the supplemental percentage increase amounts on March 1, 1988. In effect, the March 1988 salary increase simply continued the 1987 supplemental percentage salary increase. The reason for reenacting the supplemental salary increase was based on the supplemental's limited definition of persons eligible for an increase. The supplemental budget excluded the following persons from receiving the salary increase: presidents, chancellors, chief executive officers, provosts, vice-presidents, deans, senior administrative officials at the four year institutions who report directly to these individuals, and part time faculty at the four-year institutions. All these excluded

persons were eligible to receive the exempt salary increase on March 1, 1988 except academic deans who receive the same increase as faculty; Step 4) The biennial budget provided an additional percentage salary increase effective January 1, 1989.

The table below shows the percentage amounts and the effective dates of the exempt salary increase provided by the 1987 Legislature for each institution.

Classified Employee Salary Increase

The 1987 Legislature provided two salary increases for higher education classified employees. The first salary increase, effective January 1, 1988, provides a 2.65% or \$50 increase, whichever is higher. It is anticipated that a majority of classified employees will receive the \$50 amount, therefore making the actual salary increase closer to a 3.1% increase. The second salary increase, effective January 1, 1989, is a 3% salary increase.

Community College Faculty Equalization

In addition to the salary increases mentioned above, the State Board for Community College Education received \$1,129,000 to reduce the disparity in full time faculty salaries among

college districts. These additional moneys were intended to insure that no college district's full time faculty average salary would be more than two percent below the district's hypothetical average salary based upon the system-wide costs for experience and education levels. The eight districts which were designated to receive the equalization funds and the amounts for each district are listed below:

Community College Faculty Equalization

Spokane Community College	\$533,000
Shoreline Community College	242,000
Lower Columbia College	124,000
Skagit Valley College	115,000
Community College District 12	52,000
Highline Community College	27,000
Walla Walla Community College	18,000
Whatcom Community College	18,000

Definitions and Assumptions for Faculty and Exempt Salary Increase

1. For the first time exempt staff were given a different percentage salary increase than faculty. In order to distinguish between exempt staff and faculty, the following definitions were adopted for purposes of granting salary increases:

"Faculty" were described as instructional and research faculty, academic deans, departmental chairpersons, and community college librarians and counselors who are not classified employees.

"Exempt" staff were described to include presidents, chancellors, vice presidents, administrative deans and professional personnel and four-year institution librarians and counselors who are not classified employees.

Exempt Staff Salary Increase

	3/1/87	3/1/88	1/1/89	Total
UW	5.0%	(those excluded	3.0%	8.2%
WSU	5.0%	from the 3/1/87	3.0%	8.2%
EWU	4.5%	salary increase	3.0%	7.6%
CWU	4.5%	were eligible	3.0%	7.6%
TESC	4.5%	to receive the	3.0%	7.6%
WWU	4.5%	increase)	3.0%	7.6%
CC's	4.0%		3.0%	7.1%

2. RA's and TA's : The biennial and supplemental budgets provided teaching and research assistants the same percentage salary increase as full time faculty.

3. Part time faculty: The 1987 supplemental budget provided community college part time faculty the same increase as full time faculty but provided no salary increase for part time faculty at four year institutions. The biennial budget provided community college and four year institution part time faculty the same percentage salary increase as exempt employees.

4. WSU federally funded employees: The biennial budget includes the cost of salary increases for WSU employees who are supported by the various federal programs enacted to benefit land grant institutions.

5. Librarians and Counselors: The librarians and counselors at the four-year institutions were defined as exempt employees and were funded at the same percentage salary increase as exempt employees. However, they may be given the same percentage salary increase as full time faculty if the institution is able to fund the higher salary increase out of the existing salary increase funds. In other words, if an institution has vacancies or gives a lower percentage salary increase to faculty or exempt employees, the funds may be used to grant a higher salary increase to librarians and counselors. As noted above, community college librarians and counselors were defined as faculty.

Salary Increase Controls

In order to prevent institutions of higher education from granting salary increases larger than those funded by the Legislature, the appropriations act included a penalty for exceeding the salary increase approved by the Legislature. Any institution that grants an average salary increase in excess of the amounts authorized in the appropriations act must forfeit the entire salary increase appropriation. The restriction refers to an average salary increase to allow institutions the flexibility to give differential percentage salary increases among individual employees so long as the total increase is within the percentage level approved by the Legislature. The controlling factor for the compliance section is the dollar value of the salary increase. An institution can not exceed the dollar amount appropriated for salary increases.

Peer Institutions

Comments:

The budget assumed an enrollment level of 83,300 FTE students each year of the biennium.

1. The 4% faculty salary increase in the supplemental budget was effective March 1, 1987. The amount for the 1987-89 legislative budget is the carry forward cost of the supplemental salary increase.

2. In addition to the supplemental salary increase faculty will receive a 2.3% salary increase on March 1, 1988 and 6.0% increase on January 1, 1989 (see salary increase policy).

3. The classified staff will receive a salary increase of 2.65% or \$50, whichever is greater, on January 1, 1988 and a 3% increase on January 1, 1989.

4. Allocates \$480,000 to extend the adult literacy coordination project and its volunteer tutoring efforts throughout the state.

5. The \$6 million may be used for equipment or instructional support.

7. The supplemental budget included \$261,000 for clean up of the fire site and the 1987-89 budget authorized \$170,000 for Everett Community College to acquire temporary facilities and staff during the rebuilding phase of the college's library and student center damaged by fire.

8. The faculty equalization funds are to bring the eight lowest paid colleges up to 98% of the district's average hypothetical salary schedule (based upon education and teaching experience).

Provisoes:

Section 601. The budget sets the student quality standard or expenditures per FTE student at \$2,793 for the 1987-89 biennium.

Section 121 (6). The Office of Financial Management is to conduct a study and make recommendations on faculty salary increments.

Section 601. Lists reporting requirements and contains salary increase conditions for the community college system.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Operating Budgets Community College System

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)	
						Total	GF-S

88	292.5	260.2	83,300	3,511	3,124	3,069	2,730
89	303.7	271.0	83,300	3,646	3,253	3,039	2,712

*Units: FTE Enrollment

The system has managed enrollment, through planned program offerings, to meet the budgeted levels. The community colleges have the highest rate of part-time students (53%) in the higher education system. The enrollment trend is fewer students taking vocational courses and more taking academic and basic skill courses.

Comments:

The budget assumed an enrollment level of 29,885 FTE students for the regular academic session during each year of the 1987-89 biennium. Included in the enrollment total are 385 students at the Tri-City University Center. The University is designated fiscal agent for the Center and, therefor has all the enrollment and funding for the Center.

1. The supplemental budget included a 5% salary increase for faculty and exempt employees on March 1, 1987. The amount in the 1987-89 legislative budget is the carry forward cost of the supplemental increase.

2. In addition to the supplemental salary increase faculty were given a 3.5% salary increase on March 1, 1988 and a 8.4% increase on January 1, 1989 (see salary increase policy section).

3. Classified employees will receive a 2.65% or \$50, whichever is greater, salary increase on January 1, 1988 and a 3% increase on January 1, 1989.

4-6. Program enhancements above the current policy budget level which may be used to improve faculty and support staff levels, library resources, research, academic computing, and other instructional related activities.

9. The appropriation to improve minority student retention and recruitment includes \$147,000 for the Math, Engineering, and Science Achievement program to develop two new centers.

10. The offshore study is to assess the economical, social, and environmental impact of oil and gas development on the state's outer continental shelf.

11. The medical aid and accident funds are to provide increased levels of research in the occupational health area.

Provisoes:

Section 601 Sets the student quality standard at \$7,763 per FTE student.

Section 601 Lists the reporting requirements and contains salary increase conditions for the University.

Section 603 (4) Requires the University to spend at least \$75,000 from any appropriated funds for research on the health and safety hazards of video display terminals in the work place.

Section 603 (2) Requires the University to spend \$75,000 to identify spaces for child day care centers for classified employees and for start-up cost of the day care centers.

Section 206 (c) Provides \$224,000 through the developmental disabilities program in DSHS for the DECOD dental program at the University.

Provisoes: (Continued)

Section 507 (4) Provides \$130,000 through the handicapped education program in the Superintendent of Public Instruction for the early childhood home instruction program for hearing impaired infants.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)	
						Total	GF-S
84	472.4	202.9	29,772	15,867	6,816	15,867	6,816
85	544.2	210.6	29,836	18,241	7,060	17,611	6,816
86	574.5	219.1	29,608	19,403	7,400	18,203	6,942
87	605.5	229.6	29,512	20,518	7,779	18,769	7,115
88	654.1	252.4	29,885	21,888	8,447	19,132	7,383
89	679.8	264.4	29,885	22,747	8,846	18,962	7,374

*Units: FTE Enrollment

Enrollment has been relatively constant during the indicated fiscal years as the university manages to the 29,500 student level appropriated by the Legislature. The enrollment increase for FY88 and FY89 is the result of consolidating all enrollment for the Tri-Cities University Center at the University.

Comments:

The budget assumed a student enrollment level of 15,884 students for each year of the 1987-89 biennium. The current policy level was adjusted by \$239,000 in the legislative budget for Attorney General Costs.

1. The supplemental budget included a 5% salary increase for faculty and exempt employees on March 1, 1987. The amount in the 1987-89 legislative budget is the carry forward cost of the supplemental increase.

2. In addition to the supplemental salary increase faculty were given a 3.2% increase on March 1, 1988 and 8.1% on January 1, 1989. The salary increase appropriation included money for salary increase costs of state employees who are supported by federal land grant formula funds (see salary increase policy section).

3. Classified employees will receive a 2.65% or \$50, whichever is greater, salary increase on January 1, 1988 and 3% increase on January 1, 1989.

4-6. Program enhancements above the current policy budget level which may be used to improve faculty and support staff levels, library resources, computing services, and other instructional related activities.

9. The increase for the Southwest Washington Joint Center for Education in Vancouver is to provide additional upper division and graduate level programs.

10. The additional money for the Washington Higher Education Telecommunications System will double the program capacity of the system, with \$637,000 to be applied to construction costs and \$113,000 to operational costs.

11. The \$427,000 appropriation is to develop an interdisciplinary health research and education center in Spokane.

Provisoes:

Section 601. Sets the student quality standard at \$6,549 per FTE student.

Section 601. Lists the reporting requirements and contains salary increase conditions for WSU.

Washington State University is required to continue the Yakima Nursing Center program without additional money added to the budget specifically for the program.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Operating Budgets Washington State University

Fiscal Year	Total \$ (\$ Million)	GF-S (\$ Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)

Comments:

The budget assumed an enrollment level of 7,000 for each year of the 1987-89 biennium.

1. The supplemental budget included a 4.5% salary increase for faculty and exempt employees on March 1, 1987. The amount in the 1987-89 legislative budget is the carry forward cost of the supplemental increase.

2. In addition to the supplemental salary increase faculty will receive a 3.1% increase on March 1, 1988 and a 7.6% increase on January 1, 1989 (see salary increase policy section).

3. Classified employees will receive a 2.65% or \$50, whichever is greater, salary increase on January 1, 1988 and 3% on January 1, 1989.

4-6. Program enhancements above the current policy budget level which may be used to improve faculty and support staff levels, library resources, academic computing, and other instructional related activities.

8. The \$1.7 million provides full state support for summer school with the provision that summer term tuition fee revenue be turned back to the State Treasury.

9. The \$150,000 is for Eastern's part in the development of a health research and education center in Spokane with Washington State University.

Provisoes:

Section 601. The budget sets the student quality standard at \$5,974 for the first 3,000 FTE students and \$3,895 for each student over 3,000.

Section 601. Lists reporting requirements and contains salary increase conditions for EWU.

Governor's Vetoes:

None.

Workload Assumptions/History:

See next page.

Operating Budgets Eastern Washington University

Fiscal Year	Total \$ (\$Million)	GF-S (\$Million)	Units*	Total \$/ Unit*	GF-S/ Unit*	Constant \$/Unit* (FY 84 IPD=1)

Comments:

1. The supplemental budget included \$85,000 for a tort claim and \$132,000 for a 4.5% salary increase for faculty and exempt employees on March 1, 1987. The amount in the 1987-89 legislative budget is the carry forward cost of the supplemental increase.

2. In addition to the supplemental salary increase faculty were given a 3.1% increase on March 1, 1988 and a 7.6% increase on January 1, 1989 (see salary increase policy section).

3. Classified employees will receive a 2.65% or \$50, whichever is greater, salary increase on January 1, 1988 and a 3% increase on January 1, 1989.

4-6. Program enhancements above the current policy budget level which may be used to improve faculty and support staff levels, library resources, computing, and other instructional related activities.

8. The \$400,000 appropriation will provide permanent staff for the center and expand the number of faculty seminars and exchanges between public, private, four-year and community colleges to contribute to faculty development and, ultimately, improve student learning.

9. The appropriation will establish a labor center which is to serve as a mechanism for offering self-supporting educational program which focus on short courses and seminars about labor related issues.

10. The appropriation will establish the regional center for the National Faculty of Humanities, Arts and Sciences to conduct summer seminars to focus on the improvement of teaching in Washington's primary and secondary schools.

11. Increased regular session enrollment to 2,800 FTE students for fiscal year 1988 and 2,900 students in fiscal year 1989, allowing for a 200 FTE student growth in the first year and

an additional 100 FTE student growth in the second year. The legislative budget increased the enrollment growth 100 students per year above the level recommended in the Governors budget with the understanding that The Evergreen State College would modify its admission standards to admit the best qualified students rather than the current practice of first-come/first-served.

Provisoes:

Section 601. Sets the student quality standard at \$5,974 per FTE student.

Section 601. Lists reporting requirements and contains salary increase conditions for the College.

Governor's Vetoes:

None.

Comments:

The budget assumed an enrollment level of 8,250 for each year of the 1987-89 biennium.

1. The supplemental budget included a 4.5% salary increase for faculty and exempt employees on March 1, 1987. The amount in the 1987-89 legislative budget is the carry forward cost of the supplemental increase.

2. In addition to the supplemental salary increase faculty will receive a 3.1% increase on March 1, 1988 and a 7.6% increase on January 1, 1989 (see salary increase policy section).

3. Classified employees will receive a 2.65% or \$50, whichever is greater, salary increase on January 1, 1988 and 3% on January 1, 1989.

4-6. Program enhancements above the current policy level budget which may be used to improve faculty and support staff levels, library resources, academic computing, and other instructional related activities.

8. Value-added testing is a pilot program to measure the progress of student's skills upon entrance, during enrollment, and at the completion of studies, focusing particularly on math and english skills.

9. Provides full state funding of summer term with the provision that the tuition and fee revenues be deposited in the state treasury.

Provisoes:

Section 601. Sets the student quality standard at \$5,974 for the first 3,000 FTE students and \$3,895 for each student over 3,000.

Section 601. Lists reporting requirements and contains salary increase conditions for WWU.

Governor's Vetoes:

None.

Workload Assumptions/History:

*Units: FTE Enrollment

WWU has managed student admissions in order to maintain enrollment consistent with legislative funding levels.

Source: LEAP

The Other Education category includes various state agencies that perform functions related to education and cultural enrichment activities.

Included in this group of agencies are the Higher Education Coordinating Board, State Library, Higher Education Personnel Board, Arts Commission, the three state Historical Societies, and the Commission for Vocational Education. The largest agency in this group is the Higher Education Coordinating Board whose budget includes over \$43 million for student financial aid.

The 1987-89 biennial budget contained four policy initiatives in the Other Education group of agencies:

1) Termination of the Commission for Vocational Education. The Commission for Vocational Education (CVE) was allowed to sunset on June 30, 1987 and was not reauthorized by substantive legislation. The funding for the Commission, however, was included in the budget under the special appropriations to the Governor. The Governor was to use the money to transfer the CVE's vocational education responsibilities and programs to another agency or agencies designated by executive order.

2) Increases Student Financial Aid. The budget included a \$10 million improvement to the state's financial aid program. \$4.6 million of the improvement was related to the statutory requirement that 24% of the revenue from a tuition increase be used for student financial aid and the remaining \$5.4 million was program improvement funding.

3) Arts Stabilization. The budget appropriated \$600,000 in the special appropriations to the Governor to be used to provide economic stabilization for the major art organizations around the state.

4) Washington Library Network. The Legislature reduced the state subsidy for overhead costs of the Washington Library Network establishing the policy that the network be self-supporting.

Comments:

1. Exempt employees are to receive a 3% salary increase on March 1, 1988 and a 3% January 1, 1989. Classified employees are to receive a 2.65% or \$50 increase, whichever is greater on January 1, 1988 and a 3% increase on January 1, 1989.

2. \$4,653,000 of the financial aid improvements are related to the statutory requirement that 24% of the revenue from a tuition increase be used for student financial aid and the remaining \$5,347,000 is program improvement funding. The biennial total of \$43,392,000 for student financial aid is separated into two programs: \$18,100,000 for the work study program and \$25,292,000 for need grants.

3. The \$400,000 is to establish and implement a state system for collecting and analyzing and distributing information. Included in this amount is \$310,000 for automated system development, \$40,000 for completion of the master plan in 1988, and \$50,000 for office relocation expenses or increased rent for current facility.

6. The distribution of the \$5 million for distinguished professorships among the four year institutions is contained in HB 339.

8. The additional funding for displaced homemaker program brings the total program costs to \$900,000 for that biennium. This total amount represents the estimated revenue from the increase in marriage license fee dedicated for this purpose in SB 5253.

9. The \$300,000 is to be used as forgivable loans to teachers as stipulated by the teachers conditional scholarship program in HB 857.

Governor's Vetoes:

None.

Comments:

The Commission for Vocational Education was sunsetted and not reauthorized by the Legislature. However, the Legislature provided the funds recommended by the Governor to carry on the Commission's programs in a special appropriation to the Governor (see Special Appropriation section for details).

Governor's Vetoes:

None.

Compensation Adjustments

The 1987 Legislature provided two salary increases for classified and exempt employees of the State Personnel Board. The first salary increase, effective January 1, 1988, provides 2.65%, or \$50/month, whichever is greater. The cost of the increase, when applied across all employee jurisdictions, is equivalent to a 3% across the board increase. The second salary increase, effective January 1, 1989, is a 3% increase.

Commissioned officers of the Washington State Patrol will receive a salary increase of 3%, effective January 1, 1988, and a second increase of 3%, effective January 1, 1989.

Salary increases were granted to higher education classified employees but the appropriations were placed in the higher education institution budgets. They are discussed in the section covering higher education salaries.

Monthly state contributions for insurance benefits are not to exceed \$167/month per eligible employee. This represents a continuation of 1985-87 contribution levels.

Pension Funding

Most of the state's retirement systems are funded on an actuarial basis which means that benefits which are paid to retired employees are funded during the working lives of those retirees. Prior to each biennium, the State Actuary develops payroll contribution rates sufficient to pay for benefits earned by employees. The contribution rates also include an amount necessary to eliminate the unfunded liability in the pension systems. These contribution rates represent the Actuary's recommendation to the Legislature for pension funding.

The 1987 Legislature, however, funded pensions at 61% of the Actuary's recommended contribution rate. This level of funding is sufficient to pay for the benefits earned by employees in each of the state's retirement systems during the biennium, but does not make any payment towards the unfunded liability of the systems.

Historically, the Legislature has funded various percentages of the Actuary's recommendation. As shown in Figure 1, these range from a low of 57% in 1971-73 to a high of 99.9% in 1975-77. In recent biennia the legislatively appropriated level of funding has shown an upward trend, increasing from 69% in 1981-83 to 76% in 1985-87. The 61% funding level for 1987-89 is a significant change in the recent improving pattern of funding and is the lowest level of funding since 1973-75.

Figures 2 and 3 and their accompanying Tables show pension funding levels for the Actuary's Recommendation, Current Level (76%), Governor's Recommendation, and the 1987-89 Legislative Budget.

The Governor's budget recommended:

- (1) A contribution rate sufficient to cover "earned benefits" (about 61% of the Actuary's recommendation) for PERS and TRS. "Earned benefits" is defined as the amount of money needed today that will grow with interest to pay for the increase in retirement benefits earned during the biennium.
- (2) Funding LEOFF contributions at the earned benefits level (\$110 mil.) with \$106.5 million appropriated from the Revenue Accrual Account (1985-87 ending fund balance).
- (3) An additional contribution of \$136 million from the 1987-89 ending fund balance which in combination with the earned benefits contribution rates would have reached 76% of the Actuary's recommendation. The \$136 million was part of the expected ending fund balance based on the Governor's proposed \$510 million tax increase.

The 1987-89 Legislative Budget funded pensions at the "earned benefits" level (61%). However, the earned benefits level was funded in part by the revenue accrual account (1985-87 ending fund balance). This account, for the first time, was used to offset an equal amount of state general fund appropriations to reach the earned benefits. The revenue accrual account provided the total \$110 million contribution to the LEOFF retirement system and \$55.1 million for the TRS contribution.

The total amount of state funds appropriated for the pension systems is not included in the special appropriations section of the budget. The state funding for employee retirement is included in each agency's budget as an employee benefit rather than identified in a single appropriation.

In addition to the pension funding for earned benefits, the Legislature appropriated \$600,000 in the budget for PERS and \$2 million for TRS to fund the pension portability benefit created by ESSB 5150.

Cost-of-living-adjustments To Pensions

The 1987 Legislature provided a cost-of-living-adjustment (COLA) for PERS I and TRS I retirees in SB 5380. SB 5380 increased the minimum pension benefit from \$13.00 to \$13.50 per month per year of service effective July 1, 1987. Beginning July 1, 1988 this minimum will be automatically indexed to inflation as measured by the Consumer Price Index, with maximum annual adjustment limited to 3 percent. The special pension benefit received by teachers not receiving Social Security was increased from \$7 to \$10 per month per year of service. \$7.1 million was appropriated in SB 5380 to fund the pension adjustments.

By focusing on the minimum monthly benefit level, SB 5380 targets these new COLA dollars to retirees who are likely to be the most needy. Generally, retirees at the minimum pension benefit are those who retired prior to 1973 under the then-existing (and much less generous) 1% benefit formula. Indexing the minimum to inflation, with a 3 percent annual limit, is intended to provide the same degree of protection against inflation for this group as is provided to PERS II and TRS II members.

The special pension benefit increase for teachers not receiving social security also targets dollars and is intended to provide a minimum supplement for teachers who were never eligible for Social Security and do not receive survivor benefits.

Comments:

1. Development of a common business and vendor identification number to improve management of business-related delivery systems.
5. Provides funds for distribution to agencies to pay for legal services enhancements authorized for the Office of the Attorney General.
7. Funded in ESHB 611.
8. Controlled substances enforcement assistance provides federal funds for drug enforcement.
10. Provides for settling claims of the Puyallup Indian tribe to lands formerly lying beneath the Puyallup river.
11. Provides funds for a state-wide arts stabilization program.
12. Provides funds to carry out functions previously under the Commission for Vocational Education, which was terminated June 30, 1987.

Provisoes:**Puyallup Indian Tribe Claims:**

Section 705 (1). Before June 30, 1988, the Governor, in consultation with the Attorney General, may use any or all of the \$4,000,000 appropriation to settle claims of the Puyallup Indian tribe to lands formerly lying beneath the Puyallup river.

Section 705 (2). On and after July 1, 1988, the Governor may provide for purchasing any land for which the tribal claim remains unsettled, subject to conditions specified in subsections (a) through (d).

Arts Stabilization:

Section 709. The appropriation is a state-wide arts stabilization program for arts organizations which have annual budgets exceeding \$200,000.

Vocational Education and Training:

Section 710 (1). The appropriations are to carry out

functions previously maintained by the Commission for Vocational Education.

Section 710 (2). The Governor is authorized to designate the agency or agencies necessary to maintain and continue the availability of federal funds and the programs operated under those funds, such as the Carl Perkins vocational act, the federal job training and partnership act, and federal veterans administration approval of schools.

Section 710 (3). The Governor is authorized to designate an agency or agencies to carry out programs which were previously administered by the Commission such as the private vocational schools act, the job skills program and the Washington award for vocational excellence.

Governor's Vetoes:

None.

Comments:

The Governor's request provides salary increases at 3% September 1987 and an additional 3% September 1988.

1. Governor's request includes GF-S monies for Higher Education Personnel Board and Higher Education Coordinating Board Employees. In the Legislative budget, funding for employees in these jurisdictions is provided in the higher education section of the budget. Other funds include non-appropriated funds.

2. Funds comparable worth salary increases and associated benefits.

3. The Governor proposed a \$3.90/month contribution increase (to \$170.90/month).

Provisoes:

Section 701 (1). Funds are provided for salary increases for classified and exempt employees of the State Personnel Board. Salary increases are 2.65% or \$50/month, whichever is greater, effective January 1, 1988, and an additional 3.0% increase January 1, 1989.

Section 701 (2). Funds are provided for salary increases for Higher Education Personnel Board classified and exempt employees employed by the Higher Education Coordinating Board and the Higher Education Personnel Board. Salary increases are 2.65% or \$50/month, whichever is greater, effective January 1, 1988, and an additional 3.0% increase January 1, 1989.

Section 701 (3). Funds are provided for salary increases for the State Patrol of 3.0% effective January 1, 1988, and an

additional 3.0% salary increase effective January 1, 1989.

Section 701 (4). Provided funds for continued implementation of the Comparable Worth agreement.

Section 701 (5). Monthly contributions for insurance benefits are not to exceed \$167.00 per eligible employee. Funds returned due to favorable claims experience are to be held in reserve until appropriated by the Legislature. Funds provided under this section are not to be used to increase insurance benefits over the level of services provided on the effective date the budget is enacted.

Section 701 (8). No salary increase may be paid under this section of the budget to any person whose salary has been Y-rated.

Governor's Vetoes:

None.

The capital budget contained new appropriations totaling \$847.4 million. \$391.2 million of these appropriations required state general obligation bonds. The capital budget passed as ReEngrossed Substitute House Bill 327 and became Chapter 6, Laws of 1987 First Extraordinary Session. The bond authorization passed as ReEngrossed Substitute House Bill 621 and became Chapter 3, Laws of 1987 First Extraordinary Session.

Summary Of The Capital Budget

The following sections summarize the projects contained in the Capital Budget. They include:

- 1) A summary of projects receiving new appropriations.
- 2) A summary of all projects in the capital budget with a separate listing for each fund source.
- 3) A description of each project which was not contained or altered from those included in the Governor's six year plan.

The summaries should be reviewed in conjunction with the Governor's Six Year Capital Plan and its supporting information.

The distribution of new appropriations in the capital budget is reflected in the following pie chart.

Highlights include the following:

K-12 education has a 29% share or \$248 million with \$111 million from timber revenues, \$30 million from state bonds, and \$67 million contingent on the passage of a constitutional amendment which would dedicate additional property tax revenue to schools.

Higher Education has a 28% share or \$240 million. The University of Washington has \$87 million, Washington State University has \$35 million, the regional universities are appropriated \$46 million, and the community colleges \$72 million.

Natural resource agencies have a 21% share of all new appropriations or \$175 million. Ecology has the greatest share of this, \$87 million, nearly

all going to water quality funding with cigarette taxes as the source. The remaining portions go to Parks and Recreation (\$11 mil.), Trade and Economic Development (\$32 mil.), Fisheries (\$12 mil.), Natural Resources (\$18 mil.), with small amounts to several other agencies.

General government agencies receive a 14% share, a total of \$118 million. The greatest share, \$56 million is directed to Community Development with \$35 million of this amount for the Public Works Trust Fund. The remaining amounts go to General Administration (\$38 mil.), Military (\$17 mil.), with small amounts to other agencies.

Human resource agencies receive a 7% share or \$55 million with \$20 million directed to Social and Health Services and \$35 million to Corrections.

Historical societies and the Seattle Vocational Technical Center, classified in the chart as other education, receive a 1% share or \$9 million.

Summary Of The Bond Bill And Debt Limitation

The bond bill, SHB 621 authorizes the sale of \$412.3 million in state general obligation bonds. This amount is designed to support \$30 million for common school construction, \$361.2 million in other projects, plus a 3% margin (approximately \$21 million) to cover financing costs.

Debt Limit Calculation

The debt limit is calculated for a series of years to project the impact of a stream of bond sales. This includes bonds authorized in the SHB 327 as well as those anticipated in the current six year plan. Based on these assumptions and the June, 1987 revenue forecast, the debt limit would be exceeded in 1991. The calculated amounts of bonding capacity are: FY 1989 - \$86 million, FY 1990 - \$48 million, FY 1991 - \$34 million, and FY 1992 - \$69 million.

In order to avoid exceeding the debt limit, bond sales will have to be delayed slightly or the pattern of spending in the six year plan must be reduced. While the debt limit was not projected to be exceeded at the end of the legislative session, an increase in the estimated future interest rates on bonds has resulted in the new forecast.

Explanation of the Debt Limit

The debt limit is a restriction on the amount of "general state revenue" which may be used for the payment of principal and interest.

New debt may not be issued if the new debt would cause the debt service in any year on all outstanding general obligation debt to exceed a certain percentage of the three year moving average of general state revenues.

The base for calculating the debt limit is general state revenues.

General state revenues (Article VIII, section 1, sub c) is defined in the State Constitution as including all monies received in the state treasury with certain exceptions:

- monies from trust funds and proceeds from the sale of bonds or other indebtedness

- monies for retirement system funds and performance bonds
- fees and revenues derived from the operation of any facility
- earmarked gifts, grants, donations, and aid

The amount remaining after all deductions is general fund revenue which is not earmarked or committed for any specific purpose. These revenues can therefore be appropriated for the payment of debt service.

Constitutional Debt Limit (Article VIII, section 1)

The Constitutional Debt Limit is calculated by taking 9% of the arithmetic mean of general state revenues for the preceding three fiscal years. No new general obligation debt may be issued if the new debt would cause the maximum annual debt service to exceed this calculated amount.

Excluded from the Constitutional limit are certain kinds of general obligation debt:

- debt payable from motor vehicle fuel taxes
- debt payable from investments of the permanent common school fund
- debt payable from license fees on motor vehicles
- debt payable solely from the revenues of particular public improvements (revenue debt)
- debt issued to meet temporary deficiencies in the state treasury
- debt approved by the Legislature and a majority of the voters at a general or special election

Statutory Debt Limit

The Statutory Debt Limit is more restrictive than the constitutional limit and is calculated in the same manner except that the statutory limit is 7% of the arithmetic mean of general state revenues for the three preceding fiscal years.

The debt excluded from the statutory limit is the same as that for the constitutional limit with the following exceptions:

- general obligation debt issued after approval of the Legislature and the voters is **included** rather than excluded as under the constitutional limit.
- general obligation debt which requires that the treasury be reimbursed for the full debt service from sources other than general state revenues is **excluded** (reimbursement bonds) rather than included as under the constitutional limit.

(Currently outstanding reimbursement bonds include bonds to be reimbursed from tuition fees at the institutions of higher education, patient fees at the University of Washington hospital, and from hotel and motel taxes levied in King County and operation revenues of the State Trade and Convention Center.)

Capital Budget Project Description

The following pages describe the Legislative changes to the Governor's capital budget. Capital projects that were deleted from the Governor's budget request are identified in the capital project summary in the previous section. **Capital projects that were changed or added by the Legislature are identified in the following pages.** The following pages include a description of the capital project, the cost of the project (rounded to the nearest thousand dollars), and the section number in the Capital Appropriations Bill containing the capital project.

A description of each capital project recommended by the Governor is contained in the Governor's capital budget request titled "State Facilities and Capital Plan 1987-1993".

**Department of Community Development
Tacoma Union Station Building Stabilization and Planning**

342

Section 106

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	1,500				1,500		

Description:

Funding is provided for rehabilitative work on the Tacoma Union Station building to prevent its further deterioration. Funds may also be used to prepare a plan for the future use of the building and surrounding property.

Provisoes:

\$1 million of the amount appropriated is provided solely for building rehabilitation and programming necessary to get this work done. Up to \$500 thousand may be spent on planning. The entire appropriation is provided contingent on an agreement between the City of Tacoma and the state that a) requires state approval of future use and disposition (sale or lease) of the Tacoma Union Station property and b) gives the state the right of first refusal to assume the City of Tacoma's option to purchase the Tacoma Union Station property from its current owner, the Burlington Northern Company.

Governor's Vetoes:

None.

**Department of Community Development
Silver Lake Dam Repairs**

Section 109

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	70				70		

Description:

Funds are provided for completion of repairs on the Silver Lake Dam in Cowlitz County and technical assistance to local entities regarding this project.

Governor's Vetoes:

None.

**Department of Community Development
Tall Ships Mobile Tourist Attraction**

Section 110

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	5,490		1,000		500	3,765	
<p>Description: Funding is provided for the Gray's Harbor Historical Seaport Authority to construct a mobile tall ships tourist attraction.</p> <p>Comments: Money required to complete this project during the 1989-1991 biennium is anticipated to come from non-state sources.</p> <p>Provisoes: This appropriation is provided contingent on at least \$125,000 being provided from non-state sources. If the Department determines that, by the end of the biennium, less than \$125,000 will be available from non-state sources, the state grant shall be reduced as necessary to maintain a \$4 (state) to \$1 (non-state) ratio. The \$125 thousand match must be in addition to the \$500 thousand obtained for the project from a local government bond issue during calendar year 1986. The match may include donated assets, which shall be valued at their fair market value at the time of donation.</p> <p>Governor's Vetoes: None.</p>							

**Department of Community Development
Gray's Harbor Dredging**

Section 111

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	60,000				10,000		
Description:							
Funding is provided for the state's share of costs for Gray's Harbor dredging, dike construction, bridge relocation and related expenses authorized under federal Public Law 99-662.							
The Project comprises a) an increase in the navigation channel depth from 30 feet to 36 feet, b) an increase in the depth of the outer Bar Channel at the harbor entrance from 38 feet to 46 feet, c) modification of bridges above Cow Point and d) enlargement of existing turning basins. These changes will permit larger ships to enter the Harbor and increase safety for all users.							
Comments:							
Funding for the project and anticipated spending patterns break out as follows:							
Source	Total Funding	Spending: 1987-1989	Spending: Future Biennia				
Federal:	\$40 million	\$20 million	\$20 million				
State*:	\$10 million	\$ 5 million	\$ 5 million				
Local:	\$10 million	\$ 5 million	\$ 5 million				
Total:	\$60 million	\$30 million	\$30 million				
* Or other sources							
Provisoes:							
This appropriation is contingent on \$40 million from the United States Army Corps of Engineers and \$10 million from local government funds being provided for the project.							
The Port of Gray's Harbor is required to make the best possible effort to secure funding for the project from sources other than the Corps and the local government. Any money, up to \$10 million, available from these other sources shall be used to replace or reimburse state money.							
No more than \$5 million of this appropriation may be spent during the 1987-1989 biennium.							
Governor's Vetoes:							
None.							

**Department of Community Development
Underwater Naval Warfare Museum**

344

Section 112

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	500				500		

Description:

Funding is provided for construction of an underwater naval warfare museum in Silverdale. The museum will include a mockup of the interior of a submarine, an amphitheater and other exhibits.

Comments:

The entire building will cost approximately \$6.6 million, with the additional funds coming from non-state sources.

Governor's Vetoes:

None.

**Department of Community Development
Nordic Heritage Museum**

Section 113

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	50				50		

Description:

Funding is provided for reconstruction, upgrading and preservation of the 5,000 square foot main floor of the Nordic Heritage Museum to accommodate a completed Pacific Northwest section of the Dream of America exhibit. This exhibit, of interest to both students and tourists, will be completed with private funds.

Provisoos:

Funding is provided contingent on an equal amount being provided from non-state sources for completion of the exhibit.

Governor's Vetoes:

None.

**Department of Community Development
Washington Housing Trust Fund**

Section 114

Fund	Estimated	Expenditures		1987-89		1989-91	1991-93
	Total	1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	2,000				2,000		

Description:

Funding is provided for capital costs associated with the Housing Trust Fund, under RCW 48.185.050. Money may be used for loans or grants for capital projects around the state that will provide housing for persons or families with special housing needs and with incomes at or below fifty percent of the median family income of the county or metropolitan area in which the project is located.

Comments:

E2SHB 164 provides additional resources for the Housing Trust Fund. It requires that 75% of nominal amount interest on real estate brokers' trust accounts be deposited in the Housing Trust Fund.

Provisoes:

No expenditures from this appropriation may be made before July 1, 1988. Likewise, no expenditures may be made before the Department has completed a state-wide housing study and the Legislature has reviewed the results.

At least thirty percent of grants and loans shall go to projects located in rural areas of the state.

The Department shall, to the maximum extent feasible, use the appropriation to leverage other funds for capital costs associated with the Housing Trust Fund.

Governor's Vetoes:

None.

**Department of Community Development
San Juan County Courthouse Restoration**

Section 115

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	600				600		

Description:

Funding is provided for restoration of the San Juan County courthouse.

Comments:

In addition to the \$100 thousand required to come from non-state sources, the remaining \$400 thousand is expected to be raised locally.

Provisoes:

The appropriation is contingent on \$100 thousand being provided from non-state sources.

Governor's Vetoes:

None.

**Department of Community Development
Public Works Trust Fund**

Section 116

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Public Works Trust Fund Account			35,910	25,057	34,972		

Description:

Funding is provided for loans for local public works projects recommended by the Public Works Board and approved by the legislature under the provisions of chapter 43.155 RCW. The appropriation also includes \$868 thousand for administration of the Public Works program in the Department, including a \$251 thousand increase above current policy level, provided to enable the program to contribute appropriately to Department overhead costs.

Comments:

The reappropriation includes \$17.5 million appropriated in SSB 5022 for the 1987 loan cycle. It also includes money, reappropriated in SSB 5022, that remained unspent from the 1986 loan cycle.

The appropriation includes funding for the 1988 and 1989 loan cycles. Specific loan projects will be recommended by the Public Works Board and approved by the legislature.

The Public Works Trust Fund is funded from portions of garbage, water and sewer taxes and real estate conveyance taxes. Total spending on this on-going program is uncertain.

Governor's Vetoes:

None.

**Department of Community Development
Historic Landmarks Preservation**

Section 117

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	1,200				600		

Description:

Funding is provided to establish a permanent fund, known as the endangered landmarks preservation fund, to be used by the Department to purchase and hold for brief periods, landmark buildings that might otherwise be lost or altered and to resell those buildings with the proceeds for sale deposited in the fund.

Provisoes:

This appropriation is provided contingent on an equal amount being provided from non-state sources. No state funds may be spent until \$100,000 has been provided from non-state sources. Thereafter, for each additional \$100,000 provided from non-state sources, \$100,000 of state money may be spent.

Governor's Vetoes:

None.

**Department of Community Development
Officers' Row, City of Vancouver**

Section 118

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	2,500				2,500		

Description:

Funding is provided for remodeling and restoration of a group of historic buildings, known as Officers' Row, in Vancouver.

Provisoes:

This appropriation is contingent on \$6 million dollars being made available for the project from non-state sources.

Governor's Vetoes:

None.

**Department of General Administration
Highways-License Building Renovation**

Section 144

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Capitol Purchase and Development Account	449,000				449,000	0	
State Building Construction Account	6,607,000				51,000	6,556,000	
Total	7,056,000				500,000	6,556,000	

Description:

Program planning and design for a major repair and remodeling of the Highways-License Building. The Governor recommended the total project be completed in the 1987-89 biennium. The legislative budget included only the planning and design phase of the renovation project for two reasons: A change in schedule would leave the occupants of building with no place to relocate during the 1987-89 time period when the construction phase would have taken place; and the master plan for the east campus must be developed before the program planning of the Highways-License building can be completed.

Governor's Vetoes:

None.

**Department of General Administration
John A Cherberg Building Remodel**

Section 150

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	7,000,000				3,800,000	3,200,000	

Description:

The John A. Cherberg Building remodeling is a two phase renovation project. The first phase, funded in 1987-89 budget, includes renovating the third and fourth floors for office space for Senate members. The second phase to be funded in the 1989-91 biennium will involve remodeling the first floor to provide additional hearing rooms, and the second floor and basement for staff offices and support functions.

Governor's Vetoes:

None.

Department of General Administration
Project: Legislative Building Painting and Renovation

Section 151

Fund	Estimated	Expenditures		1987-89		1989-91	1991-93
	Total	1983-85	1985-87	Reapprop	Approp		

Capitol Building Construction Account	1,365,000				1,365,000		
---------------------------------------	-----------	--	--	--	-----------	--	--

Description:

The project includes cleaning, decorative painting and lighting the Senate and House Chambers and remodeling the House offices on the fourth floor of the Legislative Building.

Governor's Vetoes:

None.

**Department of General Administration
Project: East Campus Master Plan**

Section 152

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	1,000				1,000		

Description:

The Department of General Administration is to develop a master plan for the East Capital Campus. The plan is to include recommendations for new building and program needs on the capital campus, a new facility for the Department of Natural Resources, the disposition of the old Thurston County Courthouse, and a permanent site for a state museum. The recommendations shall also include a plan for state building leases in Thurston County and an assessment of the facility needs of the Criminal Justice Training Center.

Provisoes:

1. The Department is to work cooperatively with the Ways and Means Committees of the House and Senate in the development of the east campus master plan.
2. The final recommendations are to be completed by December 1, 1987.
3. Prior to the expenditure of any funds in this section the Department shall provide the House and Senate Ways and Means Committees with a plan for the relocation of the Department of Natural Resources into interim facilities. The plan is to have the interim relocation of the Department of Natural Resources completed by March 1, 1988.

Governor's Vetoes:

None.

**Military Department
Watercraft Support and Training Center**

Section 156

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
General Fund-Federal	12,389		2,170		669	4,050	5,500

Description:

Design and construction of a pier facility in or near the Port of Tacoma including pier space for buildings and a marine railway to remove vessels from the water from maintenance.

Provisoes:

- No funds may be spent for construction of the center at a site adjacent to an urban waterfront park unless:
- (1) The Military Department first proposes criteria for site selection and these criteria are reviewed by the Department of General Administration;
 - (2) The Port of Tacoma and the Military Department agree that no site meeting the criteria is available in the port; and
 - (3) The Military Department prepares an environmental impact statement.

Governor's Vetoes:

None.

**Department of Social and Health Services
Referendum 29 Projects**

Section 202

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
LIRA DSHS Facility State	1,420		426	874	120		

Description:

Provides expenditure authority for projects already in progress, and provides new funds from interest earnings to complete a community multipurpose center for the handicapped in Ferry County.

Governor's Vetoes:

None.

**Department of Social and Health Services
Lakeland Village Rehabilitation Center
Construction and Pool Cover**

Section 204

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
DSHS Construction Account	25,226	18,436	1,790	6,000			
State Building Construction Account	250				250		
Total	25,476	18,436	1,790	6,000	250		

Description:

Continues project already in progress to construct and equip the habilitation building at Lakeland Village.

In addition, \$250 thousand is provided to cover the therapy pool at the complex.

Governor's Vetoes:

None.

**Department of Social and Health Services
Involuntary Treatment Residential Facilities**

Section 235

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	1,000				1,000		

Description:

Funds are provided for counties which develop residential mental health treatment beds as an alternative to private hospital beds for clients committed through the involuntary treatment act.

Proviso:

The Department of Social and Health Services is directed to encourage counties to submit proposals for the development of alternative community involuntary treatment beds. Counties are required to provide in-kind matches as a condition to receiving these funds. The Office of Financial Management is required to review and approve projects receiving these funds.

Governor's Veto:

None.

**Department of Veterans Affairs
Nursing Home Addition—Soldier's Home**

Section 304

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
General Fund-Federal	51				51		

Description:

Preplanning funds for a 35-bed intermediate nursing care addition to the existing 102 bed facility at the Washington Soldiers' Home.

Comments:

The current waiting list for admission to the Soldier's Home exceeds one year. When completed, this facility will address that need and will ease demand for nursing care under the Medicaid program. State costs for operating these nursing care beds will approximate \$3 per day, compared to state costs under the Medicaid program of \$19 per day projected for FY 1989.

Governor's Veto:

None.

Vocational Technology Center Corporation
Project: Vocational Technology Center

Section 411

Fund	Estimated	Expenditures		1987-89		1989-91	1991-93
	Total	1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	6,000				6,000		

Description:

Acquisition of a vocational technology facility in Seattle.

Comments:

The appropriation assumed the Seattle Opportunities Industrialization Center (SOIC) located in downtown Seattle would be available for purchase by the state through a public auction. The building and educational programs conducted in the building would be managed by the Vocational Technology Center Corporation, a non-profit public corporation created by SH 5996. While the capital appropriations act does not specifically identify the SOIC building as the subject of the appropriation, it was the intent of the capital budget and SH 5996 that the appropriation would be used to purchase the SOIC building.

Provisoes:

The appropriation for the acquisition of a vocational technology building in Seattle is contingent of the enactment of Senate Bill 5996. SB 5996 was enacted as C 492 L 1987.

Governor's Vetoes:

None.

University of Washington
Project: Health Science Building Expansion

Section 516

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Higher Education Reimbursement Bonds Account	176		41	135			
State Building Construction Account	21,135				21,135		
Total	21,311		41	135	21,135		

Description:

This project provides additional training and research space in the University's Health Science Complex. Specifically, additional space for the School of Medicine, School of Public Health and to consolidate the activities of the School of Pharmacy. Additional space will also be provided for support space, research laboratories, and training facilities. (The project is a combination of the University's request for the H wing and AA Court additions.)

Comments:

The University originally proposed this project be financed by bonding the cash flow from the Metropolitan Tract. Senate Bill 5437 would have authorized the University to issue bonds and pledge future income from the Metro Tract for this project. Rather than bond the Metro Tract revenues for this project, the Legislature appropriated state general obligation bonds and allowed the University to use the Metro Tract revenues to fund other capital project on a cash basis. The Legislature deleted four capital projects from the Governor's recommendation and allowed these projects to be funded from the non-appropriated Metro Tract revenues. The four projects are the Aerospace and Energetics Research Building addition, data communication system expansion, HUB and library grounds improvements, and the plant services roof.

Governor's Vetoes:

None.

Washington State University
Project: Tri-Cities University Center

Section 533

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	10,354				720	9,634	

Description:

The project will expand the existing facility. The expansion will provide 52,000 square feet for classrooms, library, laboratories, support services, and faculty and staff offices.

Comments:

This project was originally requested in the University of Washington's capital budget request as the University is the fiscal agent for the Tri-Cities Center. Preliminary discussions with the Higher Education Coordinating Board indicate they will recommend WSU take responsibility for the educational programs in the Tri-Cities area. Therefore, the Legislature appropriated the facility expansion to WSU.

Governor's Vetoes:

None.

Washington State University
Project: Dairy Forage Facility, Buckley

Section 535

Fund	Estimated	Expenditures		1987-89		1989-91	1991-93
	Total	1983-85	1985-87	Reapprop	Approp		
Washington State University Building Account	1,182				1,182		

Description:

This project will provide a new milking parlor, animal holding facility, research laboratory, drainage system, and road and site improvements.

Comments:

WSU originally requested this project be funded from state general obligation bonds, however the Legislature funded the project from the WSU building account.

Governor's Vetoes:

None.

Central Washington University
Project: Nicholson Pavilion, Phase II

Section 548

Fund	Estimated	Expenditures		1987-89		1989-91	1991-93
	Total	1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	3,863				3,863		

Description:

This project will construct a new 25 meter swimming pool with new shower/locker rooms and spectator seating area. The existing pool will be filled in and remodeled as a dance area. The existing dance area will also be remodeled for gymnastics use.

Comments:

CWU originally requested a \$6.8 million project. The larger project would have included the new pool and dance area plus an addition to the field house with elevated running track, eight new handball/racquetball courts, and remodel the existing racquetball courts into a wrestling-multipurpose room. Phase I (\$2.6 million) was appropriated in the 1985-87 capital budget to provide additional classroom and office space to Nicholson Pavilion.

Governor's Vetoes:

None.

**Central Washington University
Project: Telecommunications System**

Section 549

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Central Washington University Capital Project Account	3,900				1,800	2,100	

Description:

This project will install a on-campus voice and data telecommunication system which will consist of under ground and above ground cabling systems, replacement of outdated switching systems, and installation of multi-feature instruments.

Comments:

The Governor's budget recommendation included \$2 million in the operating budget for this project. The Legislature moved the project from the operating budget to the capital budget and reduced the appropriation by \$200,000 to insure the systems capabilities would not expand to include any direct off-campus communications functions.

Provisoes:

The appropriation can not be spent until CWU demonstrates to the Office of Financial Management that the purchase of a system is less expensive than leasing a comparable system.

Governor's Vetoes:

None.

**Ecology
Waste Disposal Facilities**

Section 702

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
LIRA Waste Facilities-1980	239,306			235,300	3,331		

Description:

Financial assistance to local municipalities to plan, design, and construct waste disposal facilities.

Comments:

The Legislature revised the amount appropriated to reflect an updated revenue projection and to remain within the available fund balance. A proviso was added regarding grants for groundwater planning.

Provisoes:

Up to \$1.5 million may be expended for planning assistance to ground water management areas. Such management areas are designed to protect groundwater quality and quantity to meet future needs.

Governor's Vetoes:

None.

Ecology Water Quality Projects

Section 703

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Water Quality Account	250,260				75,660	87,300	87,300

Description:

Financial assistance to local municipalities for water pollution control facilities and activities.

Comments:

The Legislature reduced the appropriation to the Department of Ecology from the water quality account to accommodate the passage of EHB 326 which requires 2.5% of the water quality account be appropriated biennially to the Washington State Conservation Commission.

Provisoes:

- (1) The Legislature provided \$1.0 million to be used solely for hazardous waste planning assistance.
- (2) The Legislature provided guidance to Ecology for the development of rules to administer the Water Quality Account.

Ecology is required to do the following:

- (a) For facilities which discharge directly into marine waters give first priority to secondary wastewater treatment facilities and second priority to projects which reduce combined sewer overflows. Encourage economies derived from doing such projects simultaneously.
- (b) In setting the level of financial assistance, allow for additional assistance for activities undertaken by local entities which lack taxing or revenue generating authority and allow for additional assistance for facilities undertaken by entities that would suffer severe financial hardship in the absence of such additional assistance.
- (c) Place funds into a state revolving loan fund as necessary to be used to match capitalization funds provided by the federal Environmental Protection Agency. Arrange for a transition in the assistance program toward the use of loans.

(d) Distribute the appropriated funds in a manner not to exceed the following percentages: 50% for water pollution control facilities that discharge directly into marine waters, 20% water pollution control activities and facilities that protect sole source aquifers, 10% for water pollution control activities that protect lakes and rivers, 10% for activities which control nonpoint source water pollution, 10% and such sums as may be remaining from the above categories for activities and facilities determined by Ecology.

(3) Consider the amount of grant or loan money available in determining compliance schedules for combined sewer overflows.

Governor's Vetoes:

None.

Ecology Emergency Water Projects

Section 704

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Emergency Water Project Revolving Account	4,225			4,000	225		

Description:

Financial assistance to irrigation districts for alleviating water shortages caused by drought conditions.

Comments:

The Legislature revised the appropriation based upon an update on the available fund balance and to reflect the passage of 2SSB 5993 which required shifting \$67,000 to the operating budget for technical assistance to alleviate possible drought conditions during the summer of 1987.

Governor's Vetoes:

None.

Ecology Water Supply Facilities

Section 705

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
LIRA, Water Supply Facilities	31,428			30,500	928		

Description:

Financial assistance to irrigation districts for agricultural water supply projects.

Comments:

The Legislature revised the amount appropriated to correct an inadvertent error regarding the split between operating and capital budgets.

Provisoes:

(1) Of the amount reappropriated, up to \$500,000 may be spent to complete the Lake Osoyoos international water control project. This amount is in addition to the \$3,000,000 appropriated for this purpose in 1982.

(2) Funds previously appropriated for the East Selah reregulating reservoir are to be reallocated for early implementation of the Yakima River Basin Water Enhancement Project in order to financially assist irrigators in making up water lost because of a 1980 court decision.

Governor's Vetoes:

None.

**State Parks and Recreation Commission
Auburn Game Farm Initial Park Development**

Section 728

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	598		28	70	500		
Outdoor Recreation Account-State	18			18			
Total	616		28	88	500		

Description:

Construction of a group recreational vehicle camping area for 25 camping parties including utilities, a comfort station, picnic shelter, trailer dump, and a group fire ring. Development of a separate primitive youth camping area with 15 campsites including utilities and toilets.

Governor's Vetoes:

None.

**State Parks and Recreation Commission
Doetsch Ranch Acquisition and Development**

Section 760

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	418				418		

Description:

The acquisition of approximately 200 acres known as the Doetsch ranch which will expand Beacon Rock State Park and provide 6,800 additional feet of waterfront along the Columbia River.

Comments:

This acquisition was originally planned for the 1989-91 biennium, however the property was put on the market sooner than expected. Also potential federal funding did not become available. Therefore, to avoid the possible loss of the property, the appropriation for this project was added by the Legislature.

Governor's Vetoes:

None.

**State Parks and Recreation Commission
Maryhill State Park Development**

Section 761

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	1,076				1,076		

Description:

Expansion of Maryhill State Park to include a 50 unit trailer camp loop, a large camp area comfort station, 16 acres of lawn and landscaping, and a new 5 acre day use area. The expanded day use area includes a large shelter, comfort station, shoreline improvements and parking for 100 cars. The area is designed for wind surfing needs as well large day use groups.

Governor's Vetoes:

None.

**State Parks and Recreation Commission
Acquisition and Development of Crystal Falls**

Section 764

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	160				160		

Description:

Acquisition of approximately 132 acres including Crystal Falls which is a three tiered waterfall on the Little Pend Orielle River. Development plans include a viewpoint of the falls, campsites, picnic area, and trail access horseback riding and ski touring.

Governor's Vetoes:

None.

State Parks and Recreation Commission Mount Spokane Winter Recreation Facilities

Section 765

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	83				83		

Description:

Construction of a rustic shelter of approximately 2,000 square feet providing an enclosed room with wood heat, comfort facilities, and covered decks to help keep entrances clear.

Comments:

The Linder Ridge parking area at Mount Spokane is a major trail head access point that receives heavy use in both winter and summer. The site is subject to extreme weather conditions which can create hazardous conditions for area users. Because of this situation cross country ski clubs have volunteered the labor to construct the shelter.

Provisoes:

The Legislature specified that volunteers may be used, as appropriate, for this project.

Governor's Vetoes:

None.

Interagency Committee for Outdoor Recreation Financial Assistance to Public Agencies for Recreation Projects

Section 766

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	500				500		
Outdoor Recreation Account-State	14,840			8,380	6,460		
Outdoor Recreation Account-Federal	1,891			1,230	661		
Total	17,231			9,610	7,621		

Description:

The Interagency Committee for Outdoor Recreation provides financial assistance to state and local public agencies for general recreation projects and for boating, non-highway, and off-road vehicle related projects.

Comments:

This appropriation was originally recommended by the Governor in the operating budget. To be consistant with the treatment of other financial assistance programs for capital improvement type projects at the local level, this appropriation was made in the capital budget. By appropriating these funds in the capital budget, a more accurate picture of the cost of operating state agencies is provided in the operating budget.

The appropriation from the State Outdoor Recreation Account is supported by \$2,860,000 in un-refunded boater fuel taxes, and \$3,600,000 from the Off-Road Vehicle Fuel tax and permit fees.

Governor's Vetoes:

None.

**Department of Trade and Economic Development
Washington State Agricultural Trade Center, Under the Ownership
and Operation of the City of Spokane**

Section 768

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	4,500			4,500			

Description:

Funding is reappropriated for design and construction of an agricultural trade center under the ownership and operation of the City of Spokane.

Provisoes:

Expenditures under this appropriation shall equal seventy-five percent of total project design and construction costs. A twenty-five percent local match is required and shall be used for actual design and construction costs. In-kind contributions may not be counted as part of this required match.

If the department determines that money in addition to the \$4.5 million from the state and the required \$1.13 million (25% match) from local funds is needed to complete the center, the amount provided in this section shall be contingent on the additional funds being provided from non-state sources.

Governor's Vetoes:

None.

**Department of Trade and Economic Development
Washington State Agricultural Trade Complex at Yakima**

Section 770

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	25,000				6,500	12,000	

Description:

Funding is provided for design and construction of an agricultural trade complex in Yakima.

Provisoes:

Expenditures under this appropriation shall equal seventy-five percent of total project design and construction costs. A twenty-five percent local match is required and shall be used for actual design and construction costs. In-kind contributions may not be counted as part of this required match.

Governor's Vetoes:

None.

Natural Resources Aquatic Land Enhancement

Section 863

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Aquatic Land Account	5,697		294	1,176	787	1,900	1,540

Description:

Financial assistance is provided through a competitive grant process to state and local agencies for aquatic land enhancement projects. Such projects provide for the purchase, improvement or protection of aquatic lands for public purposes. The majority of the projects receiving funds from the Department will be for public access to aquatic lands.

Comments:

The Legislature reduced the amount requested for this grant program by \$500,000 in order to fund a related request for wetlands projects recommended by the Puget Sound Water Quality Plan.

Governor's Vetoes:

None.

Natural Resources Water Quality Related Wetland Preservation

Section 873

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Aquatic Land Account	500				500		

Description:

Implementation of the Puget Sound Water Quality Plan recommendation on the acquisition of wetlands which act as a natural filter for water pollution and which preserve valuable aquatic resources.

Comments:

The Department of Natural Resources is directed under the plan to acquire wetlands already identified by the Heritage program and wetlands remaining in the Snohomish Delta. The Department of Ecology is designated as lead in identifying and ranking wetlands for future acquisition.

Governor's Vetoes:

None.

Natural Resources

Acquisition of Railroad Right of Way in Jefferson and Clallam Counties

Section 890

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
State Building Construction Account	800				800		

Description:

Acquisition of 51 miles of Milwaukee Railroad right of way between Port Townsend and Port Angeles for recreation, transportation and utility purposes.

Comments:

At each end of the right of way is property that could be developed in conjunction with the Ports of Port Townsend or Port Angeles. Also the right of way adjoins a possible route for a highway by pass around the town of Sequim.

Provisoes:

Portions of the right of way not needed for recreation may be re-sold for economic development purposes.

Governor's Vetoes:

None.

Natural Resources

Irrigation Development

Section 891

Fund	Estimated Total	Expenditures		1987-89		1989-91	1991-93
		1983-85	1985-87	Reapprop	Approp		
Resource Management Cost Account	950				150	400	400

Description:

Development of irrigation water sources from wells or irrigation district canals on state owned trust lands to increase income from the lease of parcels which are irrigable for farming. This also includes the construction of irrigation water distribution facilities.

Comments:

The Governor's budget included \$400,000 more for irrigation development. The Legislature reduced this project since current market conditions are not conducive to agricultural expansion given the financial problems of the farming community. Funds were provided for irrigation needs on lands which are currently leased.

Governor's Vetoes:

None.
